A

- A23187: *see* Ionophore A23187
- Abdominal viscera, peripheral reflex pathways (guinea pig), G581
- Absorptiometry, dual-photon, body fat from body density, E829
- Acarbose, treatment, sleep patterns in genetic obesity, R281
- A6 cells
localization of sodium-potassium-ATPase (frog), F1034
sodium channels, luminal sodium effects, F1094
- 4-Acetamido-4'-isothiocyanostilbene-2,2'-disulfonic acid
lumen pH and, proximal tubules, F1075
sodium-bicarbonate symport and, hepatocytes, G491
- Acetazolamide
acidification and, bladder (turtle), F923
bicarbonate transport and, collecting tubules, F680
hydrogen secretion and, collecting duct, F79
- Acetylcholine
anti-EDRF effects of tumor necrosis factor and, carotid arteries, H1509
calcium sources utilized by, gallbladder muscle, G785
coronary arteries, atherosclerosis, C591
dilation from, cerebral arterioles, arachidonate effects, H665
EDRF release and
coronary artery, H828
hypoxia effects, H1595
endothelium-associated, microcirculatory vasodilation and, skeletal muscle, H720
glucagon-like immunoreactivity and, hypoglycemia, intestine, E431
heart rate dependence, model, H520
intracellular acidosis induced by, salivary gland acinar cells, C288
intracellular sodium activity and, cardiac Purkinje fibers (sheep), H1407
noradrenergic influences, ileum, G919
parasympathetic denervation, infarction, left ventricle, H859
prostaglandin actions and, cecum, G100
release
colonic muscle, G246
enzyme-dissociated myenteric ganglia (guinea pig), G233
muscarinic autoreceptors and, heart, H1073
repetitive activity and, atrial fibers, H74
vagus nerve stimulation, heart rate and ventricular contractility (chicken), H1295
vasomotor responses and, arterioles (hamster), H832
vitamin E deficiency effects, vascular function, H1539
- N^7 -Acetyltransferase, activity, pentagastrin induction of, G16
- Acid
disequilibrium, red blood cells (trout), C728
gastric resistance to, G31
load, duodenal ulcer, G1058
secretion
80-kDa phosphoprotein, parietal cell, G1070, G1082
mediating, parietal cells, C873
- Acid-base balance
alkalinization, depolarization-induced, proximal tubules (salamander), F342, F354
bicarbonate transport, collecting tubules, F680
glucocorticoids and, renal brush-border membrane (chick), R1176
hydrogen-hydroxy-bicarbonate transport, proximal tubule, F751
ketoacid production, F437
urinary acidification and, peptide hormone effects, F973
- Acidification
acetazolamide effects, bladder (turtle), F923
proximal tubule, axial heterogeneity of, F335
urinary, acid-base balance and, peptide hormone effects, F973
- Acidosis
acute, proton compartmentation in cortical tubules, F986
epithelial cells, renal cortex, F187
glutamine uptake and, renal, F1027
intracellular, acetylcholine-induced, salivary gland acinar cells, C288
metabolic
1,25(OH) $_2$ D $_3$ response, elevated calcium ions and, F285
ammonia entry, proximal tubules, F1104
ammonia metabolism and, kidney, F321
calcium efflux from bone during, F836
electrolyte transport and, colon, G1036
peptide hormone effects, F973
recovery and, muscle energy metabolism (fish), R922
recovery from, sodium-hydrogen exchange in, myocardium, H256
respiratory
ketoacid production, F437
sodium-bicarbonate transport, F414
sodium absorption and, colon, C584
systemic, brain pH responses to sodium bicarbonate and Carbicarb, H1316
- Aciduria, hemoglobinuric acute renal failure, F446
- Acinar cells, salivary gland, acetylcholine-induced acidosis, C288
- Acinus, sinusoidal volume, retrograde liver perfusion and, G1041
- Acridine orange
hydrogen permeability, gastrointestinal membrane vesicles, G553
hypocapnia and hypercapnia, proximal acidification and, F414
- ACTH: *see* Adrenocorticotropin
- Actin
pulmonary edema and (guinea pig), H1012
smooth muscle cell line and, airway, C329
- Adenine, liver nucleotide and, after fructose loading by 31 P-NMR, G949
- Adenine nucleotides, ischemic injury and, renal, F298
- Adenosine
apical and basolateral differing effects, colonic epithelial cell line T $_{84}$, C197
calcium responses to, LLC-PK $_1$ cells, C967
coronary flow reserve, low perfusion pressure and, H1176
formation, propranolol prevention of, myocardium (guinea pig), H772
intercellular concentration, microdialysis of, subcutaneous tissue, E250
phosphoinositide turnover sensitive to, renal cell line, F1067
preservation of coronary flow reserve, stunned myocardium, H1303
production, purine nucleotide degradation and, E386
receptors: *see* Receptors
SA nodal bradycardia induced by, receptor mediation of, H1553
turnover, plasma, C799
uptake, pial arterioles, H603
vascular adaptation and, embryo (chick), H240
- Adenosine analogue, heart rate and, H1553
- Adenosine diphosphate
coronary arteries, atherosclerosis, C591
endothelium-dependent dilatation of cerebral arterioles, diabetes mellitus effects, H621
release from myosin, permeabilized smooth muscle, C59
- Adenosine monophosphate, dephosphorylation, soluble purine nucleoside 5'-phosphomonoesterases, E386
- Adenosine monophosphate, cyclic acid secretion, somatostatin linkage, stomach, G418
- 8-bromo-, capacitance, water transport, and sodium, bladder and skin (salamander), C1145
- Calcitonin gene-related peptide increase in, atria, R421
- Cell sorting, kidney cells, F742
- Chloride-dependent potassium flux activation, erythrocytes (pig), C772
- Chloride secretion, cystic fibrosis airway epithelia, C226
- Clonal subpopulations, OK cells, F672
- Content, higher aortic pressure effects, heart, C1257
- Cytosolic free calcium and, somatotropes, C375
- Desensitization to ADH and, kidney, F656
- Dibutyl
inhibition of cardiac sodium current (guinea pig), C1131
mucus-secreting colonic epithelial cell line, G443
zing metabolism and, E420
- EGF effects, inner medullary collecting duct, F1117
- Electrolyte transport, cecum, G721
- Epoxycicosatrienoic acid effects, somatotrophs, E221
- Gene regulation, contractile activity and β -receptors in, C506
- G proteins and, hepatocytes, C384
- Intracellular calcium requirements, acid secretion, parietal cell, C241
- Lidocaine effects, cardiomyocytes, H422
- Phorbol ester effects, granulosa cells, E368
- Protein phosphorylation and, colon carcinoma cells, G808
- PTH-induced production, lectin-tunicamycin effects, E80

- Adenosine monophosphate, cyclic (*cont.*)
 regulation by prostaglandin, Henle's loop, C652
 regulation of sodium-dependent phosphate transport, osteoblast-like cells, E93
 renal arteriolar, dopamine stimulation of, H626
 sodium-glucose cotransport and, secretory cell line, G335
 stimulation, peptide interaction with pancreatic acini, G283
- Adenosine triphosphatase
 activity, carbohydrate effects on cardiac myosin isoenzyme, R976
 calbindin stimulation, calcium pump, G124
 calcium-stimulated activity, gill (eel), R313
 myofibrillar, diabetic cardiomyopathy, E453
 myosin isoenzymes and, after infarction, H745
 oxygen consumption, regulation in red muscle, R898
 proton-translocating, active urea transport and, skin (toad), F830
- Adenosine triphosphate
 branched-chain 2-oxo acid dehydrogenase and, skeletal muscle, E186
 calcium transport and, enterocyte basolateral membrane, G613
 extracellular, potassium channel activation by, MDCK cells, C1016
 ischemic heart, NMR assessment, H195
 mitochondrial calcium metabolism, during reperfusion injury, C1196
 relation to oxygen consumption, heart, H265
- Adenosine triphosphate precursors, effects on ATP and free ADP content, postischemic heart, H560
- Adenoviruses, phosphoinositide turnover sensitive to, renal cell line, F1067
- Adenylate cyclase
 β -adrenergic receptors, reserpine regulation of, F532
 β -adrenoceptors, heart valve leaflets, H821
 G proteins and, hepatocytes, C384
 mucus-secreting colonic epithelial cell line, G443
 β -receptor coupling, hypoxic ventricular myocytes, neonate, H1209
- Adenylate deaminase, liver nucleotide and, after fructose loading by ^{31}P -NMR, G949
- Adhesivity, sickle erythrocytes, C579
- ADH: *see* Antidiuretic hormone
- Adipocytes
 brown, 5'-deiodinase in, thyroid status effects, E74
 dynamics, cyclic weight gain and loss (squirrel), R1286
 femoral, glucose transport and transporters, E179
 intercellular adenosine concentration, microdialysis of, E250
 oxygen consumption and, adipose tissue, E467
 proliferation, insulin stimulation of, C190
 3T3-L1, angiotensinogen gene expression in, C448
- Adipose tissue
 blood flow: *see* Blood flow
 brown: *see* Brown fat
 dynamics, cyclic weight gain and loss (squirrel), R1286
 metabolism, HDL subfractions and, reduced obesity, E740
 oxygen consumption in, age, fat cell weight, and obesity effects, E467
 white, cell proliferation in, insulin effects, C190
- ADP: *see* Adenosine diphosphate
- Adrenal cortex, aldosterone secretion and, low oxygen inhibition of (cow), E640
- Adrenal cortical cells, α_2 -macroglobulin synthesis by, C779
- Adrenalectomy
 ANF receptors in, glomerular and vascular, R1250
 control of glycemia, after stress, E231
 glucocorticoid regulation, proinsulin mRNA, E303
 response to cortisone and MSH and, genetic obesity, R494
- Adrenal gland
 blood flow: *see* Blood flow
 catecholamines, exercise and, R155
 glucocorticoid production, vasopressin effects, E566
 insufficiency, cardiovascular system and, H1274
 oxygen consumption, massive sympathetic nervous system discharge and, E345
- Adrenal medulla
 function, exercise and emotional stress, R169
 glucose, FFA, and insulin levels, exercise and, R161
 vasculature, adrenergic receptors and, H233
- β -Adrenergic agonists, inhibition, fundic mucosal mast cells, G727
- Adrenocortical cells, aldosterone secretion, low oxygen inhibition of (cow), E640
- Adrenocorticotropin
 after hemorrhage, awake state (swine), R915
 aldosterone secretion and, low oxygen inhibition of (cow), E640
 blood volume restitution and, after hemorrhage (swine), R207
 control of secretion, vasopressin and angiotensin II, R339
 β -endorphin effects, glucose homeostasis, awake state, E322
 hypertension induced by, R1308
 production, adrenal, vasopressin effects, E566
 reflex responses to hypotension, sinoaortic denervation and, fetus (sheep), R1103
 response, bradycardia and, paraventricular stimulation and, R112
 secretion, pituitary effects, E145
- Adrenomedullation, exercise and, R155
- Adriamycin, nephrotic syndrome, sodium retention, renal nerves and, F823
- Aequorin
 intracellular calcium, tracheal smooth muscle, C807
 platelets loaded with, response to activators of protein kinase C, C35
- Afferents
 renal
 plasma vasopressin and oxytocin and, awake state, R1240
 renal artery occlusion and, H1515
 somatic, stimulation, coronary arterial resistance and, R1331
 vagal, myocardial ischemia effects on baroreflex, H672
 visceral, chemical stimulation, coronary vascular responses, H735
- Afterload, left ventricular, vagal stimulation and, H428
- Aging
 alterations in blood flow and reserve, coronary, H66
 cortisone and, cholera toxin in the developing intestine, G220
 EGF content and, gastrointestinal tract, G856
 exercise training and cold exposure effects, regional blood flow, R1069
 impairment of central and baroreceptors, female, H1399
 leucine metabolism in, insulin and substrate effects, E288
 lipids, fluidity, and inorganic phosphate transport, brush border, F85
 low-sodium diet effects, platelet α_2 -adrenergic receptors and, E339
 myocardial structure and function and, H1440
 osmoregulation and, neural correlates and (mollusk), R989
 oxygen consumption and, adipose tissue, E467
 physical training and, insulin resistance, E352
 recovery relations, multiple transplantation, C1262
- Airway
 epithelium
 cystic fibrosis, calcium-induced chloride secretion, C226
 cystic fibrosis, cellular chloride transport, C1045
 cystic fibrosis, shunt resistance in, C1054
 intracellular chloride activity and cellular pathways, C1033
 secretion, β -receptors in tracheal gland cells, C310
 smooth muscle cell line, physiological responsiveness, C329
- Alanine
 metabolism, hepatic, exercise-induced fall during muscular work, E500
 transport, ethanol effects, hepatic, G458
 transport systems, basal plasma membrane, placenta, C630
- Albumin
 absorption, peritoneal cavity, E447
 serum
 hypoxia-induced injury, proximal tubule cells, F688
 renal tubular secretion of organic anions and, F475
- Alcohol
 amino acid transport and, basolateral liver plasma membrane vesicles, G458
 gluconeogenesis, counterregulation and, E844

- hydrogen permeability, gastrointestinal membrane vesicles, G553
- Aldose reductase**
activity, renal tubule segments, F563
glomerular hyperperfusion and, diabetes, F1000
induction by high external sodium chloride, renal medullary cells, C614
- Aldosterone**
biosynthesis, potassium-induced, zona glomerulosa cells, E475
chloride-dependent potassium flux, cortical collecting tubule, F697
escape, proximal tubule response in, R86
modulation of angiotensin II binding sites, neuronal cultures, C121
plasma, dietary sodium intake and, R1171
plasma atriopeptin and, during exercise, R1098
potassium secretion and, cortical collecting tubules, F306
proteins induced by (toad), C865
renin control and, dietary sodium deprivation, E863
secretion
angiotensin II-stimulated, ANP inhibition of, R1155
calcium effects on, E760
low oxygen inhibition of, adrenocortical cells (cow), E640
sustained secretion, ANP effects, C89
- Alkaline phosphatase**, impaired transport, renal, aging effects, F85
- Alkalinization**
depolarization-induced, proximal tubules (salamander), F342, F354
intracellular, arterial smooth muscle, H867
- Alkalosis**
chloride-dependent potassium flux, cortical collecting tubule, F697
metabolic
chloride transport effects, cortical collecting tubules, F306
kidney, newborn, F29
peptide hormone effects, F973
respiratory
ketoacid production, F437
sodium-bicarbonate transport, F414
- Allergy**, gut, colonic ion transport, G396
- Allopurinol**, dose-related protection, reperfusion arrhythmias, H1344
- Alloxan**, diabetes, measurement of intracellular oxygen tension, H1127
- Althesin**, urethan-chloralose and, neurohumoral cardiovascular regulation, R757
- Alveolar epithelium**, volume and ion transport, submersion culture, F397
- Amiloride**
arginine vasopressin and, vascular smooth muscle cell activation, F875
carbon dioxide effects and, intracellular pH in gastric cells, G466
cation channel and, larval skin (bullfrog), C168
chloride transport and, cystic fibrosis airway epithelium, C1045
cyclic sodium and potassium excretion and, R510
glucose production and, proximal tubules, F120
intracellular activity, cellular pathways and, airway epithelium, C1033
ion permeabilities, cystic fibrosis, C1054
lumen pH and, proximal tubules, F1075
saccharide-activated pathway and, lingual epithelium, R394
sensitivity, voltage dependence and, colonic potassium secretion in renal failure, F490
sodium channel blockable by, epithelial (toad), F965
sodium channel sensitive to, A6 cells, F1094
sodium-hydrogen exchange and, myocardium, H256
sodium permeation and, cold sensitivity in red cells (guinea pig, squirrel), R49
transport, renal brush-border membrane vesicles, F462
- Amiloride analogues**, inhibition of sodium transport, colon, C67
- Amino acids**
branched chain, exercise and, E186
clearance, kidney, F901
deprivation, protein synthesis and, hepatocytes, C18
influx, membrane potential and, fibroblasts, C930
infusion, renal hemodynamics and, F516
transport
basal plasma membrane, placenta, C630
blood-facing membranes, jejunum, E550
colon (hen), G532
ethanol effects, hepatic, G458
- α -Aminobutyric acid**, chloride current induced by, Purkinje cells, C1153
- γ -Aminobutyric acid**
increased shunt activity, ventromedial nucleus, hyperphagic models, R1225
trigeminal depressor response, medial medulla role in, R1111
- p-Aminohippurate**
renal tubular secretion, facilitation by serum albumin, F475
system, loop diuretic transport, kidney, G78
- p-Aminohippuric acid**
operational modes, renal brush-border membrane vesicles, F596
transport, indicator-dilution kinetics, kidney, F255
- Aminophylline**, metabolic effects, R1274
- Aminotransferase**, liver treated with, gluconeogenesis in (chicken), R907
- Aminotriazole**, hydrogen peroxide generation and, kidney, F158
- Ammonia**
bicarbonate handling and, kidney (alligator), F239
entry, proximal tubule, during chronic metabolic acidosis, F1104
excretion, peptide hormone effects, F973
metabolism, metabolic acidosis effects, kidney, F321
proton compartmentation, renal cortical tubules, F986
- Ammoniogenesis**
epithelial cells, renal cortex, F187
glutamine uptake and, renal, F1027
- Ammonium chloride**, intracellular alkalini-
zation, arterial smooth muscle, H867
- Amylase**
CCK antagonists and, pancreatic secretion, G150
secretion, insulin and somatostatin effects, pancreas, G897
- Anal sphincter**, anal, length-tension relations of striated muscle, G773
- Anemia**
dapson-induced, potassium-chloride co-transport, erythrocytes, C265
optimal hematocrit, gastric, H472
- Anesthesia**
althesin and urethan-chloralose effects, neurohumoral cardiovascular regulation, R757
blood pressure response, cyclic blood volume changes, R827
cardiovascular responses, intrathecal vasopressin, R193
- Anesthetics**
general, myocytes and (guinea pig), C273
local, inhibition of calcium currents, cardiac cells (frog), C549
- ANF**: see Atrial natriuretic factor
- Angiogenesis**, structural vascular adaptation, embryo (chick), H240
- Angiotensin**
converting enzyme antigen synthesis, hypoxia effects, endothelial cells (pig), C1231
drinking induced by, brain stem mechanisms in, R264
receptors: see Receptors
suppressor, sodium chloride infusion and, synergism, H1
vasomotor activity, coronary collateral circulation, H890
- Angiotensin-converting enzyme**, antigen synthesis, hypoxia stimulation, endothelial cells (pig), C1231
- Angiotensin-converting enzyme inhibitors**, angiotensin II receptors and, subfornical organ in spontaneous hypertension, H1609
- Angiotensin II**
afferent and efferent arteriolar responses, calcium channel blockade effects, F1015
aldosterone secretion and, low oxygen inhibition of (cow), E640
aldosterone secretion induced by, calcium dependence of, E760
aldosterone secretion stimulated by, ANP effects, C89
arterial pressure and, after chronic spinal transection, awake state, R666
binding sites, modulation by mineralocorticoids, C121
blood pressure levels and, R70
central effects, baroreflex control, awake state, R694
formation, angiotensinogen role in, kidney, F719
glomerular actions of, during reduced renal artery pressure, F1021
glomerular filtration rate preservation, during renal hypoperfusion, F314
modulation of natriuresis, awake state, F485
placental blood flow and, fetus (sheep), R1056

- Angiotensin II (*continued*)
 pressor response to, systemic vascular autoregulation, R98
 receptors, enalapril effects, subformal organ in spontaneous hypertension, H1609
 uterine and systemic, estradiol-17 β effects (sheep), E536
 vasoconstriction and endothelial damage, stenotic arteries, H881
 vasopressin and, control of ACTH secretion, R339
 vitamin E deficiency effects, vascular function, H1539
- Angiotensinogen
 gene expression, 3T3-L1 cells, C448
 role in ANG formation and renin release, kidney, F719
 sodium regulation of, renal, spontaneous hypertension and, F469
- Animal laboratories, technology vs. live preparations, teaching of physiology, S18
- Anions
 conductance, permeability in urinary bladder and, F1125
 efflux, cellular, myocardial ischemia, H1165
 organic
 operational modes of exchanger, renal brush-border membrane vesicles, F596
 renal tubular secretion, facilitation by serum albumin, F475
 sulfate transport and, lung fibroblasts, C486
- Anorexia
 CCK effects
 food intake, R646
 serotonergic function and, R1138
- Anorexigenic treatments, gastric motility and, R955
- Anoxia
 ambient, water temperature selection and (goldfish), R133
 recovery and, muscle energy metabolism (fish), R922
- ANP: *see* Atrial natriuretic peptide
- Antiarrhythmics, inhibition of calcium currents, heart cells (frog), C549
- Antibiotics, intraluminal polyamines, colonic mucosa, G1049
- Anti-calmodulin agents, vasopressin release and, E516
- Antidiuretic hormone: *see also* Vasopressin
 abnormal diurnal rhythm, patients with enuresis, F664
 blood glucose concentration effects, diabetes, R597
 cellular responsiveness to, urinary bladder (toad), F590
 dehydration and, organic osmolytes in inner medulla, F916
 desensitization to, renal thick ascending limbs and collecting ducts, F656
 distal convoluted tubule cells and, F814
 nephrogenic diabetes insipidus and (chicken), F639
 salt and water homeostasis, bladder and skin (salamander), C1145
 secretion, adrenergic regulation of, developmental changes, fetus (sheep), E406
 urinary acidification, acid-base balance and, F973
- V₂ agonists, vasodilatation, H1621
 water channels induced by, mercurial reagent inhibition of, bladder (toad), F948
- Anti-free radical agents, dose-related protection, reperfusion arrhythmias, H1344
- Antiglucocorticoids, role of, dexamethasone-induced hypertension, E682
- Antioxidants
 myocardial, erythrocytes and, H584
 prostaglandin E₂ production and, gastric mucosal cells, G925
- Antipyresis, indomethacin-induced, V₁ receptor effects, R1164
- ANTU: *see* α -Naphthylthiourea
- Aorta
 muscle cells, sodium-calcium exchange and cytosolic free calcium relations, C147
 pulse-synchronized contractions, Windkessel model, H928
- Aortic nerve, afferent, aging and, female, H1399
- Aortic valve, autoradiographic characterization, heart valve leaflets, H821
- Aortic wall, distensibility, diltiazem effects, H1580
- Apnea
 intracardiac shunt relations (turtle), R240
 transcendental meditation and, R632
- Apotransferrin, postischemic microvascular injury and, skeletal muscle, H1472
- Appetite, regulation, bombesin effects, R181
- Aqueous humor
 ascorbate transport, ciliary epithelium, C44
 oxygen tension, fiber-optic sensor measurement of, H1127
- Arachidonate
 inhibition of dilation, cerebral arterioles, H665
 prostaglandin E₂, arterial baroreflexes, awake state, H999
- Arachidonic acid
 growth hormone release and, somatostrophs, E221
 metabolism, mesangial cells, C101
 signal transduction and, mesangial cells, F375
 synthesis, vasopressin effects, cortical collecting tubules, F1044
- Area postrema
 lesions, force feeding after, R939
 overingestion, parabrachial lesions and, R306
- Arginine, insulin release stimulated by, galanin effects, E619
- L-Arginine, influx, membrane potential and, fibroblasts, C930
- Arginine decarboxylase, obstruction-induced colonic mucosal hypertrophy, G1049
- Arousal state, vs. temperature effects, neuronal activity in subcoeruleus area, R840
- Arrhythmias
 hyperkalemia, monophasic action potential recordings, H956
 reperfusion, protection by anti-free radical interventions, H1344
 reperfusion-induced, heart rate and, H21
- respiratory sinus, transfer function analysis, H153
 tissue geometry effects, cardiac action potential, H391
 ventricular, volume load, H1697
- Arsenazo III, calcium pump and, red cells, C1138
- Arterial system
 effective length, pulse reflection sites and, H1684
 simulated, impedance, H1087
- Arterioles
 afferent, vasopressin and, kidney, F274
 afferent and efferent, responses to angiotensin II, calcium channel blockade effects, F1015
- cerebral
 dilation from acetylcholine, arachidonate effects, H665
 endothelium-dependent dilatation during diabetes, H621
 lipoxin effects on dilation, newborn (pig), H468
 response to hypocapnic hypoxia, H460
 mechanics and composition, brain stem and cerebrum, H493
 myogenic response, rate-sensitive component, wing (bat), H32
 pial, vasodilation, inosine effects, H603
 renal, cAMP production, dopamine stimulation of, H626
 single, vascular smooth muscle, length-tension relations (hamster), H630
 vasomotor responses in cell-to-cell communication (hamster), H838
 propagation in (hamster), H832
- Artery: *see also* specific artery
 tail, smooth muscle cells, calcium channels in, H1361
- Ascorbic acid
 oxidized, renal metabolism of, F52
 transport, ciliary epithelium, C44
- Asparagine, putrescine uptake and, colon carcinoma cells, G868
- Asphyxia
 cardiovascular responses, endogenous opioids in, fetus (sheep), R1063
 fast sympathetic rhythms in, R120
- Atherosclerosis, coronary arteries in, cholesterol feeding and, C591
- ATPase: *see* Adenosine triphosphatase; Hydrogen-ATPase; Hydrogen-potassium-ATPase; Sodium-potassium-ATPase
- ATP: *see* Adenosine triphosphate
- Atrial natriuretic factor
 after hemorrhage, awake state (swine), R915
 aldosterone escape, proximal tubular response, R86
 binding sites, jejunum, G436
 cGMP production dependent on, leukotriene D₄ effects, glomerulus, F95
 cyclic nucleotide-mediated, intestinal ion transport (flounder), C142
 glomerular and vascular, adrenalectomy and, R1250
 incremental, hemodynamic, renal, and hormonal responses to, F780
 ischemia, reperfusion and, renal, F894
 isolated arteries and perfused organs (fish), R10
 microinjected, solitary nucleus, R577

- natriuresis induced by, during pacing
tachycardia, R1245
- release
 alveolar hypoxia effects, awake state (lamb), H990
 manipulations of calcium environment and, H1588
- renin inhibition, sympathetic nerve role in, R413
- sodium chloride and fluid absorption, cortical collecting duct, F179
- type C receptors, clearance function, R469
- volume expansion and, H852
- Atrial natriuretic peptide**
 attenuated response, myocardial infarction, H533
- brain, renal nerve activity and, awake state, R792
- calcitonin gene-related peptide and, regional hemodynamic effects, R332
- cGMP and, tracheal smooth muscle, C495
- following release of obstruction, natriuresis, F583
- guanylate cyclase sensitive to, medullary collecting duct cells, F766
- hypovolemic acute pancreatitis and, F211
- inhibition, angiotensin II-stimulated aldosterone secretion and, R1155
- mechanism, decrease in cardiac output, H760
- natriuretic effects of, vasopressin effects, H925
- neurohumoral changes and, onset and offset of heart failure (ewe), H1052
- plasma, dietary sodium intake and, R1171
- receptors: *see* Receptors
- release, thyroid status effects, atria, E64
- renal response to volume expansion and, awake state, R284
- secretion, determinants of, atrial myocytes, C608
- sodium excretion and, during acute hypertension, awake state, R1044
- sustained aldosterone secretion and, C89
- synthetic, renal hypertension and, H1393
- Atria: see** Heart atria
- Atriopeptin**
 plasma
 arterial wall function and, awake state, H713
 during exercise, β -blockade and, R1098
 release, pericardial pressure and, H648
- Atriopeptin III**, cyclic nucleotide-mediated, intestinal ion transport (flounder), C142
- Atrioventricular block**, cardiac output and arterial pressure, awake state, H361
- Atrioventricular node**, hypoxia effects, adult and neonate, H1337
- Atrium: see** Heart atria
- Atropine**
 acetylcholine effects and, sodium activity in Purkinje fibers (sheep), H1407
- ascending reflex pathways (guinea pig), G540
- fentanyl and, carotid sinus baroreflex control of circulation, R625
- glucagon-like immunoreactivity and, hypoglycemia, intestine, E431
- modulation, blood pressure and heart rate, R1127
- serotonin release, TRH injection effects, G377
- Autonomic nervous system**
 CRF-induced inhibition, gastric acid secretion, G214
- intrinsic heart rate, neurogenic mechanism control of, R231
- peripheral reflex pathways, abdominal viscera (guinea pig), G581
- response to neural antagonists, pentobarbital modification of, H1384
- vagal stimulation, left ventricular relaxation and, H428
- vagus nerve stimulation, heart rate and ventricular contractility (chicken), H1295
- Autoradiography**
 localization of bradykinin receptors, kidney, ureter, and bladder, F909
- neuropeptide Y cross-linking to receptor, brain membranes, G637
- quantitative electron microscope, VIP internalization, pancreatic cells, G689
- Autoregulation**
 calcium-dependent, hypertrophied heart, H1139
- capacity, saphenous vein, H47
- long-term, coarctation hypertension and, H213
- systemic vascular, pressor response to vasoconstrictor agents, R98
- whole body, during hypoxia and hyperoxia, awake state, H1023
- Autoxidation**, sickle erythrocytes, C579
- Awake state**
 adrenergic control of renin, dietary sodium deprivation and, E863
- ANF release, alveolar hypoxia effects (lamb), H990
- arterial wall stress, during volume loading, H713
- atrial peptide release, after hemorrhage (swine), R915
- baroreflex regulation, central effect of angiotensin II, R694
- blood pressure, central effects of endothelin, H1747
- blood pressure response, cyclic blood volume changes, R827
- cardiac output and blood flow, enkephalin effects, H1651
- cardiovascular responses, intrathecal vasopressin, R193
- collateral blood flow change, after coronary occlusion, H478
- contractile function, heterogeneously perfused myocardium, H352
- β -endorphin central effects, glucose homeostasis, E322
- endothelin hemodynamic effects, H1742
- fentanyl effects, carotid sinus reflex and circulation, R625
- glomerular filtration rate, dehydration and (bird), R836
- hyperoxia and hypoxia, whole body autoregulation during, H1023
- hypovolemia, regional hemodynamic changes following, R1076
- left ventricular pressure, inhibition of plasma renin activity by, R1299
- occlusion and reperfusion, coronary artery, H1719
- plasma vasopressin and oxytocin, afferent renal nerve effects, R1240
- pulmonary vascular response to neural antagonists, pentobarbital modification of, H1384
- renal nerve activity, brain neuropeptide infusion and, R792
- single-beat evaluation of contractility, left ventricle, H56
- single diastole, hyperemic response to coronary occlusion, H1645
- sodium excretion, renal nerve role in, chronic congestive heart failure, F1084
- sympathetic outflow increase, paraventricular nucleus stimulation, R1325
- urinary excretion, vasopressin, R291
- vasopressin effects, cardiovascular reflexes (baboon), H1546
- volume expansion, renal response to, ANP effects, R284
- water immersion, sympathetic nerve activity and natriuresis during, R299
- Azotemia**, hemoglobinuric acute renal failure, F446

B

- Bacteremia**
 calcium uptake and, skeletal muscle, R201
- sugar transport in, diltiazem effects, skeletal muscle, R716
- Barium**
 basolateral membrane, distal convoluted tubule, F246
- cation channel and, larval skin (bullfrog), C168
- lumen pH and, proximal tubules, F1075
- potassium channels and, apical membrane of cortical collecting tubule, F143
- potassium transport pathways, inner medullary collecting duct, C823
- sensitivity, voltage dependence and, colonic potassium secretion in renal failure, F490
- Barium chloride**, net sodium flux measurement, cell suspensions, C1105
- Basolateral membrane**
 calbindin stimulation of calcium pump, enterocytes, G124
- characterization, inner medullary collecting duct, F862
- cortical collecting duct, dietary potassium and nephrectomy effects, F387
- hydrogen-hydroxy-bicarbonate transport, proximal tubule, F751
- intestinal, inositol transport (fish), G501
- jejunum, rapid regulation of D-glucose transport, G878
- liver, amino acid transport, ethanol effects, G458
- pH effects, ion conductances, gallbladder epithelium (mudpuppy), C1184
- potassium channel currents in, distal convoluted tubule, F246
- renal, sulfate transport, glucocorticoid inhibition of (chick), R1176
- Basolateral membrane vesicles**, renal, differential permeabilities, F18
- BAY K 8644**
 calcium channels, tail artery smooth muscle cells, H1361
- regional response to, hindquarter vascular bed, H598

BAY K 8644 (*continued*)

stress and cross-bridge phosphorylation, vascular smooth muscle (swine), C96

BCECF: *see* 2',7'-Bis(carboxyethyl)-5(6)-carboxyfluorescein

Behavior

characterization of, alerting stimuli, R1121
feeding, caloric regulation, R518
ingestive, bombesin injections into fourth ventricle and, R590
water temperature selection, ethanol and anoxia effects (goldfish), R133

Benzodiazepine, circadian rhythms and (hamster), R639

Benzyl alcohol, sarcolemmal fluidity and, cardiomyocytes, H422

Betaine, inner medullary, choline dehydrogenase activity and, F107

Bethanechol chloride, serotonin release, TRH injection effects, G377

Bethanecol, inhibition of pancreas, G698

Bicarbonate
absorption, sodium-independent, proximal, F577

basolateral, transport, proximal tubule, F335

EGF effects, cortical collecting tubule, F803

electrolyte transport, chronic metabolic acidosis effects, colon, G1036

handling, kidney (alligator), F239
intercalated cells, isolation and culture, C1004

intracellular pH

gastric cells, G466
regulation by sodium-hydrogen exchange, hepatocytes, G44

reabsorption, kidney, newborn, F29
secretion

duodenal, VIP antagonist effects, G833

electrogenic, gallbladder epithelium (guinea pig), C736

mitochondria-rich cells, hydrogen-ATPase and, F869

tubular, F973

transcellular absorption, basolateral membrane, proximal tubule, F751

transport
collecting tubules, F680

inner medullary collecting duct, F862
sodium-coupled, hepatocytes, G491

Bifurcation, leukocyte shunting, muscle, H85

Bile

flow
bile acid-independent, glutathione role in, G22

hypertonic stress effects, G563
ursodeoxycholic acid, biliary tree, G653

formation, sulfated cholic acid infusion and, G62

secretion, regulation by sodium-hydrogen exchange, hepatocytes, G44

Bile acids

bile flow independent of, role of glutathione in, G22

7-ketolithocholic acid reduction, liver enzyme preparations, G67

permeability, biliary tree, G653

secretion, sulfated cholic acid infusion and, G62

transport system, hepatocytes, G78

Bile salts, short-term biliary obstruction, G312

Biliary obstruction, bioelectric sinusoidal-canalicular barrier, dissipation of, taurocholate uptake and, G312

Biliary tree, permeability, ursodeoxycholic acid, G653

Biotechnology, perfusion apparatus, microscope, C214

Biotin, transport, intestinal, G306

2',7'-Bis(carboxyethyl)-5(6)-carboxyfluorescein

intracellular pH, salivary gland, C288
measurement of intracellular pH, cortical collecting tubule, F957

Bladder: *see* Gallbladder; **Urinary bladder**

Bleeding time, hemostatic plug formation, trigramin inhibition of, H1038

Blockade

α -adrenergic, during exercise, H1148

β -adrenergic
baroreflex blunting in obesity, H417

overfeeding-induced thermogenesis and, R653

plasma atriopeptin during exercise, R1098

β -adrenoceptor, mental stress effects, E12

α - and β -, prevention of hypoglycemia during fasting, E651

calcium channel, arteriolar responses to angiotensin II and, F1015

sympathetic, diurnal variation of hemodynamics and (monkey), R778

Blood

adenosine turnover in, C799

constituents: *see* specific constituent
viscosity, microvascular pressure in lung and, H766

volume: *see* Volume

whole, glucose levels, hematocrit effects (seal), R1220

Blood-brain barrier

adrenoceptors, pericytes and microvessels, R224

disruption, mannitol and, R443

glucose metabolism, during fasting,, PET, E805

prostaglandin formation, fever effects, hypothalamus, R616

transport, indicator diffusion technique, H794

volume and ion regulation, during acute hypernatremia, F1059

Blood flow: *see also* Circulation;

Microcirculation

acute hypoxemia, fetal response (sheep), H613

adipose tissue, mental stress effects, E12
adrenal, during hypoxia, H94

adrenal cortical and medullary, adrenergic receptors and, H233

althesin and urethan-chloralose effects, neurohumoral cardiovascular regulation, R757

autoregulation of, rate sensitivity of myogenic response, wing (bat), H32

calcitonin gene-related peptide and, R332

carotid, reduced, arterial adaptation, H931

cerebral

during fasting, PET, E805

during hypoglycemia, newborn, H1659

during seizures, prostanoid role in (piglet), H120

evoked potentials and, during Cushing response (sheep), H779

hypocapnic hypoxia, H460

hypoglycemia effects, H697

immature fetus (sheep), R1264

laser-Doppler assessment, H1247, H1255

maturational changes, R78

collateral, progressive change, after coronary occlusion, awake state, H478

coronary

adenosine analogue effects, H1553

α_1 -adrenergic control, H334

myocardial respiration and, H265

regulation, single diastole, awake state, H1645

reserve and, alterations with aging, H66

sleep effects, H1378

distribution, ANP mechanism for decrease in cardiac output, H760

duodenal, ulcer, G1058

enkephalin effects, awake state, H1651

estimation, model for, rubidium kinetics and, myocardium, H1156

gastric

calcitonin gene-related peptide effects, G145

central neurotensin and, G226

CRF effects, G412

omeprazole and cimetidine, G390

gastrointestinal, postprandial, during cold stress (piglet), G364

inner medullary, postischemic acute renal failure, F456

local control, propagation of vasomotor responses (hamster), H832, H838

microvascular rarefaction, hypertension and (hamster), H126

myocardial, flow distribution during vasodilation (guinea pig), H297

regional

dextran, blood viscosity, and, H898
exercise training and cold exposure, R1069

vasopressin analogue and, H1621

renal

amino acid infusion and, F516

ANF and, during pacing tachycardia, R1245

cyclosporine nephrotoxicity and, F71
glomerular actions of angiotensin II, F1021

glomerular filtration rate preservation during hypoperfusion, F314

neuropeptide Y actions (monkey), F524

neutrophil and leukotriene mediation of, F794

thromboxane receptor sites, F1111

umbilical, ethanol and oxygen diffusion and (sheep), H813

uterine

ethanol and oxygen diffusion and (sheep), H813

local and systemic estradiol-17 β (sheep), E536

Blood pressure: *see also* Pressure

acute hypoxemia, fetal response (sheep), H613

adrenergic receptors, responses to epinephrine and, E600

- age-related baroreceptor impairment, female, H1399
- ANP response, H533
- arousal response to hypotension, sinoaortic denervation effects (lamb), H434
- arterial
- during Cushing response (sheep), H779
 - fluctuations, model, H1573
- baroreflex blunting, obesity, H417
- changes, narcolepsy-cataplexy, H111
- coronary, sleep effects, H1378
- diabetes mellitus and, R1279
- dietary obesity, weight cycling effects and, R1209
- DOCA-salt hypertension, vasopressin actions in, R138
- dynorphin and vasopressin effects, fetus (lamb), R1318
- elevation, sodium-angiotensin synergism, H1
- endothelial effects, awake state, H1742, H1747
- estradiol-17 β effects (sheep), E536
- fastigial nucleus, ventrolateral medullary lesions and, H1200
- flow dynamics, heart (crocodile), R875
- gastric, CRF effects, G412
- glutamate antagonist and, R722
- levels, perinatal sodium chloride exposure, R70
- low-sodium diet, CEI effects, R523
- occlusion and reperfusion, coronary artery, H1719
- prostaglandin E₂ infusion, comparison of methods, awake state (sheep), R685
- reflex responses to hypotension, sinoaortic denervation and, fetus (sheep), R1103
- regulation
- ANF and (fish), R10
 - low-salt diet and, H446
 - phasic baroreceptor discharge and, H1735
- renal sympathetic outflow, activation by intracisternal hypertonic sodium chloride, H411
- response, cyclic blood volume changes, awake and asleep, R827
- salt deprivation effects, H1426
- ultradian, autonomic modulation of, R1127
- urinary excretion of vasopressin and, awake state, R291
- vasopressin regulation, dehydration (baton), H486
- volume expansion, ANF and, H852
- Blood vessels, renal endothelial cells, prostanoic biosynthesis, F266
- Blood volume: *see also* Volume
- adrenergic control of renin, dietary sodium deprivation and, E863
 - after hemorrhage, behavioral and hormonal effects on (swine), R207
 - ANF release and, awake state (lamb), H990
 - cyclic changes, blood pressure response to, awake and asleep, R827
 - cyclosporine nephrotoxicity and, F71
 - liver, metabolism effects, G524
 - long-term hypoxemia, maternal responses to (sheep), R1340
 - regulation, left ventricular pressure and, awake state, R1299
 - renovascular hypertension, H502
 - restoration, after slow hemorrhage, fetus (sheep), R1040
 - venous outflow and sympathetic nerve activity and, hypoxic change, H162
- Body
- composition
- cyclic weight gain and loss (squirrel), R1286
 - energy balance, exercise-rest cycle effects, R886
 - food intake and, T₃ plus atenolol treatment, E459
 - prolactin and (hamster), R174
 - underwater weighing vs. dual-photon absorptiometry, E829
- fat: *see* Fat
- fluids, DOCA-salt hypertension, vasopressin in, R138
- size, muscle mechanics and locomotor performance (salamander), R1200
- weight: *see* Weight
- Bombesin
- CCK-8-induced satiety and, R56
 - food intake, gastric acid secretion and, R181
 - ingestion, digestive cell proliferation and, suckling, G328
 - nutrients and, CCK response to, G989
 - receptors: *see* Receptors
 - receptor subtypes, esophagus, G747
 - regulation of food intake and, R646
- Bone
- calcium efflux from, during metabolic acidosis, F836
 - density, underwater weighing vs. dual-photon absorptiometry, E829
 - growth, rapid, changes in lumbar vertebrae, R259

 - pH responses, sodium bicarbonate and Carbicarb during systemic acidosis, H1316
 - physiology, immature fetus (sheep), R1264
 - synaptosomes, phospholipid content, chronic renal failure and PTH effects, F705
 - transport kinetics, indicator diffusion technique, H794
- Brain stem
- arteriole mechanics and composition, H493
 - auditory-evoked response, cerebral blood flow and evoked potentials in (sheep), H779
 - bombesin injection, ingestive behaviors and, R590
 - mechanisms, thirst and, R264
 - vagal motoneurons, somatostatin inhibitory effects, C155
- Breathing: *see* Respiration
- Bronchiolar epithelial cells, nonciliated, chloride and sodium transport across, C893
- Brown fat
- adrenalectomy, genetic obesity and, R494
 - energy balance, exercise-rest cycles and, R886
 - energy expenditure, stress ulcer formation, R403
 - interleukin 1 β and, E7
 - lipoprotein lipase activity, refeeding and insulin effects, E645
 - obesity, gold thioglucose-induced, E773
 - photoperiod-induced changes, hyperprolactinemia effects (hamster), R174
 - prolactin, stimulation of food intake, R276, R701
 - rare fatty acids in, thermogenesis during arousal from hibernation (hamster), R146
 - regional blood flow, aging and exercise effects, R1069
 - thermogenesis, hibernation and arousal (ground squirrel), R42
- Brush border
- renal
- membrane processing, charge effects, C304
 - putative tripeptidyl peptidases in, F970

Brush-border membrane
 intestinal
 proton permeability, G553
 sodium-phosphate cotransport, G645
 luminal, impaired renal inorganic phosphate transport and, age effects, F85
 renal
 sodium-inorganic phosphate transport across, F852
 sulfate transport, glucocorticoid inhibition of (chick), R1176
 TEA transport, F290
 Brush-border membrane vesicles
 intestinal
 D-glucose and L-leucine transport, G618
 glutamine transport in, G240
 inositol transport (fish), G501
 regulation of biotin transport, G306
 renal
 amiloride transport, F462
 anion dependence of taurine transport, F466
 differential permeabilities, F18
 guanidine transport, F540
 organic anion exchanger in, F596
 Bumetanide
 chloride transport and, cystic fibrosis airway epithelium, C1045
 dependence, taurine transport, kidney, F466
 intracellular: activity, cellular pathways and, airway epithelium, C1033
 potassium-chloride cotransport, dapsone-induced anemia, C265
 sodium-chloride cotransport and, tracheal epithelial cells, C658
 sodium permeation and, cold sensitivity in red cells (guinea pig, squirrel), R49
 uptake, hepatocytes, G78

C

Cachectin
 anti-EDRF effects of tumor necrosis factor and, carotid arteries, H1509
 IL-1 α and, cachexia induced by, redistribution of body proteins, R659
 toxic effects of, reversal by concurrent insulin administration, E725
 Cachexia, cachectin or IL-1 α induced, redistribution of body proteins, R659
 Caco-2 cells, phosphorylation and chloride transport, protein, secretagogue-induced, G808
 Caffeine
 calcium regulation, hypertrophied ventricle, H1006
 calcium release and, malignant hyperthermia-susceptible skeletal muscle (pig), C358
 excitation-contraction coupling, sarcoplasmic reticulum participation in, ventricle (frog), H1432
 slowly relaxing response, heart ventricles, H1100
 Calcitonin, desensitization to ADH and, kidney, F656
 Calcitonin gene, antagonist for CGRP receptors, E331
 Calcitonin gene-related peptide
 acid secretion and blood flow with, gastric, G145

action, intestinal circular muscle (guinea pig), G546
 cAMP, tension, and rate and, atria, R421
 inhibition of secretion, gastric and pancreatic, G715
 regional hemodynamic effects, R332
 Calcium
 absorption, calbindin stimulation of calcium pump, enterocytes, G124
 activation of protein kinase C, response of aequorin-loaded platelets, C35
 aldosterone secretion and, E760
 ANP secretion and, atrial myocytes, C608
 apical chloride conductance induced by, cystic fibrosis airway epithelia, C226
 ATPase activity stimulated by, gill (eel), R313
 concentration
 cytoplasmic, spontaneous oscillations in, vascular smooth muscle, C951
 cytosolic free, cardiac myocytes, C1120
 extraction of human parathyroid hormone, liver, E87
 cytosolic
 alterations in LLC-PK₁ cells, C967
 luminal sodium effects on sodium channel, A6 cells, F1094
 cytosolic free
 adult gonadectomy and, E392
 chloride secretory responses and, T84 cells, C1224
 sodium-calcium exchange relations, aortic muscle cells, C147
 somatotropes, E375
 efflux, cell-mediated, from bone, metabolic acidosis and, F836
 environment, ANF release and, H1588
 extracellular
 autoregulation, hypertrophied heart, H1139
 potassium-induced artery relaxation in hypertension, H707
 flux, basal energy requirements, heart, H846
 gastric mucus secretion, mucosal explants, G739
 influx
 ANP and aldosterone secretion, C89
 peritoneal mast cells, C560
 intracellular
 ATP-activated potassium channels, MDCK cells, C1016
 epoxyeicosatrienoic acid effects, somatotrophs, E221
 regulation by cell pH, vascular smooth muscle cells, C234
 stimulus-secretion coupling and, parietal cell, C241
 intracellular alkalinization, arterial smooth muscle, H867
 intracellular free, calcium pump and, red cells, C1138
 intracellular loading
 cardiac myocytes, X-ray microanalysis, H574
 muscle length and load effects, trachea, C807
 loading, sarcoplasmic reticulum, cardiac muscle preparations (rabbit, guinea pig, frog), C109
 metabolism
 mitochondrial, role in reperfusion injury, C1196

physical activity effects, E1
 milk, fate in GI tract of sucklings, G1063
 pump: see Pump
 regulation, sugar transport, skeletal muscle, R716
 relaxation, vascular smooth muscle (swine), C282
 release
 calcium-induced, malignant hyperthermia-susceptible skeletal muscle (pig), C358
 slowly relaxing caffeine responses, heart ventricle, H1100
 sensitivity
 fibers of hypertrophied ventricle, H1006
 fiber type and muscle source effects, C420
 ontogeny of, cardiac, H179
 sources, utilized by CCK and acetylcholine, gallbladder, G785
 transport
 enterocyte basolateral membrane, vitamin D₃ effects, G613
 ouabain treatment and, cardiac cells, C1273
 uptake
 bacteremia and, skeletal muscle, R201
 oxidants effects, myocytes, C598
 vitamin D₃, female fertility and, E483
 Calcium channels
 activity, cytosolic magnesium modulation of, ventricular cells, C452
 blockade
 4,4'-dinitrostilbene-2,2'-disulfonic acid, C902
 arteriolar responses to angiotensin II and, F1015
 caffeine effects, cardiac sarcoplasmic reticulum, H328
 characterization, glucose-responsive insulinoma and, E488
 selectivity, cardiac contraction by photorelease of calcium (frog), H916
 smooth muscle cells, tail artery, H1361
 voltage-dependent
 aldosterone secretion and, E760
 smooth muscle cells, C880
 Calcium constants, EGTA, temperature and ionic strength, C1250
 Calcium currents
 L- and T-type
 cardiac Purkinje cells, H1478
 ventricle cells (chick), H1505
 low-threshold, ventricle cells (chick), H1505
 noninactivating, smooth muscle cells, C880
 transient, neuraminidase effects, cardiac myocytes, C1267
 Calcium ionophore, phosphate transport and, proximal tubules (fish), R850
 Calcium ions
 ATP-dependent accumulation, depression by oxygen free radicals, H368
 elevated, 1,25(OH)₂D₃ response to phosphorus restriction, F285
 intracellular concentration, vasopressin and, cortical collecting duct, F556
 photorelease, ventricular myocardium (frog), H916
 Calmodulin
 ornithine decarboxylase induction, G342
 rapid relaxation and, carotid artery smooth muscle (hog), C315

 anteroventral third, preoptic recess lesions, hypertension and catecholamines after, R487
 fourth, bombesin injection, feeding behavior and, R590
- Cerebrospinal fluid
 glucose homeostasis, β -endorphin effects, E322
 hyperinsulinemia, central IL-1 elicited, R772
- potassium transport and, choroid plexus, infant, R786
 pro-opiomelanocortin products, post-translational processing (piglet), R429
 volume and ion regulation, during acute hypernatremia, F1059
- Cerebrum, arteriole mechanics and composition, H493
 cGMP: *see* Guanosine monophosphate, cyclic
 CGRP: *see* Calcitonin gene-related peptide
 Chelators, copper metabolism and, hepatocytes, G667
 Chemiluminescence, nitric oxide as EDRF, aortic endothelial cells, H1030
 Chemoattractants, leukocyte adherence induced by, dimethylsulfoxide prevention of, H594
 Chenodeoxycholic acid, formation from 7-ketolithocholic acid, liver enzyme preparations, G67
 Chief cells, desensitization of pepsinogen secretion, CCK-induced (guinea pig), G837
 Chloralose, renal sympathetic nerve activity and, awake state, R371
- Chloride
 apical conductance, calcium-induced, cystic fibrosis airway epithelia, C226
 concentration
 distal, tubular pressure, flow, and, F1007
 hemolymph osmolality and (mollusc), R989
 conductance
 corneal epithelium (bullfrog), C750
 secretory membrane, parietal cells, G299
 volume-sensitive, colonic cell line T84, C1111
 current, GABA-induced, Purkinje cells, C1153
 dependence, taurine transport, kidney, F646
 electrolyte transport, chronic metabolic acidosis effects, colon, G1036
 excretion, ANF and, during pacing tachycardia, R1245
 intracellular activity, cellular pathways and, airway epithelium, C1033
 loading, salt deprivation effects on blood pressure, H1426
 permeability
 brush-border and basolateral membrane vesicles, F18
 pH effects, gallbladder epithelium (mudpuppy), C1184
 potassium flux dependent on, cortical collecting tubule, F697
 potassium flux dependent upon, activation by cAMP, erythrocytes (pig), C772
 potassium transport and, red blood cells, C994
 potassium transport dependent upon, erythrocyte ghosts, C81
 secretion
 colonic epithelial cell line T₈₄, C197
 secretory cell line, G335
 tracheal and alveolar epithelium in submersion culture, F397
 secretory channels, 4,4'-dinitrostilbene-2,2'-disulfonate acid, C902
- secretory responses, calcium-mediated effector mechanism effects, T84 cells, C1224
- transport
 cellular, cystic fibrosis airway epithelium, C1045
 colonic, membrane site of action of carbon dioxide, C584
 electrophysiology of, intestinal villus cells (fish), C1022
 nonciliated bronchiolar epithelial cells, C893
 potassium secretion and, cortical collecting tubules, F306
 secretagogue-induced, Caco cells, G808
 wasting, kidney, newborn, F29
- Chloride-bicarbonate exchange
 apical membrane, gallbladder epithelium (guinea pig), C736
 bicarbonate-secreting intercalated cells, kidney tubules, C1004
 sodium-dependent, depolarization-induced alkalization, proximal tubules (salamander), F354
 sodium-hydrogen antiport and, lymphocytes, C428
- Chloride channel
 forskolin activation of, skin (frog), C1239
 regulatory volume decrease and, renal cells (opossum), C252
 sarcolemmal spheres, skeletal muscle, C434
- Chloride ions, flux, intestine (flounder), G166
- 2-Chloroadenosine, cerebral microcirculation, laser-Doppler assessment, H1255
- Chlorothiazide, renal injury, spontaneous hypertension and, F224
- Cholecystokinin
 anorexia induced by, serotonergic function and, R1138
 anorexigenic treatments, gastric motility and, R955
 antagonists, pancreatic secretion and, G150
 calcium sources utilized by, gallbladder muscle, G785
 desensitization of pepsinogen secretion induced by, chief cells (guinea pig), G837
 exocrine pancreas
 inhibitory regulation, G698
 model, G817
 gastrin and, ornithine decarboxylase activity, pancreatic cell line, G846
 hormone release induced by, anterior and posterior pituitary (sheep), R1355
 hypothalamic, release, nutrient and volume loading effects, R248
 intraventricular, food and intake and gastric emptying with (baboon), R1313
 lithium chloride and, inhibition of gastric emptying, R463
 mechanics, pylorus and gastric muscles, G862
 physiological role for, food intake and, R464
 plasma, in response to dietary fat, G1016
 plasma levels, satiety and, R1148
 plasma (pig), G53

- regulation of bombesin receptors, pancreatic acini (guinea pig), G291
- response, bombesin and nutrients, G989
- SBTI and, pancreatic digestive enzyme gene expression, G733
- structural analysis, gastric smooth muscle tumors, G1005
- Cholecystokinin octapeptide
 - pentose phosphate shunt activity and, pancreatic islets, E68

Coronary collaterals (*continued*)
 pressure-flow characteristics, H441
 Coronary flow
 after α -adrenergic blockade, exercise effects, H1148
 autoregulation, hypothermic hearts (rat, squirrel), R357
 persistent reserve, low perfusion pressure, H1176
 reserve, preservation of, stunned myocardium, H1303
 Coronary occlusion
 automatic syringe for, long-term collateralization studies, H1707
 collateral blood flow change after, awake state, H478
 creatine kinase isoenzyme response to, myocardial, H508
 hyperemic response to, during single diastole, awake state, H1645
 myocardial ischemia effects, H672
 reperfusion and, technique for, awake state, H1719
 Coronary reserve, blood flow and, alterations with aging, H66
 Coronary sinus, occlusion, intermittent, flow-venous pressure relations, H906
 Corticosteroids, regional adrenal blood flow, during hypoxia, H94
 Corticosterone
 hypothalamic obesity and, R751
 modulation of angiotensin II binding sites, neuronal cultures, C121
 potassium-induced aldosterone biosynthesis, zona glomerulosa cells, E475
 replacement, adrenalectomy and, vascular responsiveness, H1274
 secretion, pituitary effects, E145
 ventromedial hypothalamus, response to exercise, R1019
 Corticotropin-releasing factor
 baroreflex function and, acute burn edema, H940
 central autonomic modulation by, cardiac baroreflex, H949
 dissociated effects, acid secretion and blood flow, G412
 inhibition, gastric acid secretion, G214
 intraventricular infusion, VMH-lesioned obesity and, R751
 pyrogenic and thermogenic effects, interleukin 1β , E111
 Cortisol
 after hemorrhage, awake state (swine), R915
 aldosterone secretion and, low oxygen inhibition of (cow), E640
 blood volume restitution and, after hemorrhage (swine), R207
 control of secretion, vasopressin and angiotensin II, R339
 production, adrenal, vasopressin effects, E566
 reflex responses to hypotension, sinoaortic denervation and, fetus (sheep), R1103
 release, CCK-induced (sheep), R1355
 stimulation of sodium-potassium-ATPase activity, ouabain binding and, gill (salmon), R707
 Cortisone
 adrenalectomy and, genetic obesity, R494

aging and, cholera toxin in the developing intestine, G220
 differential effects, jejunal sucrose expression, sucklings, G604
 Coupling
 cell-to-cell, arterioles (hamster), H838
 electromechanical, contraction generation in colon circular muscle, G570
 excitation-contraction
 caffeine and, cardiac sarcoplasmic reticulum, H328
 caffeine responses, H1100
 calcium fluxes, ventricle, C813
 cardiac myocytes, X-ray microanalysis, H574
 cardiac SR calcium and (rabbit, guinea pig, frog), C109
 carotid artery smooth muscle (hog), C315
 oxygen consumption and, heart, H1289
 photorelease of calcium, ventricular myocardium (frog), H916
 sarcoplasmic reticulum participation in, ventricle (frog), H1432
 toxin effects, intestinal smooth muscle, G759, G767
 intercellular, general anesthetic effects on myocytes (guinea pig), C273
 β -receptor-adenylate cyclase, hypoxic ventricular myocytes, neonate, H1209
 stimulus-secretion
 calcium and, parietal cell, C241
 gastric mucus secretion, mucosal explants, G739
 manipulations of calcium environment and, H1588
 peritoneal mast cells, C560
 Creatine kinase
 activity, chronic glucagon-treated hyperthermia (duckling), R1192
 myocardial, response to coronary artery occlusion, H508
 skeletal muscle growth and (chicken), C674
 Creatine phosphate, ischemic heart, NMR assessment, H195
 CRF: *see* Corticotropin-releasing factor
 Cross-bridge phosphorylation
 relaxation and, vascular smooth muscle (swine), C282
 stress dependence on, vascular smooth muscle (swine), C96
 Cryosupernatant, von Willebrand multimer accumulation and, endothelial cells, H1635
 Current: *see also* specific element
 short-circuit
 alveolar epithelial cells, C688
 cecum, G1090
 corneal epithelium (bullfrog), C750
 Cushing response
 evoked potentials, cerebral blood flow and (sheep), H779
 fast sympathetic rhythms in, R120
 Cycloheximide, anti-EDRF effects of tumor necrosis factor and, carotid arteries, H1509
 Cyclohexyladenosine, SA nodal bradycardia induced by, receptor mediation of, H1553
 Cyclooxygenase
 inhibition, proximal colon, G673
 metabolism, mesangial cells, C101

PAF-induced changes, renal hemodynamics, F35
 synthesis, regulation, endothelial cells, C1168
 Cyclopentyladenosine, SA nodal bradycardia induced by, receptor mediation of, H1553
 Cyclosporine, nephrotoxicity, renal hemodynamics and, F71
 Cystic fibrosis
 airway epithelium
 calcium-induced chloride secretion, C226
 cellular chloride transport, C1045
 shunt resistance and ion permeabilities, C1054
 Cystine, reabsorption, kidney, F901
 Cytochalasin, binding, basolateral membrane of jejunum, G878
 Cytochalasin B
 binding, muscle, changes in response to exercise, E580
 exercise effects, skeletal muscle, E227
 postreceptor defect in insulin action, streptozotocin-induced diabetes, E624
 Cytochromes, b-type, spectrophotometry, brain, C840
 Cytochrome-c oxidase, maturational changes, brain, R78
 Cytochrome oxidase
 activity, chronic glucagon-treated hyperthermia (duckling), R1192
 mitochondrial activity, cell composition and, R63
 Cytokines, cachexia and, redistribution of body proteins, R659
 Cytokinesis, attachment and hypertrophy, vascular myosin expression during, C793
 Cytoplasts, neutrophils and, lung injury induced by, H751
 Cytoprotection, ethanol injury, prostaglandin effects, stomach (guinea pig), G704
 Cytoskeleton, cardiac myocytes, stiffness and shortening changes, H533

D

Dantrolene, calcium release and, malignant hyperthermia-susceptible skeletal muscle (pig), C358
 Dapsone, anemia produced by, potassium-chloride cotransport in red cells, C265
 Deconvolution, constrained, models, R1005
 Deferoxamine
 postischemic microvascular injury and, skeletal muscle, H1472
 vasodilator response to acetylcholine and, cerebral arterioles, H665
 Dehydration
 ADH and, organic osmolytes in inner medulla, F916
 anorexigenic treatments, gastric motility and, R955
 blood pressure, vasopressin regulation of (baboon), H486
 glomerular filtration rate, awake and unrestrained (bird), R836
 hexokinase activity during, brain, R1050
 rehydration and, homeostatic response (cattle), R816

sickle erythrocytes, C579
systemic fluid homeostasis, rumen volume saliva flow rate and (cattle), R809
Dehydro-L-ascorbic acid reductase, renal metabolism, F52
Denaturation, thermal, tissue pressures in burns, H940
Denervation, cardiovascular response to (toad), R946
Deoxycorticosterone
fluid absorption, ANF effects, cortical collecting duct, F179
modulation of angiotensin II binding sites, neuronal cultures, C121
potassium-induced aldosterone biosynthesis, zona glomerulosa cells, E475
sodium-potassium-ATPase activity and, inner medulla, F218
Deoxycorticosterone acetate, hypertension, pressor responses to vasopressin (pig, sheep), H101
Deoxyglucose, diet-induced insulin resistance, chronic exercise effects, E242
2-Deoxy-D-glucose
glycolysis and, wounded skeletal muscle, E788
infusion, sympathetic activity changes and, E714
lipoprivic and glucoprivic feeding, R1232
utilization, cerebral, during status epilepticus, newborn (monkey), C1160
Deoxyribonucleic acid
arterial adaptation, reduced blood flow, H931
cell subpopulations, differentiating compartments of epidermis, C977
Desipramine, norepinephrine and, liver, G107
Development: *see also* Growth; Maturation
adrenergic regulation and, arginine vasopressin secretion, fetus (sheep), E406
calcium sensitivity, cardiac, H179
cardiac, fatty acid metabolism and, neonate (piglet), H9
intestinal, cholera toxin and, G220
jejunal, microvillus membrane, G931
pro-opiomelanocortin products, post-translational processing (piglet), R429
regulation, lung lectin gene expression, C501
thyroid hormone effects, ontogeny and (sheep), E543
vascular, adenosine role in, embryo (chick), H240
Dexamethasone
ACTH secretion and, pituitary effects, E145
hypertension induced by, RU 486 role in, E682
inhibition of sodium transport, colon, C67
inhibition of sulfate transport, renal brush-border membrane (chick), R1176
liver treated with, gluconeogenesis in (chicken), R907
prostaglandin effects, cortical collecting tubule, F570
regulation
lung lectin gene expression, C501
proinsulin mRNA, E303

Dextran
blood viscosity and, regional hemodynamics, H898
fractional clearance profiles, nephrotic humans, F44
³H-labeled, glomerular binding, F882
Dextrofenfluramine, anorexia induced by, serotonergic function and, R1138
Diabetes
bioenergetic changes, skeletal muscle, E129
cardiomyopathy, subcellular defects in, verapamil effects, E453
glomerular hyperperfusion in, sorbinil effects, F1000
glucoregulation, phlorizin-induced normoglycemia, E277
insulin receptor function and, skeletal muscle, E39
insulin sensitivity preceding, hepatic glucose production and (monkey), E676
intraocular oxygen tension, fiber-optic sensor measurement of, H1127
non-insulin-dependent
gluconeogenesis from lactate, insulin inhibition of, E732
myocardial mechanical defects associated with, E25
postischemic response to prostacyclin and, H1353
streptozotocin, increased γ -aminobutyric shunt activity and, R1225
Diabetes insipidus
DOCA-salt hypertension, vasopressin actions in, R138
nephrogenic, occurrence (chicken), F639
Diabetes mellitus
cardiovascular, fluid, and electrolyte status, R1279
2-deoxy-D-glucose infusion and, sympathetic nerve activity after, E714
dietary protein intake, glomerular eicosanoid production and, F711
endothelium-dependent dilatation during, cerebral arterioles, H621
glucose cycling, testing assumptions, E668
norepinephrine, vascular sensitivity to, H1134
osmoregulation in, blood glucose concentration effects, R597
Diacylglycerol
metabolism, aortic smooth muscle cells, C11
phosphate transport and, proximal tubules (fish), R850
signal transduction and, mesangial cells, F375
sodium-potassium-ATPase and, renal proximal tubule cells, F370
Diaphragm
developing, capillary and size interrelationships, C50
sphincteric action, relaxed lower esophageal sphincter, G139
Diastole
single, hyperemic response to coronary occlusion, awake state, H1645
ventricular distensibility, hypoxia-induced, ouabain effects, H681
Diastolic interaction gain, ventricular, measured with hemodynamic transients, H567
Dicarboxylic acid, metabolism, liver, G680

Diencephalic tissue, neuronal thermosensitivity, normotension and hypertension, R560
Diet: *see* Feeding
Difluoromethylornithine, epithelial proliferation and, G342
Digestive enzymes, CCK antagonists and, pancreatic secretion, G150
Digitalis, endogenous, search for, C937
Digitum longus, exterior, capillary and size interrelationships, C50
Dihomo- γ -linolenic acid, metabolism, mesangial cells, C101
3,4-Dihydroxybutanoic acid γ -lactone, endogenous, stereospecific feeding by, R366
Dihydroxyphenylalanine, sympathectomy and, muscle, E284
1,25-Dihydroxyvitamin D: *see* Vitamin D
4,4'-Diisothiocyanostilbene-2,2'-disulfonic acid, bicarbonate-secreting intercalated cells, kidney tubules, C1004
Diltiazem
acetylcholine and epinephrine interactions, repetitive activity in atrial fibers, H74
angiotensin II-induced vasoconstriction and, F1015
aortic pressure-diameter relations and, H1580
bacteremia and calcium uptake, skeletal muscle, R201
postischemic response to, diabetes effects, H1353
sugar transport and, skeletal muscle, R716
Dimethylsulfoxide, leukocyte adherence and, chemoattractant-induced, H594
4,4'-Dinitrostilbene-2,2'-disulfonic acid, blockade, colonic secretory chloride channels, C902
Diprenorphine
binding, submucosal neurons, G957
³H-labeled, small intestine, G966
3,3'-Dipropylthiadicarbocyanine, potassium chloride permeability, brush-border and basolateral membrane vesicles, F18
Dipyridamole
coronary microvascular resistance produced by, redistribution, H383
plasma adenosine and, C799
vasodilation, perfusate flow during, heart (guinea pig), H297
Dithiothreitol, hypoxia effects, H1595
Diuresis
ANF-induced, during pacing tachycardia, R1245
ANF infusion and, F780
ANF infusion, heart failure, H533
atrial peptides, renal function and, awake state, R284
pressure response, role of renal interstitial hydrostatic pressure in, F63
sympathetic nerve activity and, water immersion, awake state, R299
Diuretics
cyclic sodium and potassium excretion and, R510
loop, transport in the liver, G78
DOCA: *see* Deoxycorticosterone acetate
Docosahexaenoic acid, dietary, endothelium-dependent relaxations and, coronary artery (pig), H968

Dopamine
 cAMP production and, renal arterioles, H626
 cephalic phase insulin response and, E236
 regulation of sodium-potassium-ATPase and, proximal tubules, F57
 sympathectomy and, muscle, E284
 Dopamine β -hydroxylase, synthesis, adrenal cortical cells, C779
 DOPA: see Dihydroxyphenylalanine
 Dose-response relations, glucose and insulin, training and detraining effects, E588
 Downregulation, reversible, thiazide diuretic receptors, renal ischemia, F329
 Doxyl stearic acid, uncoupling of heart cells, C913
 Drinking
 angiotensin-induced, brain-stem mechanisms in, R264
 blood glucose concentration effects, diabetes, R597
 thirst, osmoregulation during estrous cycle (pig), R270
 Duodenum
 bicarbonate secretion, VIP antagonist effects, G833
 calcium transport, vitamin D₃ effects, G613
 length, glucose inhibition of gastric emptying and, G404
 smooth muscle contraction, neutral endopeptidase inhibitors and (ferret), G39
 ulcer, pathogenesis, G1058
 Dynorphin, cardiovascular effects, fetus (lamb), R1318

E

Echocardiography, cardiac output, pregnancy, H1060
 Ectonucleotidases, catabolism, coronary circulation, H1565
 Ectothermy, cell composition and, R63
 Edema
 acute burn, dermal imbibition pressure in, H940
 cerebral, sex differences, R830
 pulmonary
 arginine vasopressin and, infant (lamb), H641
 erythrocytes and liquid filtration, H515
 neurogenic, oxygen consumption and, E345
 protein kinase inhibitor and (guinea pig), H1012
 vascular permeability and resistance in, H1711
 EDRF: see Endothelium-derived relaxing factor
 Efferent nerves
 pelvic, activity, bladder, R1269
 renal sympathetic, nephrotic syndrome and, F823
 EGF: see Epidermal growth factor
 Eicosadienoic acid, brown fat, thermogenesis during arousal from hibernation (hamster), R146

Eicosanoids
 interactions, proximal colon, G673
 ovarian leukotrienes and, during ovulation, E753
 production, glomerular, dietary protein intake and, F711
 Eicosapentaenoic acid
 dietary, endothelium-dependent relaxations and, coronary artery (pig), H968
 metabolism, mesangial cells, C101
 Eicosatrienoic acid, brown fat, thermogenesis during arousal from hibernation (hamster), R146
 Elastin, arterial adaptation, reduced blood flow, H931
 Electrical activities, PAF release, ischemic-reperfused heart, H1236
 Electrocardiography, ventricular, cardiac function and (frog), S9
 Electrolytes
 absorption, cecum, G1090
 excretion, renal response, ANP effects, awake state, R284
 fluid and, balance, ANP effects, R1155
 homeostasis, amiloride effects, R510
 plasma atriopeptin and, during exercise, R1098
 status, diabetes mellitus, R1279
 transport
 cecum, RDEC-1 infection, G721
 colon, chronic metabolic acidosis effects, G1036
 Electromyocardiography, occlusion and reperfusion, coronary artery, H1719
 Electromyography, diaphragm, relaxed lower esophageal sphincter, G139
 Electron spin resonance probes, uncoupling, cardiac cells, C913
 Electrophysiology
 cardiac, hypoxia effects on atrioventricular node, adult and neonate, H1337
 cecum, G1090
 smooth muscle, gastrointestinal model of propagation, G265
 voltage-driven fluid secretion, hepatocyte couplets, G826
 Embolization, coronary collaterals, pressure-flow characteristics, H441
 Embryo
 heart
 downregulation of adenosine receptors (chicken), H321
 low-threshold calcium current (chick), H1505
 vascular adaptation and, adenosine role in (chick), H240
 Enalapril, chronic, low-sodium diet effects and, R523
 Endocytosis
 acetazolamide effects, bladder (turtle), F923
 membrane processing, charge effects, C304
 membrane recycling, epithelial cell function and, F1
 receptor-mediated, iron-deficient liver, G1022
 Endopeptidase, neutral inhibitors, substance P-induced contraction, gut smooth muscle (ferret), G39
 β -Endorphin
 glucose homeostasis and, awake state, E322

posttranslational processing (piglet), R429
 release, control by carotid baroreflex, R408
 Endothelial cells
 aortic, release of nitric oxide and endothelium-derived relaxing factor, H1030
 binding sites for endothelin, autoradiographic distribution in tissues, R858
 converting enzyme antigen synthesis, hypoxia effects (pig), C1231
 glomerular, regulation of growth (calf), C182
 hydraulic conductivity, endothelial monolayers, H1675
 monolayers, hydraulic conductivity, H1675
 prostacyclin and HETEs, regulation of synthesis, C1168
 pulmonary arterial and aortic, angiotensin receptors in, C987
 umbilical vein, transcobalamin II secretion, C296
 von Willebrand multimer accumulation, cryosupernatant and, H1635
 Endothelin
 binding sites for, autoradiographic distribution in tissues, R858
 central effects, blood pressure, awake state, H1747
 hemodynamic effects, awake state, H1742
 regional response to, hindquarter vascular bed, H598
 renal effects of, F1051
 vasoconstrictor injury and, stomach, G661
 Endothelium: see specific type
 Endothelium-dependent relaxation
 dietary fatty acids and, coronary artery (pig), H968
 femoral artery, heart failure effects, H962
 Endothelium-derived contracting factor, endothelin, stomach, G661
 Endothelium-derived relaxing factor
 basal, heterogeneity and, coronary arteries, H828
 ischemia, reperfusion and, renal, F894
 release
 aortic endothelial cells, H1030
 hypoxia stimulation of, H1595
 tumor necrosis factor effects, carotid arteries, H1509
 vasoconstriction and endothelial damage, stenotic arteries, H881
 Endothermy, cell composition and, R63
 Endotoxemia, alteration of fatty acid metabolism, liver, E31
 Endotoxin
 interleukin 1 release
 alveolar macrophages, C260
 alveolar macrophages and blood monocytes, C1012
 PAF-acether and, gastric motility changes, G275
 prostaglandin formation and, hypothalamus, R616
 Energy
 balance
 exercise-rest cycles and, R886
 prolactin stimulates food intake, R276

SUBJECT INDEX TO VOLUME 256

- basal metabolic requirements, heart, H846
- conservation, sleep changes during fasting (penguin), R476
- expenditure
 - adipose tissue, age, fat cell weight, and obesity effects, E467
 - body fat mass and percent fat effects, E573
 - during carbohydrate overfeeding, obesity and, E357
 - single-sample doubly labeled water method, R572
 - stress ulcer formation, R403
- metabolism
 - diabetic skeletal muscle, E129
 - muscle, anoxia and recovery (fish), R922
 - muscle fiber types (snake), C1176
- Enkephalin
 - cardiac output and blood flow, awake state, H1651
 - osmotic release of vasopressin, attenuation of, E270
- Enkephalinase, gut smooth muscle contraction, neutral endopeptidase inhibitors and (ferret), G39
- Enteric nerves
 - eicosanoid responses and, proximal colon, G673
 - excitatory and inhibitory, calcitonin gene-related peptide action (guinea pig), G546
 - ileal, epithelial responses to secretagogues, G919
 - neuromodulation, intestinal transport, suckling, R481
- Enteric nervous system
 - ascending reflex pathways (guinea pig), G540
 - calcitonin gene-related peptide action (guinea pig), G546
 - functional innervation of electrical pacemakers, proximal colon, C466
 - substance P effects, different experimental states, G997
- Enterocytes
 - basolateral membranes
 - calbindin stimulation of calcium pump, G124
 - calcium transport, 1,25-dihydroxyvitamin D₃ effects, G613
 - distribution of absorbed lipids, phosphatidylcholine effects and, G349
 - jejunum, ANF binding sites, G436
 - metabolites, quantitation, NMR spectroscopy (chicken), G423
 - spermidine uptake, G905
- Enuresis, vasopressin and urinary output, abnormal diurnal rhythm with, F664
- Environment, low-sodium, adaptation in diluting segments and (salamander), F229
- Enzymes: *see also* specific enzyme
 - myocardial, coronary artery occlusion, H508
 - shifts, single muscle fiber shifts, hindlimb, C1081
- Epidermal growth factor
 - absorption, renal proximal tubules, E55
 - content, gastrointestinal tract, G856
 - ornithine decarboxylase and, small intestine, G624
 - prepro-, hybridization, kidney, F632
 - responses to, inner medullary collecting duct, F1117
 - sodium transport and, cortical collecting tubule, F803
- Epidermis, differentiating compartments of, cell subpopulations within, C977
- Epinephrine
 - acetylcholine interactions, repetitive activity in atrial fibers, H74
 - adrenal and sympathetic, exercise and, R155
 - arginine vasopressin secretion and, developmental changes (sheep), E406
 - exercise-induced changes, R169
 - glucagon-like immunoreactivity and, hypoglycemia, intestine, E431
 - long-term hypoxemia, fetal responses to (sheep), R1340
 - oxygen consumption and, myocardial respiration, H265
 - physiological responses to, underfeeding effects, lean women, R583
 - plasminogen activator release and, hindlegs, H404
 - renin control and, dietary sodium deprivation, E863
 - responses to, tissue adrenergic receptors and, E600
- Epithelial cells
 - alveolar, tight monolayers of, C688
 - colonic, apical and basolateral adenosine in, C197
 - digestive, proliferation, bombesin ingestion and, suckling, G328
 - function, membrane recycling and, F1
 - lung, apical sodium channel in (frog), C764
 - mucus-secreting colonic, VIP receptors in, G443
 - pigmented ciliary, electrogenic sodium-ascorbate cotransport, C44
 - tracheal, potassium-dependent sodium-chloride cotransport, C658
- Epitrochlearis muscle, insulin-stimulated glucose transport, after exercise, E494
- Epoxyeicosatrienoic acids, growth hormone release and, somatotrophs, E221
- Erythrocytes
 - calcium pump, intracellular free calcium effects, C1138
 - chloride-dependent potassium flux, activation by cAMP (pig), C772
 - cooling effects, sodium permeation and (guinea pig, squirrel), R49
 - dapsone-induced anemia, potassium-chloride cotransport, C265
 - ghosts, resealed, potassium transport in, C81
 - glucose levels, hematocrit effects (seal), R1220
 - hydrogen peroxide levels and, myocardial injury, H584
 - liquid filtration and, injured lungs, H515
 - microcirculation, oxygen exchange, muscle (hamster), H247
 - pH regulation, sodium-hydrogen exchange and (trout), C728
 - potassium-chloride transport system, chloride effects on, C994
 - potassium transport, volume-sensitive, C1214
 - pure population, chloride-dependent potassium transport and regulatory volume decrease in, C858
 - sickle, autooxidation, dehydration, and adhesivity of, C579
 - sodium-calcium exchange in (ferret), C390
 - transit, brain, indicator diffusion technique, H794
 - water diffusion measurements, NMR, C1097
- Erythropoietin
 - long-term hypoxemia
 - fetal responses to (sheep), R1340
 - maternal responses to (sheep), R1340
 - production
 - exhypoxic polycythemia, C925
 - regulation, proximal tubular function and, F942
- Esophageal sphincter
 - lower
 - adrenergic contractions, neuropeptide Y and, G589
 - inhibition through gastric nerves (opossum), G198
 - sphincteric action of diaphragm, G139
- Esophagus
 - distension, sphincteric action of diaphragm, G139
 - neuromedin B receptors, G747
- Estradiol, obesity and, insulin secretion and removal (sheep), E116
- Estradiol-17 β , local and systemic, uterine and systemic vasodilation and (sheep), E536
- Estrogen, ovarian, absence of, prolactin stimulation of food intake, R701
- Estrous cycle, vasopressin secretion and thirst during, osmoregulation of (pig), R270
- Ethacizin, inhibition of calcium currents, cardiac cells (frog), C549
- Ethanol
 - amino acid transport and, basolateral liver plasma membrane vesicles, G458
 - hydrogen peroxide generation and, kidney, F158
 - injury, stomach, prostaglandin effects (guinea pig), G704
 - intracranial, water temperature selection and (goldfish), R133
 - leucine uptake and, hepatocytes, fetal, G384
 - transplacental diffusion, umbilical blood flow effects (sheep), H813
- Ethmozin, inhibition of calcium currents, cardiac cells (frog), C549
- Ethylene glycol-bis(β -aminoethyl ether)-N,N,N',N'-tetraacetic acid, proton and calcium association constants, temperature and ionic strength, C1250
- N-Ethylmaleimide
 - chloride and potassium transport, erythrocytes, C994
 - potassium transport, erythrocyte ghosts, C81
 - regulatory volume decrease, red cells, C858
- Eukaryotic initiation factor 2
 - protein synthesis
 - amino acid deprivation and, hepatocytes, C18
 - cell-free system, hepatocytes, C28

Euthyroid, ANP release and, heart atria, E64

Exercise

- branched-chain 2-oxo acid dehydrogenase and, E186
 - calcium affinity, cardiac sarcolemma, C638
 - cardiac autonomic activity before and after, modulation of, H132
 - catecholamines, sympathoadrenal, R155
 - changes induced by, catecholamines, glucose, and FFA, R169
 - chronic, diet-induced insulin resistance and, E242
 - coronary flow during, after α -adrenergic blockade, H1148
 - endurance, muscle mechanics and locomotor performance (salamander), R1200
 - glucose, FFA, and insulin levels, sympathoadrenal influences on, R161
 - glucose transport and, skeletal muscle, E227
 - glucose transporter changes and, muscle, E580
 - hormonal and metabolic responses to, ventromedial hypothalamic regulation of, R1019
 - hyperkalemia, monophasic action potential recordings, H956
 - insulin receptor binding, kinase activity and, skeletal muscle, E138
 - insulin-stimulated glucose transport after, muscle, E494
 - iron deficiency and, muscle oxidases and liver enzyme changes, E401
 - ischemia induced by, cumulative deterioration of myocardial function, H1462
 - muscle contraction, posterior hypothalamic neurons stimulation, R348
 - muscular work, carbohydrate metabolism during, E500
 - physical activity, effects on calcium and phosphorus metabolism, E1
 - physical training, insulin resistance and, aging, E352
 - plasma atriopeptin during, β -blockade and, R1098
 - recovery after, fuel metabolism, E167
 - rest cycles, energy balance and, R886
 - sympathetic activity, muscle ischemia and, H105
 - training
 - capillary tortuosity in soleus muscle, H1110
 - cold exposure and, regional blood flow, R1069
 - training and detraining, glucose and insulin secretion dose-response relations, E588
- # Exocytosis
- acetazolamide effects, bladder (turtle), F923
 - membrane recycling, epithelial cell function and, F1
- # Extracellular matrix, soluble components, type II pneumocytes, C621

F

Faculty survey, lectures in medical physiology, teaching effectiveness analysis plan, S3

Fastigial nucleus, cardiovascular response, ventrolateral medullary lesions and, H1200

Fasting

- EGF content and, gastrointestinal tract, G856
 - glucose and fat metabolism, intrauterine growth retardation, newborn, E380
 - glucose turnover and (fish), R612
 - hypoglycemia during, insulin, glucagon, and catecholamines in prevention of, E651
 - lipoprotein lipase, myocytes and endothelium, heart, E818
 - maternal starvation, glucose utilization in fetus and, E699
 - membrane adaptation, renal brush border, F852
 - sleep changes during (penguin), R476
- # Fat
- body
 - effects on metabolic rate and thermogenesis, E573
 - from body density, E829
 - dietary, plasma secretin, CCK, and pancreatic secretion in response to, G1016
 - metabolism, fasting, intrauterine growth retardation, newborn, E380

Fatty acids

- brown fat, thermogenesis during arousal from hibernation (hamster), R146
- dietary
 - endothelium-dependent relaxations and, coronary artery (pig), H968
 - intestinal uptake and, G178
 - essential, decreased prostacyclin and, kidney, F843
- free
 - exercise-induced changes, R169
 - fasting effects (fish), R612
 - hypoxia-induced injury, proximal tubule cells, F688
 - lactate gluconeogenesis in non-insulin-dependent diabetes, E732
 - oxidative fuel metabolism during mild hypoglycemia, E413
 - sympathoadrenal influences on, exercise, R161
 - uncoupling effect of (duckling), R1192
- medium-chain, glucose production and, low birth weight newborns, E692
- membrane, cell composition and, R63
- metabolism
 - liver, altered in endotoxemia, E31
 - mesangial cells, C101
 - ventricular function and, neonate (piglet), H9
- myocardial ischemic injury and, H1192
- unesterified, 0000

Feedback

- contraction-excitation, volume load, heart, H1697
- papillary isotonic, adaptive approach (ferret, rabbit), H1726
- regulation, CCK-releasing peptide and, pancreatic secretion, G430
- tubuloglomerular
 - arterial pressure and, loop of Henle, F421
 - chloride concentration, distal, F1007

Feeding

- anorexigenic treatments, gastric motility and, R955

- body and heart composition, T₃ plus atenolol treatment, E459
- bombesin effects, brain stem, R590
- brown fat, prolactin and (hamster), R174
- carbohydrate, disposition of glucose load and, E811
- CCK-8-induced satiety, gastric mediation of, R56
- CCK role in, R646
- continuous, maternal protein metabolism and fetal growth, E852
- diet
 - insulin resistance induced by, exercise effects, E242
 - low-salt, aberrant baroreceptor mechanotransduction, H446
 - pancreatic digestive enzyme gene expression, G733
- dietary fat, plasma secretin, CCK, and pancreatic secretion in response to, G1016
- dietary hormone modification, intestinal function (fish), E610
- dietary obesity, weight cycling and, R1209
- dietary protein intake, glomerular eicosanoid production and, F711
- dietary restrictions, increased γ -aminobutyric shunt activity and, R1225
- dietary sodium
 - deprivation, adrenergic control of renin and, awake state, E863
 - intake, changes in, hormonal responses to, R1171
- EGF content and, gastrointestinal tract, G856
- energy balance, exercise-rest cycles and, R886
- fasting and, glucose turnover (fish), R612
- fatty acid saturated diet, nutrient uptake and, intestine, G178
- fish oil diet, prostacyclin and, kidney, F843
- food deprivation
 - macronutrient intake, nocturnal pattern, R541
 - regulation by nocturnal hypothermia (pigeon), R733
- force, area postrema following, R939
- free, macronutrient intake, nocturnal pattern, R541
- fructose, very low-density lipoprotein-triglyceride catabolism and, E559
- galactose, glomerular hyperperfusion and, F994
- gastric acid secretion and, bombesin effects, R181
- gastric emptying and
 - CCK and lithium chloride effects, R463
 - intraventricular CCK inhibition (barboon), R1313
- histamine modulation of, hypothalamus, R605
- hypothalamic obesity, CRF and, R751
- ingestion, taste effects on, postabsorptive glucose and, R1142
- lipoprivic, capsaicin effects, R1232
- low-sodium diet
 - chronic converting enzyme inhibition effects, R523, R531
 - platelet α_2 -adrenergic receptors and, E339

- overfeeding, carbohydrates, energy expenditure during, E357
 parabrachial lesions, area postrema over-ingestion and, R306
 prolactin stimulation of, absence of ovarian progesterone, R701
 refeeding, insulin increase in lipoprotein lipase activity and, brown fat, E645
 regulation, central action of acidic fibroblast growth, R217
 restriction, carbohydrate effects on cardiac myosin isoenzyme, R976
 satiety and, plasma CCK level effects, R1148
 serotonergic function, CCK-induced anorexia and, R1138
 short-term, caloric regulation during, R518
 stereospecific, endogenous organic acid, R366
 stimulation of food intake, prolactin and, R276
 thermic effect of, body fat mass and percent fat effects, E573
 underfeeding, responses to epinephrine and, lean women, R583
- Femoral artery**
 endothelium-dependent responses, heart failure effects, H962
 vitamin E deficiency effects, vascular function, H1539
- Fentanyl**, carotid sinus baroreflex control and, circulation, R625
- Ferritin**, membrane processing, charge effects, C304
- Fertility**, vitamin D deficiency and, female, E483
- Fetus: see also** Lactation; Placenta;
 Pregnancy
 arginine vasopressin secretion, developmental changes in adrenergic regulation (sheep), E406
 cardiac output, microsphere determination (sheep), H302
 cardiovascular response to asphyxia
 endogenous opioids and (sheep), R1063
 vasopressin mediation of (sheep), R1011
 dynorphin and vasopressin, cardiovascular effects of (lamb), R1318
 glucose oxidation, insulin and glucose effects (sheep), E704
 glucose utilization, maternal starvation and acute hyperketonemia, E699
 glycogenesis induction, liver, E49
 growth, continuous feeding and, E852
 immature, cerebral blood flow, oxygenation, and carbohydrate secretion (sheep), R1264
 isoproterenol-stimulated renin secretion, renal cortex (sheep), R1258
 leucine uptake, hepatocytes, ethanol effects, G384
 lymph flow, thoracic duct (sheep), H16
 response, acute hypoxemia (sheep), H613
 responses to long-term hypoxemia (sheep), R1348
 slow hemorrhage, blood volume restoration after (sheep), R1040
 thyroid hormone effects, ontogeny and (sheep), E543
 umbilical blood flow, transplacental diffusion of ethanol and oxygen (sheep), H813
 working heart, palmitate oxidation (pig), E315
- Fever**
 acute-phase response and, induced by interleukin 1 and tumor necrosis factor, R35
 hyperinsulinemia, central IL-1 elicited, R772
 indomethacin-induced, V₁ receptor effects, R1164
 interleukin 1 β , E7
 corticotropin-releasing factor and, E111
 prostaglandin formation and, hypothalamus, R616
- FFA: see** Fatty acids, free
- Fibrin**, degradation, lung, γ -thrombin and (sheep), H1690
- Fibrinogen**, absorption, peritoneal cavity, E447
- Fibroblasts**
 acidic growth, central action in feeding regulation, R217
 jejunum, ANF binding sites, G436
 lung
 sulfate transport in, pH and anion effects, C486
 T lymphocyte adherence to, immune mediators and, C336
 membrane potential in, influx of L-arginine as indicator of, C930
- Fibroblast growth factor**
 myogenic differentiation, C701
 phosphatidylinositol degradation and, vascular smooth muscle cells, C886
- Fibroblast-like cells**, 3T3-C2, angiotensinogen gene expression in, C448
- Fibrosis**, pulmonary, immune mediators and, C336
- Filtration**
 glomerular
 cyclosporine nephrotoxicity and, F71
 dehydration, awake and unrestrained (bird), R836
 hyperchloremia and thromboxane, F152
 low-sodium diet and chronic CEI effects, R523
 pregnancy with renal hypertension, F728
 preservation during renal hypoperfusion, F314
 regulation, ultrafiltration coefficient and, F505
 renal perfusion pressure effects, F165
 thromboxane receptor sites, F1111
- Fish oil**, dietary, prostacyclin and, kidney, F843
- Flecainide**, inhibition of calcium currents, cardiac cells (frog), C549
- Flow**
 coronary, hydrodynamic force effects, H1532
 pulmonary venous, diastolic interaction gain, H567
 viscous, gravity effects on circulation to head (giraffe), R567
- Flowmetry**, laser-Doppler, cerebral microcirculation, H1247, H1255
- Fluid**
 absorption, ANF effects, cortical collecting duct, F179
- cerebrospinal: see** Cerebrospinal fluid dynamics, thoracic duct, fetus (sheep), H16
 extracellular volume, early stage experimental cirrhosis, liver, F497
 systemic homeostatic
 dehydration and (cattle), R809
 rehydration and (cattle), R816
 α -Fluoromethylhistidine, modulation of feeding behavior, hypothalamus, R605
- Force-frequency relations**, calcium and sodium, ion-selective microelectrode assessment, ventricles, C813
- Forebrain**, hexokinase activity, renal denervation effects, neurogenic hypertension, R930
- Forskolin**
 activation, chloride channels, skin (frog), C1239
 β -adrenoceptors, heart valve leaflets, H821
 cytosolic free calcium and, somatotropes, E375
 dopamine-stimulated cAMP production and, renal arterioles, H626
 enzyme-dissociated myenteric ganglia (guinea pig), G233
 inhibition of sodium current, heart (guinea pig), C1131
 phosphate transport and, proximal tubules (fish), R850
 regulation of sodium-dependent phosphate transport, osteoblast-like cells, E93
- Fructose**
 feeding, lipoprotein-triglyceride catabolism and, E559
 metabolism, liver, ³¹P-NMR of, G949
 saccharide-activated pathway and, lingual epithelium, R394
- Fructose 2,6-bisphosphate**, glycolysis and, wounded skeletal muscle, E788
- Fuel**
 metabolism, early postexercise recovery, E167
 oxidative metabolism, mild hypoglycemia, E413
- Fumarate hydratase**, metabolic fiber types, muscle (snake), C1176
- Fura-2**
 calcium transient measurements, vascular smooth muscle, C951
 cytosolic free calcium concentration, cardiac myocytes, C1120
- Furosemide**
 chloride ion transport and, intestine (flounder), G166
 dependence, taurine transport, kidney, F646
 inhibition of sodium-potassium-ATPase activity, thick ascending limb, F549
 magnesium transport and, thick ascending limb, F197
- G**
- Galactose**
 feeding, glomerular hyperperfusion and, F994
 indocyanine green and, changes in hepatic blood volume, G524
- Galanin**
 inhibitory functions, pylorus, G789

 insulin release and, pancreas, E619
 release, during pancreatic nerve stimulation, islet function and, E191
 Galanin-immunoreactive nerves, enteric, distribution and function, G884
 GAL-IR: see Galanin-immunoreactive nerves
 Gallamine trithiodide, striated muscle, external anal sphincter, G773
 Gallbladder
 chemical stimulation, coronary vascular responses, H735
 cholecystokinin and acetylcholine, calcium sources utilized by, G785
 epithelium
 electrogenic bicarbonate secretion (guinea pig), C736
 pH effects on basolateral membrane ion conductances (mudpuppy), C1184
 Ganglia, myenteric, enzyme-dissociated, acetylcholine release from (guinea pig), G233
 Ganglion, filtering, efferent pelvic nerve activity and, bladder, R1269
 Gas, exchange, peripheral, capillary tortuosity in soleus muscle, H1110
 Gastric acid secretion
 bombesin effects, R181
 calcitonin gene-related peptide effects, G145
 carbonic anhydrase II gene expression, G631
 CRF effects, G412
 CRF-induced inhibition of, G214
 parietal cell mass and, G975
 parietal cells, G129, G356
 somatostatin linkage, stomach, G418
 Gastric antrum, intrinsic nerves, VIP-PHI and galanin effects, G789
 Gastric cells, intracellular pH, carbon dioxide effects, G466
 Gastric chief cells, prostaglandin protection of (guinea pig), G704
 Gastric distension, hypothalamic CCK and, R248
 Gastric emptying
 bombesin effects, R181
 CCK-8-induced satiety, R56
 feeding and, intraventricular CCK inhibition (baboon), R1313
 inhibition
 CCK and lithium chloride, R463
 glucose, intestine length and, G404
 Gastric glands
 80-kDa phosphoprotein, parietal cell stimulation and, G1070
 parietal cells, chloride conductance in, G299
 Gastric lumen
 secretion, feedback regulation of, CCK and, G430
 serotonin release, TRH injection effects, G377
 Gastric mucosa
 adherence, RDEC-1 infection effects, G721
 explants, mucus secretion, secretagogue action, G739
 histamine release, β -adrenergic inhibition of, mast cells, G727
 injury, endothelin and, G661
 integrity, central neurotensin and, G226
 intracellular pH in, carbon dioxide partial pressure effects (frog), G206
 parietal cell, secretagogue-responsive, G254
 protein kinase C, secretory activity in parietal cells, G129
 resistance to acid, G31
 Gastric mucosal cells, prostaglandin E_2 production, oxygen metabolite effects, G925
 Gastric nerves, intrinsic, inhibition of lower esophageal sphincter (opossum), G198
 Gastrin
 CCK and, ornithine decarboxylase activity, pancreatic cell line, G846
 CCK-8-induced satiety and, R56
 gene expression, gastric parietal cells, G631
 ornithine decarboxylase and, small intestine, G624
 parietal cells, gastric mucosa, G254
 receptors: see Receptors
 SAT activity, pentagastrin induction, G16
 Gastrin-releasing peptides, neuromedin B receptor, esophagus, G747
 Gastroenterology, developmental, epithelial digestive cell proliferation, G328
 Gastrointestinal hormones
 control, pylorus and gastric muscle, G862
 exocrine pancreas, model, G817
 Gastrointestinal tract
 adrenergic contractions, neuropeptide Y and, G589
 EGF content, age and feeding effects, G856
 fat of milk calcium, sucklings, G1063
 Gene expression
 angiotensinogen, 3T3-L1 cells, C448
 pancreatic digestive enzymes, CCK and SBTI effects on, G733
 RNA isolation, skeletal muscle, C1092
 Gentamicin
 hydrogen peroxide generation and, kidney, F158
 phospholipid metabolism and, proximal tubular cells, C204
 Geometry, tissue, initiation of cardiac action potential, H391
 GH: see Growth hormone
 Gill, vessels, ANF effects (fish), R10
 Glomerulosclerosis, dietary protein restriction, renal injury and, F224
 Glucagon
 ANP and renal failure, acute pancreatitis, F211
 desensitization to ADH and, kidney, F656
 glucoregulatory function, thyroid hormones, E101
 higher aortic pressure effects, heart, C1257
 hyperinsulinemia, central II-1 elicited, R772
 immunoreactivity, gut, response to hypoglycemia, E431
 prevention of hypoglycemia, during fasting, E651
 stimulation of oxygen uptake, liver, G369
 treatment, chronic, hyperthermia (duckling), R1192
 urinary acidification, acid-base balance and, F973
 ventromedial hypothalamus, response to exercise, R1019
 Glucocorticoids
 ACTH secretion and, pituitary effects, E145
 control of secretion, vasopressin and angiotensin II, R339
 diabetes and, insulin receptor function, skeletal muscle, E39
 hormonal and sodium effects, kidney, F1027
 inhibition of sulfate transport, renal brush-border membrane (chick), R1176
 liver treated with, gluconeogenesis in (chicken), R907
 production, adrenal, vasopressin effects, E566
 receptors: see Receptors
 regulation, proinsulin mRNA, E303
 role of, dexamethasone-induced hypertension, E682
 Glucocorticosteroid hormone, lectin gene expression regulation and, lung, C501
 Glucokinase, CCK-8 effects, pancreatic islets, E68
 Gluconeogenesis
 carbohydrate metabolism, proximal tubules, C532
 early postexercise recovery, E167
 from lactate, non-insulin-dependent diabetes, E732
 glycogenolysis and, during glucose counterregulation, E844
 hepatic, exercise-induced fall during muscular work, E500
 iron deficiency, muscle oxidases and liver enzymes with recovery from, E401
 liver, dexamethasone-treated (chicken), R907
 luminal perfusion effects, proximal tubule, F120
 Glucoregulation
 diabetes, phlorizin-induced normoglycemia, E277
 during fasting, E651
 thyroid hormone function, role of pancreatic hormones, E101
 Glucose
 blood
 homeostasis, exercise metabolism, R1019
 osmoregulation and, diabetes mellitus, R597
 clamp, postreceptor defect in insulin action, E624
 counterregulation
 contributions of gluconeogenesis and glycogenolysis, E844
 growth hormone role in, E835
 disposal, impairment by triglycerides, E747
 exercise-induced changes, R169
 futile cycling, testing assumptions, E668
 glucose oxidation and, fetal (sheep), E704
 homeostasis, β -endorphin central effects, awake state, E322
 inhibition of gastric emptying, intestine length and, G404
 insulin release stimulated by, galanin effects, E619
 intravenous, minimal model analysis of tolerance, E524

SUBJECT INDEX TO VOLUME 256

- level, whole blood, hematocrit effects (seal), R1220
- load, disposition, high-carbohydrate diet and, E811
- metabolism
 - adrenergic receptors and responses to epinephrine, E600
 - β -cell, E172
 - cerebral physiology and, immature fetus (sheep), R1264
 - during fasting, brain, PET, E805

 pulmonary edema and (guinea pig), H1012
- Hydrogen-potassium-ATPase
 chloride conductance and, parietal cells, G299
 80-kDa phosphoprotein and, apical membrane, gastric parietal cells, G1082
 parietal cells, gastric mucosa, G254
- Hydrogen-potassium exchange, ouabain-sensitive mechanism, apical membrane, colon (guinea pig), G979
- Hydroquinone, endothelium-associated, microcirculatory vasodilation and, skeletal muscle, H720
- (S)-5-Hydroxy-6-*trans*-8,11,14-*cis*-eicosatetraenoic acid: see 5-HETE
- β -Hydroxyacylcoenzyme A dehydrogenase, metabolic fiber types, muscle (snake), C1176
- β -Hydroxybutyrate, fatty acid metabolism, endotoxin and, liver, E31
- 18-Hydroxycorticosterone, potassium-induced aldosterone biosynthesis, zona glomerulosa cells, E475
- 6-Hydroxydopamine, sympathectomy, myocardial ischemia and, H1322
- 15-Hydroxyeicosatetraenoic acid, synthesis, regulation, endothelial cells, C1168
- Hydroxyl radical, acetylcholine and, dilation of cerebral arterioles, H665
- Hydroxyverapamil, calcium sources and, gallbladder muscle, G785
- Hypercalcemia
 1,25-dihydroxyvitamin D_3 biosynthesis and, E309
 human PTH extraction and, liver, E87
 magnesium transport and, thick ascending limb, F197
- Hypercapnia
 bicarbonate reabsorption, kidney, newborn, F29
 blood flow and, cerebral, H697
 calcium efflux and, live bone, F836
 ketoacid production, F437
 proximal acidification in, F414
 sodium-independent bicarbonate absorption, proximal tubules, F577
- Hyperchloremia, intrarenal vasoconstriction during, F152
- Hypercortisolemia, insulin receptor function and, skeletal muscle, E39
- Hyperemia
 bile-oleate-induced, capsaicin-sensitive nerves and, G476
 postprandial, renal hemodynamics and amino acid infusion, F516
- reactive
 coronary artery, H906
 coronary reserve in stunned myocardium, H1303
 single diastole, awake state, H1645
- Hyperglycemia
 basolateral membrane, jejunum, G878
 glucose production and, preceding diabetes (monkey), E676
- Hyperinsulinemia
 central IL-1 elicited, R772
 glucose transport and, intestine, G911
 ovarian steroids and obesity effects (sheep), E116
- Hyperkalemia, graded, monophasic action potential recordings, H956
- Hyperketonemia, glucose utilization in response to, fetus, E699
- Hypermagnesemia, magnesium transport and, thick ascending limb, F197
- Hypernatremia
 acute, ion and volume regulation during, brain, F1059
 renal inner medullary, choline dehydrogenase activity and, F107
- Hyperosmolality, volume regulation, proximal tubule, F622
- Hyperoxemia, oxygen flux density, coronary capillaries, H375
- Hyperoxia, whole body autoregulation during, awake state, H1023
- Hyperparathyroidism
 phospholipid content and, brain synaptosomes, F705
 secondary, vitamin D deficiency and, E765
- Hyperplasia
 differentiation and, after partial pneumonectomy, C515
 membrane potential, aortic smooth muscle cells, C644
- Hyperpolarization
 density-dependent, aortic smooth muscle cells, C644
 insulin-induced, skeletal muscle, C368
- Hyperprolactinemia, photoperiod-induced changes and, brown fat (hamster), R174
- Hypertension
 ACTH-induced, R1308
 ANP and natriuresis during, awake state, R1044
 artery relaxation in, potassium-induced, H707
 cardiovascular response to, vasopressin mediation of, fetus (sheep), R1011
 central catecholamines and, preoptic recess lesions, R487
 chronic, rapid baroreceptor resetting and, H1228
- coarctation
 attenuated microvascular alterations, H213
 low-sodium diet, CEI effects, R523
 dexamethasone-induced, RU 486 role in, E682
- DOCA, pressor responses to vasopressin (pig, sheep), H101
- DOCA-salt, age-dependent, vasopressin in, R138
- endogenous digitalis, C937
- endothelin effects, renal, F1051
- genetic, low-salt diet and, H446
- membrane potential, aortic smooth muscle cells, C644
- microvascular rarefaction in, model (hamster), H126
- narcolepsy, sleep-waking cycles and cataplexy, H111
- neurogenic, forebrain hexokinase activity, renal denervation in, R930
- pressor response, vasoconstrictor agents, R98
- pulmonary, monocrotaline-induced, right ventricular performance after, H1328
- renal
 interstitial pressure and pressure diuresis, F63
 neurogenic mechanism control of heart rate, R231
 pregnancy with, glomerular dynamics and salt balance in, F728
- renovascular
 calcium-dependent autoregulation, H1139
 synthetic ANP and, H1393
 reversal of, vascular capacitance and, H502
- spontaneous
 neuronal thermosensitivity in, R560
- renal injury and, dietary protein restriction, F224
- sodium regulation of angiotensinogen and, renal, F469
- subfornal organ, enalapril effects on angiotensin II receptors, H1609
- weight cycling and dietary obesity effects, R1209
- Hyperthermia, chronic glucagon-treated, loose-coupled mitochondria in (duckling), R1192
- Hyperthyroidism
 ANP release and, heart atria, E64
 glucose and insulin metabolism, liver, E159
- Hypertonic medium, isolated proximal tubules in, volume regulation determinants, F622
- Hyperviscosity, dextran-induced, regional blood flow and hemodynamics, H898
- Hypobicarbonatemia, calcium efflux and, live bone, F836
- Hypocalcemia, human PTH extraction and, liver, E87
- Hypocapnia
 blood flow and, cerebral, H697
 ketoacid production, F437
 proximal acidification in, F414
- Hypoglycemia
 cerebral blood flow, glucose use and, newborn, H1659
 cerebral metabolism, carbon dioxide responsiveness and, H697

2-deoxy-D-glucose infusion and, sympathetic nerve activity after, E714
 during fasting, insulin, glucagon, and catecholamines in prevention of, E651
 glucagon-like immunoreactivity, gut, E431
 gluconeogenesis, counterregulation and, E844
 growth hormone, role in glucose counter-regulation, E835
 insulin-induced, glucoregulation in diabetes, E277
 oxidative fuel metabolism and, free fatty acid role in, E413
 Hypogonadism, idiopathic hypogonadotropic, LH secretion and interpulse interval relations, E510
 Hypoinsulinemia, glucose transport and, intestine, G911
 Hyponatremia
 increased morbidity, females, sex differences, R880
 pH and buffering and, brain, F113
 Hypoperfusion, renal, glomerular filtration rate preservation during, F314
 Hypophosphatemia, elevated calcium ion effects, 1,25(OH)₂D₃, F285
 Hypoproteinemia, thoracic duct lymph and (sheep), R867
 Hypotension
 arousal response to, sinoaortic denervation and, newborn (lamb), H434
 reflex responses to, sinoaortic denervation attenuation of, fetus (sheep), R1103
 Hypothalamic nucleus, anterior, preoptic recess lesions, hypertension and catecholamines after, R487
 Hypothalamo-neurohypophyseal complex, vasopressin release, calmodulin and, E516
 Hypothalamus
 CCK, release, nutrient and volume loading effects, R248
 control of glycemia, after stress, E231
 H₁-receptor in, histamine modulation of feeding behavior, R605
 hyperinsulinemia, central IL-1 elicited, R772
 lateral area, fibroblast growth in feeding regulation, R217
 neuronal thermosensitivity, normotension and hypertension, R560
 paraventricular nucleus, sympathetic outflow and, R1325
 posterior neurons, muscle contraction effects, R348
 prostaglandin formation, fever and, R616
 temperature, response of thalamic neurons, R1293
 vasopressin and oxytocin release, afferent renal nerve effects, R1240
 ventromedial, regulation of responses to exercise, R1019
 Hypothermia
 heart, coronary autoregulation and metabolism (rat, squirrel), R357
 nocturnal, regulated by food deprivation (pigeon), R733
 sodium permeation and, red cells (guinea pig, ground squirrel), R49
 Hypothyroid
 ANP release and, heart atria, E64

catecholamine stimulation of 5'-deiodinase, brown adipocytes, E74
 Hypoventilation, transcendental meditation and, R632
 Hypovolemia, regional hemodynamic changes following, awake state, R1076
 Hypoxemia
 acute, fetus at 0.6-0.7 gestation (sheep), H613
 cardiovascular response to, vasopressin mediation of, fetus (sheep), R1011
 long-term
 fetal responses to (sheep), R1348
 maternal responses to (sheep), R1340
 oxygen flux density, coronary capillaries, H375
 Hypoxia
 β -adrenergic receptor regulation during, heart cells (chick), H275
 aldosterone secretion and, adrenocortical cells (cow), E640
 alveolar, ANF release and, awake state (lamb), H990
 atrioventricular node and, heart, adult and neonate, H1337
 carbohydrate metabolism, proximal tubules, C532
 cardiac metabolism, impaired, potassium loss during, H1165
 EDRF release and, H1595
 fast sympathetic rhythms, cerebral ischemia, R120
 glucose transport and, muscle, polymyxin B effects, E662
 hypocapnic, cervical sympathectomy and cerebral microvascular responses, H460
 injury induced by, proximal tubule cells, free fatty acids in, F688
 long-term, fetal responses to (sheep), R1348
 ouabain effects, myocardial function, H681
 polycythemia, erythropoietin production, C925
 β -receptor-adenylate cyclase coupling during, hypoxic ventricular myocytes, neonate, H1209
 regional blood flow during, adrenal, H94
 reperfusion, postischemic microvascular injury, H315
 severe, regional venous outflow, H162
 stimulation, converting enzyme antigen synthesis, endothelial cells (pig), C1231
 substrates and, smooth muscle metabolism and contraction, C719
 whole body autoregulation during, awake state, H1023

I

Idazoxan, coronary flow after, during exercise, H1148
 Ileum
 distribution of opioid receptors, implications for function, G966
 epithelial responses, secretagogues, G919
 D-glucose and L-leucine transport, G618
 β -lactoglobulin transport, G943
 migrating myoelectric complex (bird), G598
 smooth muscle contraction, neutral endopeptidase inhibitors and (ferret), G39

IL-1: see Interleukin 1
 Immersion, sympathetic nerve activity and natriuresis during, awake state, R299
 Immunoglobulin A, absorption, peritoneal cavity, E447
 Immunoglobulin G, absorption, peritoneal cavity, E447
 Immunoreactivity
 bombesin and nutrients, CCK release and, G989
 CGRP inhibition, gastric and pancreatic secretion, G715
 glucagon-like, gut, response to hypoglycemia, E431
 Impedance
 input
 arterial system, H1684
 simulated arterial systems, H1087
 Indicator-diffusion technique, transport kinetics, brain, H794
 Indicator-dilution technique, PAH transport, kidney, F255
 Indocyanine green, galactose and, changes in hepatic blood volume, G524
 Indo-1 fluorescence, detection of lanthanum influx, ventricular cells (chick), C351
 Indomethacin
 action on muscarinic responses, cecum, G100
 cerebral microcirculation, laser-Doppler assessment, H1247
 diabetes, glomerular hyperperfusion, sorbinil effects, F1000
 hyperchloremia and, intrarenal vasoconstriction, F152
 ovarian leukotrienes and, during ovulation, E753
 PAF-acether and, circulation, newborn (piglet), H205
 proteinuria and, nephrotic humans, F44
 sodium-potassium-ATPase activity and, cortical collecting tubule, F570
 Infant: see also Neonate; Newborn
 arginine vasopressin, cardiovascular effects (lamb), H641
 choroid plexus, potassium transport in, R703
 low-birth-weight, fate of milk calcium, GI tract, G1063
 Infarction
 myocardial
 attenuated response to ANP, H533
 cell-to-cell interaction, H1266
 chronic whole-body sympathectomy effects, H1322
 myosin isoenzymes and ATPase activity after, H745
 subendocardial, left ventricle, H859
 Ingestion: see Feeding
 Inosine, effects, pial arterioles, H603
 Inositol
 dehydration and ADH effects, inner medulla, F916
 HPLC, renal medulla, F954
 lipid turnover, trachealis smooth muscle, C375
 regulation, inner medullary tubules, F128
 transport
 intestinal basolateral membrane (fish), G509
 intestinal brush-border membrane vesicles (fish), G501

Insulin

absorption, renal proximal tubules, E55
 action
 during lactation (goat), E295
 femoral adipocytes, E179
 postreceptor defect, streptozotocin-induced diabetes, E624
 amylase secretion and, pancreas, G897
 cachectin, concurrent administration, toxic effects and, E725
 cell proliferation and, white adipose tissue, C190
 degradation, products from, kidney, E208
 2-deoxy-D-glucose infusion and, sympathetic nerve activity after, E714
 dynamics, hepatocytes, pubescence-related changes, E780
 EGF effects, sodium transport, cortical collecting tubule, F803
 exercise-induced changes, R169
 exercise-induced fall in, during muscular work, E500
 glucoregulatory function, thyroid hormones, E101
 glucose oxidation and, fetal (sheep), E704
 glucose transport and
 intestinal, G911
 muscle, polymyxin B effects, E662
 skeletal muscle, E227
 glucose transport stimulated by, muscle, after exercise, E494
 hyperinsulinemia, central IL-1 elicited, R772
 hyperpolarization induced by, skeletal muscle, C368
 hypersecretion, CNS effects, obesity, E439
 induction of glycogenesis, liver, fetus, E49
 leucine metabolism and, aging humans, E288
 levels, sympathoadrenal influences on, exercise, R161
 lipoprotein lipase activity increase and, brown fat, E645
 metabolism, hepatic, in hyperthyroidism, E159
 non-insulin-dependent diabetes, myocardial mechanical defects and, E25
 obesity, obesity resistance and, R766
 overnight glucose production and, from lactate, non-insulin-dependent diabetes, E732
 oxidative fuel metabolism and, free fatty acid role in, E413
 potassium-stimulated release, galanin effects, E619
 prevention of hypoglycemia, during fasting, E651
 proinsulin mRNA, glucocorticoid regulation of, E303
 receptors: see Receptors
 release, glucose-responsive, calcium channels of, E488
 resistance
 diet-induced, chronic exercise effects, E242
 physical training effects, aging and, E352
 response, cephalic phase, hypothalamic monoamines associated with, E236
 secretion
 obesity and ovarian steroid effects (sheep), E116

pancreatic islets, interleukin 1 stimulation of, E19
 training and detraining effects, E588
 sensitivity, preceding diabetes, hepatic glucose production and (monkey), E676
 sleep disturbances and, genetic obesity, R281
 stereospecific feeding, endogenous organic acid, R366
 stress immobilization, genetic obesity, 435
 TPA interaction with, sodium transport and, skin (frog), C569
 ventromedial hypothalamus, response to exercise, R1019
 Insulin-like growth factor
 myogenic differentiation and, C701
 sodium transport and, cortical collecting tubule, F803
 Insulinoma, glucose-responsive, calcium channels of, E488
 Interleukin 1
 central administration, hyperinsulinemia and, R772
 natriuretic effect, micropuncture localization of, F810
 prostaglandin formation and, hypothalamus, R616
 release
 alveolar macrophages and blood monocytes, C1012
 smoking effects, alveolar macrophages, C260
 stimulation, islet insulin secretion and phosphoinositide hydrolysis, E19
 T lymphocyte adherence and, lung fibroblasts, C336
 tumor necrosis factor and, fever and acute-phase response induced by, R35
 Interleukin 1 α , cachectin and, cachexia induced by, redistribution of body proteins, R659
 Interleukin 1 β
 pyrogenic and thermogenic effects of, E7
 corticotropin-releasing factor and, E111
 Interleukin 2, T lymphocyte adherence and, lung fibroblasts, C336
 Intermolecular forces, osmosis, R801
 Interstitial matrix, hyaluronan, lymphatic elimination in sepsis (sheep), H1524
 Intestine
 absorbed lipids, intraenterocyte distribution, G349
 absorption
 physical activity effects, E1
 villous structure and, G188
 basolateral membrane, inositol transport (fish), G501
 biotin transport, regulation of, G306
 brush-border membrane vesicles, inositol transport (fish), G501
 CCK, plasma (pig), G53
 chloride ion flux (flounder), G166
 developing, cholera toxin and, G220
 epithelial responses, secretagogues, G919
 function, dietary hormone modification (fish), E610
 glucagon-like immunoreactivity, response to hypoglycemia, E431
 glucose transport, insulin modulation of, G911
 glutamine metabolism, basolateral, E550

intrinsic nerves, galanin and VIP comparison, G884
 β -lactoglobulin transport, G943
 length, glucose inhibition of gastric emptying and, G404
 motility: See Motility
 mucin secretion, *Yersinia enterocolitica* effects, G319
 nutrient uptake, saturated fatty acid diet effects, G178
 oxygenation, hemodilution effects, H171
 secretion, kinin mediation of, G1
 smooth muscle, *Clostridium difficile* toxins, G759, G767
 sodium-phosphate cotransport, identification, G645
 transport, neuromodulation of, suckling, R481
 villus cells, basolateral impalement of (fish), C1022
 Intestine, large, ion transport, immunologic regulation, G396
 Intestine, small
 acetylcholine release, enzyme-dissociated myenteric ganglia (guinea pig), G233
 ANF binding sites, G436
 ascending enteric reflex pathways (guinea pig), G540
 circular muscle, calcitonin gene-related peptide action (guinea pig), G546
 distribution of opioid receptors, implications for function, G966
 ornithine decarboxylase in, G624
 pancreatic intrinsic factor, identification, G517
 zinc absorption, G87
 Intrauterine growth retardation, newborn, fasting glucose and fat metabolism alterations, E380
 Iodoantipyrine
 autoradiography, duodenal ulcer, G1058
 cerebrovascular transport, indicator diffusion technique, H794
 Iodocyanopindolol
 binding, adrenoceptors in pericytes and microvessels, R224
 ¹²⁵I-labeled, β -adrenergic receptors and, renal, F532
 β -receptor identification, tracheal gland cells, C310
 Ion, permeabilities, cystic fibrosis airway epithelia, C1054
 Ionomycin
 chloride secretory responses and, T84 cells, C1224
 cytosolic free magnesium indicator, C540
 stress and cross-bridge phosphorylation, vascular smooth muscle (swine), C96
 Ionophore A23187
 4-bromo-, chloride secretory responses and, T84 cells, C1224
 calcium pump and, red cells, C1138
 chloride ion transport and, intestine (flounder), G166
 chloride secretion, cystic fibrosis airway epithelia, C226
 release, aortic endothelial cells, H1030
 Ions
 transport
 cecum, G1090
 colonic, immunologic regulation, G396
 intestinal, ANF and VIP effects (flounder), C142
 pH effects, gallbladder epithelium (mudpuppy), C1184

salt gland (duck), R1184
tracheal and alveolar epithelium in submersion culture, F397

Iron
deficiency, muscle oxidase and liver enzymes changes from, E401
postischemic microvascular injury and, skeletal muscle, H1472
uptake, iron-deficient liver, G1022

Ischemia
adenosine turnover, blood plasma, C799
 β -adrenergic receptor regulation during, heart cells (chick), H275
arrhythmias induced by, heart rate and, H21
cardiac, PAF release from, H1236
cerebral
fast sympathetic rhythms in, R120
free radical scavengers in, H589
coronary, capillarity and vascular resistance after, H982
epithelial polarity following, F430
exercise-induced, cumulative deterioration of myocardial function, H1462
muscle, sympathetic outflow to resting muscles during, H105
myocardial
adenosine formation, propranolol prevention of (guinea pig), H772
cellular potassium loss and anion efflux during, H1165
chronic whole body sympathectomy effects, H1322
function after, neutrophil depletion effects, H341
hemodynamic response to carotid occlusion, H672
nonischemic thickening and, anesthesia, H1417
 α -tocopherol effects, H1192
regional, anti-free radical agents and, H1344

renal
downregulation of thiazide diuretic receptors, F329
endothelium-dependent vascular relaxation and, F894
fish oil diet and prostacyclin decrease, F843
5'-nucleotidase and, F298
perfusion and, endothelium-dependent vascular relaxation and, F894
superoxide radical, protection of calcium pump (pig), C666

Isoproterenol
blood pressure levels and, R70
cell sorting, kidney cells, F742
chloride secretion, cystic fibrosis airway epithelia, C226
inhibition of sodium current, heart (guinea pig), C1131
nonuniformity, left ventricular relaxation and, H222
placental blood flow and, fetus (sheep), R1056
 β -receptor-adenylate cyclase coupling, hypoxic ventricular myocytes, neonate, H1209
renin secretion stimulated by, renal cortex (sheep), R1258
sodium-hydrogen exchange and pH regulation, red blood cells (trout), C728

Isotope
stable
single-sample doubly labeled water method, R572

whole body and forearm, measurement using [^3H]phenylalanine model, E631

J

Jejunum
ANF binding sites, G436
basolateral membrane, rapid regulation of D-glucose transport, G878
blood-facing membranes, glutamine transport across, E550
D-glucose and L-leucine transport, G618
glucose transport, insulin modulation of, G911
length, glucose inhibition of gastric emptying and, G404
microsphere entrapment in, time-related changes, G451
microvillus membrane, development of, G931
sucrase expression, thyroxine and cortisone effects, sucklings, G604
transport, neuromodulation of, suckling, R481
villous structure, distension effects, G188
villus column, carbohydrase stimulation of, G158

Junction, gastroesophageal, intrinsic reflexes (opossum), G198

K

Kallikrein, bradykinin receptors and, kidney, ureter, and bladder, F909
Keratinocytes, subpopulations, differentiating compartments of epidermis, C977
Ketoacid, production, acidosis and alkalosis, F437
Ketogenesis
adrenergic receptors, responses to epinephrine and, E600
physiological responses to norepinephrine, underfeeding effects, lean women, R583
 α -Ketoglutarate dehydrogenase, ammoniogenesis, renal pathways, F187
7-Ketolithocholic acid, reduction, liver enzyme preparations, G67
Ketone bodies, glucose metabolism, during fasting, brain, PET, E805

Kidney
 β -adrenergic receptors, reserpine regulation of, F532
ammonia metabolism, metabolic acidosis effects, F321
ANG formation, renin release, and hemodynamics, angiotensinogen role in, F719
arterioles, vasopressin and, F274
bicarbonate handling, transport and histochemical studies (alligator), F239
bicarbonate reabsorption, newborn, F29
bradykinin receptors, localization by autoradiography, F909
brush-border membrane, sodium-inorganic phosphate transport across, F852
brush-border membrane vesicles
anion dependence of taurine transport, F646
organic anion exchange, F596
cells: see Kidney cells, and the specific cell

collecting duct
hydrogen secretion, electrophysiology of, F79
membrane recycling and epithelial cell function, F1
sodium-potassium-ATPase activities in, F218
cortical collecting duct
principal cells, dietary potassium effects, F387
ultrastructure (salamander), C849
cortex: see Kidney cortex
cystine and lysine reabsorption, F901
denervation
forebrain hexokinase activity and, neurogenic hypertension, R930
nephrotic syndrome and, F823
endothelin effects, F1051
epithelium, PAH transport, indicator-dilution kinetics, F255

failure
ANP and, acute pancreatitis, F211
epithelial polarity and, F430
hemoglobinuric, pathogenetic mechanisms, F446
mechanisms of colonic potassium secretion, F490
postischemic, vasa recta blood flow and, F456
PTH and, effects on phospholipid content of brain synaptosomes, F705

function
dehydration, awake and unrestrained (bird), R836
prostaglandins and renin effects, low cardiac output and, H1079
glomerular pressure, determinants of, F421
glomerulus: see Kidney glomerulus
hemodynamics
amino acid infusion and, F516
ANF infusion, F780
cyclosporine nephrotoxicity and, F71
hypertension: see Hypertension, renal hypoperfusion, glomerular filtration rate preservation during, F314
injury, dietary protein restriction and, F224
inner medullary collecting duct, potassium transport, C823
insufficiency, bicarbonate transport in collecting tubules, F680
insulin degradation, products from, E208
interstitial hydrostatic pressure, perfusion pressure effects, F165
ischemia: see Ischemia
medulla: see Kidney medulla
mesangial cells, platelet-activating factor metabolism by, F735
metabolism
oxidized ascorbic acid, F52
volume regulation determinants, F622
natriuretic effect of interleukin 1, micro-puncture localization of, F810
neuropeptide Y actions (monkey), F524
OK cells, regulatory volume decrease (opossum), C252
papilla: see Kidney papilla
plasminogen activation, regulation of, F787
postischemic injury, neutrophil and leukotriene mediation, F794
prepro-epidermal growth factor mRNA, in situ hybridization of, F632
prostacyclin, fish oil diet effects, F843

Kidney (*continued*)

- response to volume expansion, ANP effects, R284
- sodium and potassium excretion, diurnal cyclic, amiloride effects, R510
- sodium regulation of angiotensinogen mRNA, spontaneous hypertension, F469
- structure, concentrating ability and (bird), R501
- sympathetic outflow, activation by intracisternal hypertonic sodium chloride, H411
- TEA transport, proximal tubule and membrane vesicles, F290
- thick ascending limb
 - control of magnesium transport, F197
 - desensitization to ADH, F656
 - sodium-potassium-ATPase activity, furosemide inhibition of, F549
- transport, membrane processing, charge effects, C304
- transport systems, organic cations, F540
- venous pressure, sodium excretion effects, F776
- Kidney cells
 - cortical collecting duct, potassium activity, F136
 - cultured
 - medullary thick ascending loop, C1070
 - regulatory volume decrease (opossum), C252
 - differentiated properties, rocking effects (pig), C1064
 - distal convoluted tubule, structural studies, F814
 - endothelial, prostanoid biosynthesis, F266
 - medullary, aldose reductase induction, high external sodium chloride and, C614
 - medullary collecting duct, ANP-sensitive guanylate cyclase, F766
 - papillary, responses to EGF, F1117
 - phosphoinositide turnover, adenosine-sensitive, F1067
 - proximal tubular, gentamicin effects on phospholipid metabolism, C204
 - proximal tubule
 - hypoxia-induced injury, free fatty acids in, F688
 - regulation of sodium-potassium-ATPase by protein kinase C, F370
 - sorting, fluorescence activated, F742
- Kidney cortex
 - β -adrenergic receptors, reserpine regulation of, F532
 - collecting duct
 - cell sorting of kidney cells, F742
 - vasopressin actions, F556
 - epithelial cells, ammoniogenesis by, F187
 - generation of hydrogen peroxide, F158
 - renin secretion, isoproterenol-stimulated (sheep), R1258
- Kidney glomerulus
 - ANF-dependent cGMP production in, leukotriene D₄ effects, F95
 - angiotensin II actions, during reduced renal artery pressure, F1021
 - barrier function, indomethacin and proteinuria, F44
 - cation binding, convection-binding mechanism, F882
 - dynamics, salt balance and, pregnancy with renal hypertension, F728

- generation of hydrogen peroxide, F158
- hyperperfusion
 - galactose feeding and, F994
 - sorbinil prevention of, diabetes and, F1000
- mesangial cells, GTP-binding protein, phospholipase C, and PGE₂ synthesis relations, F171
- platelet-activating factor metabolism by, F735
- response to platelet-activating factor, thromboxane A₂ and, F35
- thromboxane, receptor sites, F1111
- Kidney medulla
 - collecting, independence of urea and water transport, F610
 - collecting duct, potassium transport, C823
 - inner
 - choline dehydrogenase activity, F107
 - sodium-potassium-ATPase activities in, F218
 - inner collecting duct
 - apical and basolateral membrane conductances of, F862
 - responses to EGF, F1117
 - localization of sodium channels, F366
 - major organic solutes of, high-performance liquid chromatography, F954
 - organic osmolytes in, ADH and dehydration effects, F916
 - pressure diuresis response, interstitial hydrostatic pressure role in, F63
 - structure, concentrating ability and (bird), R501
 - thick ascending loop, cells in culture from, C1070
- Kidney papilla, postischemic, vasa recta blood flow and, F456
- Kidney tubules
 - ANF effects, sodium chloride and fluid absorption, F179
 - collecting
 - bicarbonate transport in, remnant kidney, F680
 - ultrastructure (salamander), C849
 - cortical
 - proton compartmentation in, F986
 - β -receptors, reserpine regulation of, F532
 - cortical collecting
 - apical membrane, low-conductance potassium channels, F136
 - BCECF measurement of intracellular pH, F957
 - bicarbonate-secreting intercalated cells, C1004
 - chloride-dependent potassium flux, F697
 - chloride transport on potassium secretion, F306
 - EGF effects on sodium transport, F803
 - neuropeptide Y inhibition of vasopressin, F408
 - potassium adaptation, F279
 - principal cells, potassium activity, F136
 - sodium-potassium-ATPase activity, indomethacin effects, F570
 - vasopressin effects on prostaglandin E₂, F1044
 - cortical distal, flow dependence of potassium secretion, F932

- cytosolic calcium, alterations induced by vasopressin and purines, C967
- distal, ischemia, thiazide receptors and, F329
- distal convoluted
 - basolateral membrane, potassium channel currents in, F246
 - prepro-EGF in situ hybridization, F632
- inner medullary, regulation of organic osmolyte concentrations, F128
- loading, with furosemide, sodium-potassium-ATPase in, thick ascending limb, F549
- microdissected segments, aldose reductase activities, F563
- necrosis, neutrophil and leukotriene mediation of, F794
- neurotensin handling in, micropuncture and HPLC technique, F100
- organic anion secretion, facilitation by serum albumin, F475
- pressure diuresis response, interstitial hydrostatic pressure role in, F63
- proximal
 - acidification, hypercapnia and hypocapnia, F414
 - aldosterone escape and, R86
 - basolateral membrane hydrogen-hydroxy-bicarbonate transport, F751
 - carbohydrate metabolism, C532
 - chronic metabolic acidosis, ammonia entry and, F1104
 - control of phosphate transport (fish), R850
 - depolarization-induced alkalization (salamander), F342, F354
 - developing, correlation of structure and function, F13
 - dysfunction, epithelial polarity and, F430
 - epidermal growth factor and insulin absorption, E55
 - gentamicin effects on phospholipid metabolism, C204
 - glucose production, F120
 - localization of sodium channels, F366
 - lumen pH effects on cell pH and potential, F1075
 - luminal hydrogen and basolateral bicarbonate transport, F335
 - monitoring net sodium flux, cell suspensions, C1105
 - natriuretic effect of interleukin 1, micropuncture localization of, F810
 - regulation of erythropoietin production and, F942
 - sodium-independent bicarbonate absorption, F577
 - sodium-potassium-ATPase activity, F57
 - volume regulation determinants, F622
- thick ascending limb, sodium-potassium-ATPase activity, furosemide and, F549
- transport threshold, cystine and lysine reabsorption, F901
- Kinase, activity, exercise effects, skeletal muscle, E138
- Kininogen, bradykinin receptors and, kidney, ureter, and bladder, F909
- Kinins, intestinal secretion and, G1
- Kynurenate, sympathetic nerve discharge and, R722

L

Lactate
aerobic production, smooth muscle metabolism and contraction, C719
cardiac metabolism, impaired, potassium loss during, H1165
gluconeogenesis from, non-insulin-dependent diabetes, E732
hemoglobin effects, critical oxygen transport (lamb), H527
metabolism
cerebral physiology and, immature fetus (sheep), R1264
hepatic, exercise-induced fall during muscular work, E500
turnover, measurement, E336
Lactate dehydrogenase
metabolic fiber types, muscle (snake), C1176
release, ethanol injury and, stomach (guinea pig), G704
Lactation: see also Fetus; Placenta; Pregnancy
food intake, prolactin stimulation of, R276
insulin action during (goat), E295
prolactin stimulation of feeding, absence of ovarian progesterone, R701
 β -Lactoglobulin, transport, ileal, G943
Laminin, matrix-derived soluble components and, type II pneumocytes, C621
Lanthanum, influx, detection by indo-1 fluorescence, ventricular cells (chick), C351
Laryngeal nerve, superior, swallowing reflex, R822
Lateral reticular nucleus, somatic pressor reflex, R448
Lectin
gene expression, lung, regulation of, C501
PTH-induced cAMP production and, E80
Leiomyosarcomas, gastric smooth muscle, CCK structural analysis, G1005
Length-dependent relations, unloaded contraction, heart muscle, H1289
Length-tension relations
intracellular calcium and, tracheal smooth muscle, C807
striated muscle, external anal sphincter, G773
vascular smooth muscle, single arterioles (hamster), H630
Leucine
interaction with lysine, intestinal transport (hen), G532
metabolism, insulin and substrate effects, E288
protein turnover, whole-body and forearm, measurement using [^3H]phenylalanine model, E631
uptake
ethanol effects, hepatocytes, fetal, G384
gentamicin effects, proximal tubular cells, C204
L-Leucine, transport, intestinal brush-border membrane vesicles, G618
Leukocytes
chemoattractant-induced adherence, dimethylsulfoxide prevention of, H594

coronary capillarity, vascular resistance and, H982
margination and deformation, mesenteric venules, H1667
microcirculation and, artificially perfused lungs, H1117
shunting, tenuissimus muscle, H85
Leukotrienes
mediation, postischemic renal injury, F794
ovarian, hormonally induced ovulation and, E753
smooth muscle cell line and, airway, C329
Leukotriene D_4 , ANF-dependent cGMP production and, glomerulus, F95
LH: see Luteinizing hormone
Lidocaine, sarcolemmal fluidity and, cardiomyocytes, H422
Light, bright morning, sleep homeostasis and, R106
Lingual epithelium, saccharide-activated pathway, R394
Lipids
absorbed, intraenterocyte distribution, G349
bilayers, thermodynamics of water movement, C694, C699
brush border, aging and, F85
dietary, intestinal uptake, G178
dynamics, gastric and duodenal apical membrane vesicles, G553
metabolism
liver, altered in endotoxemia, E31
ventricular function and, neonate (piglet), H9
permeability: *see* Permeability
peroxidation, vitamin E deficiency effects, H1539
transfer, liposomes to cells, C522
Lipolysis
adrenergic receptors, responses to epinephrine and, E600
intercellular adenosine concentration, subcutaneous tissue, E250
oxidative fuel metabolism, mild hypoglycemia, E413
physiological responses to norepinephrine, underfeeding effects, lean women, R583
Lipopolysaccharide, lung injury, neutrophil-induced, H751
Lipoprotein, high-density, adipose tissue metabolism and, reduced-obese state, E740
 β -Lipoprotein, posttranslational processing (piglet), R429
Lipoprotein lipase
activity, refeeding and insulin effects, brown fat, E645
distribution, myocytes and capillary endothelium, heart, E818
Lipoprotein-triglycerides, very low-density, impaired catabolism, fructose feeding and, E559
Liposomes, phosphatidic acid transfer from, collision dependence, C522
Lipoxins, cerebral arteriole dilation and, newborn (pig), H468
Lipoxygenase
metabolism, mesangial cells, C101
synthesis, regulation, endothelial cells, C1168

Lithium
aldosterone escape, proximal tubular response, R96
substitution for sodium, pituitary cells, C712
Lithium chloride, CCK and, inhibition of gastric emptying, R463
Liver
amino acid transport, ethanol effects, G458
bile acid-independent bile flow, role of glutathione in, G22
blood volume, galactose and indocyanine green uptake, G524
carbohydrate metabolism, exercise-induced fall during muscular work, E500
cells: *see* Hepatocytes
cell-free system, initiation of protein synthesis in, C28
dexamethasone-treated, gluconeogenesis in (chicken), R907
dicarboxylic acid metabolism, G680
early stage experimental cirrhosis, interstitial dynamics in, F497
enzyme preparations, reduction of 7-ketolithocholic acid in, G67
enzymes, reciprocal changes from iron deficiency, E401
fatty acid metabolism, alteration in endotoxemia, E31
fructose metabolism, ^{31}P -NMR of, G949
glucose and insulin metabolism, hyperthyroidism, E159
glucose production
counterregulation, E844
preceding diabetes (monkey), E676
glucose uptake, high-carbohydrate diet and, E811
glucose utilization, fetus, E699
glutathione efflux, determinants of, G482
glycogenesis, fetal, E49
G protein, β -adrenergic action and, C384
handling of tracer norepinephrine, G107
human PTH extraction, calcium concentration effects, E87
insulin secretion and removal, obesity and ovarian steroid effects (sheep), E116
inward-rectifying potassium channels, G1028
iron-deficient, uptake of transferrin and iron in, G1022
loop diuretic transport in, G78
oxygen uptake, stimulation by glucagon, G369
postabsorptive glucose, sensory control of food intake and, R1142
protease inhibitor genes, functional response to inflammation, C413
purine nucleotide degradation, AMP and IMP dephosphorylation, E386
pyruvate dehydrogenase activity, sepsis effects, E445
retrograde perfusion, increased sinusoidal volume and solute extraction, G1041
sexual dimorphism, adult gonadectomy and, E392
voltage-driven fluid secretion, hepatocyte couplets, G826
LLC-PK₁ cells
adaptation, inorganic phosphate deprivation, C322

- LLC-PK₁ cells (*continued*)
 alterations in cytosolic calcium, vasopressin- and purine-induced, C967
 calcitonin gene-related peptide, antagonist for CGRP receptors, E331
 differentiated properties, rocking effects (pig), C1064
- Loading, osmotic, vasopressin secretion and thirst during estrous cycle (pig), R270
- Locomotion, muscle mechanics and (salamander), R1200
- Loop diuretics, cornea epithelium and (bullfrog), C750
- Lung
 ANTU-injured, vascular permeability and resistance in, H1711
 artificially perfused, microcirculation in, leukocyte effects, H1117
 epithelial cells
 apical sodium channel in (frog), C764
 tight monolayers of, C688
 fibroblasts, sulfate transport in, pH and anion effects, C486
 fluid balance, arginine vasopressin effects, infant (lamb), H641
 growth, compensatory, after partial pneumonectomy, C515
 injury, neutrophil-induced, H751
 lectin gene expression, developmental regulation and dexamethasone, C501
 microvascular pressure, hematocrit effects, H766
 transvascular protein transport, γ -thrombin-induced (sheep), H1690
 tumor, 1,25-dihydroxyvitamin D₃ biosynthesis and, E309
 vascular injury, erythrocytes and liquid filtration, H515
- Luteinizing hormone
 cAMP and, granulosa cells, C368
 endogenous bioactive, secretory bursts, E199
 secretion, interpulse interval of GnRH stimulation, E510
- Lymph
 drainage, cardiovascular function and thoracic duct lymph (sheep), R867
 flow, measurement, thoracic duct, fetus (sheep), H16
 Lymphoblasts, soluble purine nucleoside 5'-phosphomonoesterases, E386
 Lymphocytes, sodium-hydrogen antiport, chloride-bicarbonate exchange and, C428
- Lysine
 interaction with leucine, intestinal transport (hen), G532
 reabsorption, kidney, F901
- M**
- α_1 -Macroglobulin, absorption, peritoneal cavity, E447
 α_2 -Macroglobulin, synthesis, adrenal cortical cells, C779
 Macronutrients, intake, nocturnal patterns, R541
 Macrophages
 alveolar
 interleukin 1 release and smoking, C260
 interleukin 1 release by, C1012
 superoxide production, kinetic model, C405
 glycolysis, wounded skeletal muscle, E788
- Macula densa, prepro-epidermal growth factor mRNA, in situ hybridization of, F632
- Magnesium
 cytosolic, calcium channel activity and, ventricular cells, C452
 cytosolic free, fluorescent indicator for measuring, C540
 permeability, brush-border and basolateral membrane vesicles, F18
 reperfusion and, ischemic heart, NMR assessment, H195
 transport, control of, thick ascending limb, F197
- Magnesium ions, interactions, calcium-stimulated ATPase activity, gill (eel), R313
- Malate dehydrogenase, metabolic fiber types, muscle (snake), C1176
- Maltase-glucoamylase, stimulation, villus site of fasted jejunum, G158
- Mannitol
 blood-brain barrier disruption, R443
 hypertonic stress and, liver, G563
- Mast cells
 fundic mucosal, β -adrenergic and prostanoic inhibition, G727
 peritoneal, secretagogue-induced currents, C560
- Matrigel, matrix-derived soluble components and, type II pneumocytes, C621
- Maturation: *see also* Development; Growth changes in oxygenation and blood flow with, cerebral, R78
 fiber types, capillary and area changes, C50
 proximal tubules, correlation of structure and function, F13
 sexual, insulin dynamics and, hepatocytes, E780
- MDCK cells
 5-HETE uptake in, C1
 potassium channel activation, extracellular ATP, C1016
- MDP: *see* Methylene diphosphonate
- Medulla
 midline, trigeminal depressor response and, R1111
 reticular formation, coronary vasoconstrictor site in, H1218
- Medulla oblongata, solitary, response to ANF microinjection, R577
- Melanocyte-stimulating hormone, adrenalectomy and, genetic obesity, R494
- Melatonin
 bright morning light, sleep homeostasis and, R106
 rhythms, thermal sensitivity of (reptile), R1160
- Membrane
 apical
 airway, calcium-induced chloride secretion, C226
 cortical collecting tubule, potassium channels in, F143
 cystic fibrosis, cellular chloride transport, C1045
 electrogenic bicarbonate secretion, gallbladder (guinea pig), C736
 gastric and duodenal, proton permeability of, G553
 inner medullary collecting duct, F862
 intracellular chloride activity and cellular pathways, C1033
 80-kDa phosphoprotein localization, gastric parietal cells, G1082
 ouabain-sensitive hydrogen-potassium exchange, colon (guinea pig), G979
 sodium channel, lung epithelial cells (frog), C764
 basement, type II cell-extracellular matrix interactions, C627
 basolateral: *see* Basolateral membrane
 blood-facing, glutamine transport, jejunum, E550
 brachial plasma, calcium-stimulated ATPase activity, gill (eel), R313
 cell, maturation, proximal tubule, F13
 microvilli, jejunum, development of, G931
 recycling, epithelial cell function and, F1
 Mercaptoacetate, lipoprivic and glucoprivic feeding, R1232
- Mesangial cells
 eicosapentaenoic and dihomo- γ -linolenic acid metabolism, C101
- glomerular
 GTP-binding protein, phospholipase C, and PGE₂ synthesis relations, F171
 regulation of growth (calf), C182
 platelet-activating factor metabolism by, F735
 signal transduction of, phospholipids in, F375
- Mesenteric arteries
 hemostatic plug formation, trigramin inhibition of, H1038
 vitamin E deficiency effects, vascular function, H1539
- Mesenteric nerves, tonic influences of rostral medulla and, R323
- Mesenteric veins, diameter, reflex control of, H1066
- Mesenteric venules, leukocyte margination and deformation, H1667
- Metabolic rate
 aminophylline, R1274
 basal, carbohydrate overfeeding and, obesity, E357
 resting, β -adrenergic blockade and, R653
 thermogenesis and, body fat mass effects, E573
 transcendental meditation and, R632
- Metabolic responses, exercise, ventromedial hypothalamic regulation of, R1019
- Metallothionein, liver, dibutyl cAMP effects, E420
- Metergoline, anorexia induced by, serotonergic function and, R1138
- Methotrexate
 mannitol and, blood-brain barrier disruption, R443
 renal tubular secretion, facilitation by serum albumin, F475
- Methylene blue, rhythm and membrane potential, proximal colon, G779
- Methylene diphosphonate, ^{99m}Tc-labeled, bone uptake of, multiple tracer studies, H1261
- 3-O-Methylglucose
 insulin-stimulated, muscle, after exercise, E494
 potassium transport pathways, inner medullary collecting duct, C823

SUBJECT INDEX TO VOLUME 256

- transport, diltiazem effects, skeletal muscle, R716
 - 4-Methylumbelliferone, cell pH measurement, acetazolamide effects, bladder (turtle), F923
 - Methylxanthine, metabolic effects, R1274
 - Metoprolol, modulation, blood pressure and heart rate, R1127
 - Microcirculation: *see also* Blood flow; Circulation
 - adenosine role in, embryo (chick), H240
 - angiotensin II-induced vasoconstriction, calcium antagonists and, F1015
 - cell-to-cell communication, arterioles (hamster), H838
 - cerebral
 - diabetes mellitus effects, H621
 - laser-Doppler assessment, H1247, H1255
 - vasodilator response to acetylcholine, arachidonate effects, H665
 - coronary microvascular resistance, redistribution by dipyrindamole, H383
 - cutaneous, rate-sensitivity of myogenic response, wing (bat), H32
 - intestinal, dimethylsulfoxide and, H594
 - leukocyte effects, artificially perfused lungs, H1117
 - oxygen exchange in, retractor muscle (hamster), H247
 - oxygen loss, arterioles, H921
 - prostaglandin release, agonist-specific role of sodium-hydrogen antiport, C831
 - pulmonary, hematocrit effects, H766
 - raised intraocular pressure, oxygen partial pressure response to, H1627
 - single arterioles, length-tension relations in (hamster), H630
 - skeletal muscle
 - coarctation hypertension and, H213
 - endothelium-associates vasodilators and, H720
 - rate-sensitivity of myogenic response, wing (bat), H32
 - Microdensitometry, puterized, ANF binding sites, jejunum, G436
 - Microdialysis, intercellular adenosine concentration, subcutaneous tissue, E250
 - Microelectrodes, ion-selective, calcium and sodium assessed by, ventricles, C813
 - Microflora, polyamines derived from, obstruction-induced colonic mucosal hypertrophy, G1049
 - Microhematocrit, leukocyte margination and deformation, H1667
 - Microiontophoresis, Lucifer yellow, eccrine sweat gland, C478
 - Microneurography
 - sympathetic nerve activity, changes induced by 2-deoxy-D-glucose infusion, E714
 - sympathetic outflow, resting muscles, during muscle ischemia, H105
 - Micropuncture
 - distal convoluted tubule cells and, F814
 - Henle's loop, determinants of glomerular pressure, F421
 - localization, *na* riuretic effect of interleukin 1, F810
 - Microscopy
 - electron
 - blood-brain barrier disruption with mannitol, R443
 - freeze-fracture, distal nephron (salamander), C849
 - fluorescence, calcium concentration, myocytes, C1120
 - light and electron, ANF binding sites, jejunum, G436
 - perfusion apparatus for, C214
 - transmission electron, choroid plexus, infant, R786
 - Microspectrofluorometry, measurement of intracellular pH, cortical collecting tubule, F957
 - Microspheres
 - entrapment, jejunum, time-related changes, G451
 - radiolabeled
 - cerebral physiology, immature fetus (sheep), R1264
 - coronary microvascular resistance, H383
 - fetal response to acute hypoxemia (sheep), H613
 - hCGRP effects on gastric acid secretion and blood flow, G145
 - intracardiac shunts (turtle), R240
 - simulated using microspheres (sheep), H302
 - tracer-labeled, flow distribution during vasodilation (guinea pig), H297
 - Microvascular injury, postischemic, hypoxic reperfusion, H315
 - Microvasculature, postischemic coronary capillarity, vascular resistance and, H982
 - Microvessels, adrenoceptors in, R224
 - Migrating motor complex, postprandial, modulation by sleep, G851
 - Migrating myoelectric complex, small intestine (bird), G598
 - Milk
 - calcium, fate in GI tract of sucklings, G1063
 - EGF content, age and feeding effects, G856
 - Mineral, bone, ion microprobe analysis, E152
 - Mineralocorticoids
 - chloride-dependent potassium flux, cortical collecting tubule, F697
 - modulation of angiotensin II binding sites, neuronal cultures, C121
 - noncarrier, volume-sensitive potassium transport, erythrocytes, C1214
 - potassium activity and, cortical collecting duct principal cells, F136
 - potassium channels and, apical membrane of cortical collecting tubule, F143
 - Minoxidil, volume load and hypertrophy, cardiac, H876
 - Mitral valve
 - autoradiographic characterization, heart valve leaflets, H821
 - regurgitation, left ventricular function and, H974
 - Models
 - analysis of tolerance, intravenous glucose, E524
 - arterial system, H1684
 - binding/transport, convection-binding mechanism, F882
 - bright morning light, sleep homeostasis and, R106
 - compartmental
 - blood flow estimation, myocardial rubidium kinetics, H1156
 - dibutyl cAMP effects on zinc metabolism, E420
 - well-mixed, brain transport kinetics, H794
 - computer
 - low-frequency oscillations, H1573
 - ultrafiltration coefficient and glomerular filtration, F505
 - exocrine pancreas heterogeneity, G817
 - galactose and indocyanine green uptake, hepatic blood volume and, G524
 - heart rate dependence, acetylcholine, H520
 - [³H]phenylalanine, whole body and forearm protein turnover, E831
 - hyperphagic, γ -aminobutyric acid activity in ventromedial nucleus, R1225
 - left ventricular inotropic state, single-beat evaluation, H56
 - mathematical, PAH transport, kidney, F255
 - microspheres determination, cardiac output, fetus (sheep), H302
 - microvascular rarefaction, hypertension and (hamster), H126
 - ^{99m}Tc-MDP uptake in bone, multiple tracer studies, H1261
 - noncarrier, volume-sensitive potassium transport, erythrocytes, C1214
 - oxygen loss, arterioles, H921
 - propagation, gastrointestinal electrical activity, G265
 - simulated arterial system, impedance of, H1087
 - superoxide production, pulmonary alveolar macrophages, C405
 - Windkessel, pulse-synchronized contractions, H928
- Monoamines, hypothalamic, cephalic phase insulin response and, E236
- Monoclonal antibody, cell sorting, kidney cells, F742
- Monocrotaline, pulmonary hypertension induced by, right ventricular performance after, H1328
- Monocytes, blood, interleukin 1 release by, C1012
- Monoiodoinsulin, degradation products from insulin, kidney, E208
- Morphine, opioid receptors, migrating myoelectric complexes, G72
- Morphometry, constituent urine fractions, shape and volume of, R19
- Motility
 - colonic, substance P effects, G997
 - gastric
 - anorexigenic treatments, R955
 - changes induced by PAF-acether and endotoxin, G275
 - TRH stimulation of, G1011
 - gastrointestinal
 - glucose inhibition of gastric emptying, G404
 - inhibitory junctional potentials, C466
 - mechanics and neuropeptide responses, G862
 - methylene blue effects, proximal colon, G779
 - neuropeptide Y and, G589
 - opioid receptors and migrating myoelectric complexes, G72
 - pharmacology of emesis, G92

Motility (continued)

- intestinal
 - Clostridium difficile* toxins, G759, G767
 - kinin mediation of secretion, G1
 - migrating myoelectric complex (bird), G598
- Motoneurons, vagal, somatostatin effects, brain stem, C155
- Motor activity, postprandial, modulation by sleep, G851
- Mucin, secretion, intestinal, *Yersinia enterocolitica* effects, G319
- Mucus, secretion, secretagogue action, gastric mucosal explants, G739
- Muscle
 - capillary and mitochondrial unit in (lizard), R982
 - chronic exercise, diet-induced insulin resistance and, E242
 - colon circular, contraction generation, G570
 - colonic, noncholinergic excitation, substance P in, G246
 - contraction, posterior hypothalamic neurons stimulation, R348
 - energy metabolism, anoxia and recovery (fish), R922
 - esophagus, neuromedin B receptors, G747
 - fiber and source, influence on calcium sensitivity, C420
 - gastrointestinal, electrical activity, model of propagation, G265
 - glucose transporters in, changes in response to exercise, E580
 - insulin-stimulated glucose transport, after exercise, E494
 - intestinal, contraction, kinins and, G1
 - intestinal circular
 - ascending contraction (guinea pig), G540
 - calcitonin gene-related peptide action on (guinea pig), G546
 - length and load effects, intracellular calcium in trachea and, C807
 - mechanics, locomotor performance and (salamander), R1200
 - myogenic differentiation, growth factor effects, C701
 - oxidases, reciprocal changes from iron deficiency, E401
 - postreceptor defect in insulin action, streptozotocin-induced diabetes, E624
 - red, regulation of oxygen consumption, R898
 - regeneration, aging effects, multiple transplantation, C1262
 - resting, sympathetic outflow to, during ischemia, H105
 - retractor, oxygen exchange in microcirculation (hamster), H247
 - striated, anal sphincter, length-tension relations, G773
 - sympathectomy, DOPA and, E284
- Muscle, heart
 - action potential, tissue geometry effects, H391
 - myosin light chain kinase, molecular characterization, C399
 - preparations, sarcoplasmic reticulum calcium loading (rabbit, guinea pig, frog), C109

- segment length or force, control (ferret, rabbit), H1726
- tension, rate, and cAMP, calcitonin gene-related peptide effects, R421
- unloaded contraction, oxygen consumption of, H1289
- Z-bands, structural states, H552
- Muscle, skeletal
 - adrenergic receptors, responses to epinephrine and, E600
 - calcium uptake, bacteremia and, R201
 - diabetes mellitus, vascular sensitivity to diabetes, H1134
 - diabetic, bioenergetic changes, E129
 - exercise, branched-chain 2-oxo acid dehydrogenase and, E186
 - gene regulation, contractile activity and β -receptors in, C506
 - glucose transport
 - insulin and exercise effects, E227
 - polymyxin B, E662
 - glucose utilization, fetus, E699
 - growth, intermittent stretch-relaxation effects (chicken), C674
 - hyperpolarization, insulin-induced, C368
 - insulin receptor binding, exercise effects, E138
 - insulin receptor function, hypercortisolemia and diabetes effects, E39
 - isolation of RNA from, C1092
 - leukocyte shunting in, H85
 - malignant hyperthermia-susceptible, calcium-induced calcium release (pig), C358
 - metabolic alterations, induced by stretch-reflex activity, C175
 - microcirculation: see Microcirculation
 - myosin light chain kinase, molecular characterization, C399
 - postischemic
 - free radical defense mechanisms, H789
 - microvascular injury, iron role in, H1472
 - pyruvate dehydrogenase activity, sepsis effects, E445
 - small molecule reflection coefficient, H282
 - subcellular structure, thermal acclimation effects (fish), R1
 - sugar transport, diltiazem effects, R716
 - wounded, glucose uptake, phosphofructokinase and, E788
- Muscle, smooth
 - acetylcholine and CCK, calcium sources utilized by, gallbladder, G785
 - aortic cells, diacylglycerol metabolism, C11
 - arterial, pH-linked coupling mechanism, H867
 - carotid artery, rapid relaxation, myosin dephosphorylation during (hog), C315
 - circular, prostaglandin actions on muscarinic responses, G100
 - coronary artery, calcium pump, protection from superoxide radical (pig), C666
 - cytokinesis, attachment, and hypertrophy, vascular myosin expression during, C793
 - electrophysiology, contraction generation, G570
 - gastric
 - mechanics and neuropeptide responses in, G862

- tumors, CCK structural analysis, G1005
- gut, substance P-induced contraction, neutral endopeptidase inhibitors and (ferret), G39
- intestinal, *Clostridium difficile* toxins, G759, G767
- metabolism, hypoxia and substrate effects, C719
- myometrium, improved propagation during parturition, C130
- permeabilized, myosin, ADP release from, C59
- proximal colon
 - inhibitory junctional potentials, C466
 - rhythms and membrane potential, methylene blue effects, G779
- short-term pressure load, saphenous vein, H47
- tone, glomerular hyperperfusion and, F994
- tracheal
 - ANP and cGMP in, C495
 - changes of stiffness during isotonic contraction, C341
- trachealis, inositol lipid turnover, C375
- vascular
 - alterations in contractility during pregnancy (sheep), H1282
 - arterioles, length-tension relations (hamster), H630
 - cholesterol feeding, atherosclerosis and, C591
 - contractile properties after photoradiation, H655
 - cross-bridge phosphorylation and relaxation (swine), C282
 - cross-bridge phosphorylation, stress dependence on (swine), C96
 - cytoplasmic calcium concentration in, C951
 - sodium-calcium exchange and cytosolic free calcium relations, C147
 - transmitter release, pertussis toxin effects, H455
 - venous, chronic tilt effects, H1185
- Muscle cells
 - aortic, sodium-calcium exchange and cytosolic free calcium relations, C147
 - aortic smooth, density-dependent hyperpolarization, C644
 - growth, protein kinase C and, C886
 - smooth
 - airway, physiological responsiveness, C329
 - aortic, diacylglycerol metabolism, C11
 - noninactivating calcium current in, C880
 - tail artery, calcium channels in, H1361
 - vascular smooth
 - phorbol esters and arginine vasopressin in, F875
 - pH regulation of intracellular calcium, C234
 - sodium pump sites in, C786
- Muscle fibers
 - hypertrophied ventricle, sarcoplasmic reticulum function, H1006
 - single, enzyme shifts, hindlimb, C1082
 - size, capillary tortuosity, endurance training effects, H1110
 - skeletal, sarcolemmal spheres from, patch clamp, C434

types
 developing, capillary and area changes, C50
 metabolic, transversus abdominis (snake), C1176
 source and, influence on calcium sensitivity, C420
 Myeloperoxidase, defense mechanisms, postischemic skeletal muscle, H1789
 Myenteric plexus, distribution of opioid receptors, implications for function, G966
 Myocardial cells, damage, technique for occlusion and reperfusion, coronary artery, awake state, H1719
 Myocardium: *see also* Heart; Muscle, heart contractility
 awake state, H352
 sodium-calcium exchange, exercise and, C638
 vagal stimulation and, H428
 vagus nerve stimulation effects (chicken), H1295
 coronary microvascular resistance, redistribution by dipyridamole, H383
 creatine kinase isoenzyme response, coronary artery occlusion, H508
 fatty acid metabolism, ventricular function and, neonate (piglet), H9
 function
 cumulative degeneration, exercise-induced ischemia, H1462
 during hypoxia, ouabain effects, H681
 functional surface area, oxygen exchange, H375
 hydrogen peroxide levels, erythrocytes and, H584
 hypoperfusion, adenosine formation, propranolol prevention of (guinea pig), H772
 infarction: *see* Infarction
 ischemia: *see* Ischemia
 mechanical and structural properties, aging effects, H1440
 mechanical defects, non-insulin-dependent diabetes, E25
 membrane-related alterations, α -tocopherol effects, H1192
 necrosis, wave-front progression of, H1266
 nonischemic thickening, anesthesia, H1417
 normal and hypertrophied, outward currents in, H1450
 recovery from acidosis, sodium-hydrogen exchange, H256
 rubidium kinetics, model for blood flow estimation, H1156
 stunned
 ATP precursor effects, H560
 preservation of coronary flow reserve in, H1303
 tension, rate, and cAMP, calcitonin gene-related peptide effects, R421
 ventricular
 excitation-contraction coupling, sarcoplasmic reticulum participation in (frog), H1432
 photorelease of calcium ions (frog), H916
 working, palmitate oxidation, fetal and newborn (pig), E315
 Myocytes: *see also* Cardiomyocytes; Heart cells; Muscle cells; Ventricular cells

adaptation, inorganic phosphate deprivation, C322
 ANP secretion, determinants of, C608
 calcium channel activity in, cytosolic magnesium modulation of, C452
 calcium concentration, cytosolic free, C1120
 calcium uptake, oxidant effects, C598
 capillary endothelium and, lipoprotein lipase distribution in, E818
 current flow across membranes, general anesthetic effects (guinea pig), C273
 neuraminidase effects, transient calcium current, C1267
 regenerative capacity, adult mammalian, R797
 ventricular
 sodium current, cAMP and (guinea pig), C1131
 solution exchange device, C441
 Myoelectric complex, migrating, opioid receptors and, G72
 Myoglobin, gene regulation, contractile activity and β -receptors in, C506
 Myometrium, electrical propagation in, during parturition, C130
 Myosin
 ADP release from, permeabilized smooth muscle, C59
 dephosphorylation, rapid relaxation, carotid artery (hog), C315
 phosphorylation, stress dependence, vascular smooth muscle (swine), C96
 vascular expression, during cytokinesis, attachment, and hypertrophy, C793
 Myosin isozymes
 ATPase and, after infarction, H745
 cardiac, dietary carbohydrate effects, semistarvation and, R976
 non-insulin-dependent diabetes and, E25
 Myosin light chain kinase, molecular characterization, skeletal muscle, C399
 Myosin light chain phosphorylation
 ADP release, permeabilized smooth muscle, C59
 rapid relaxation and, carotid artery smooth muscle (hog), C315
 Myosin regulatory light chain, relaxation, vascular smooth muscle (swine), C282

N

NADPH oxidase, production, alveolar macrophages, kinetic model, C405
 Naloxone
 cardiovascular response to asphyxia and, fetus (sheep), R1063
 opioid receptors, migrating myoelectric complexes, G72
 Naphthalensulfonamides, vasopressin release, calmodulin and, E516
 α -Naphthylthiourea, injury, lung, vascular permeability in, H1711
 Narcolepsy, sleep-waking cycles and cataplexy in, cardiovascular variables during, H111
 Nasal epithelium
 cellular chloride transport, cystic fibrosis and, C1045
 shunt resistance and ion permeabilities, cystic fibrosis, C1054
 Nasal system, role in breathing, upper airway carbon dioxide and (snake), R91

Natriuresis
 ANF-induced, during pacing tachycardia, R1245
 ANF infusion and, F780
 ANF receptors, adrenalectomy and, R1250
 ANP and, during acute hypertension, awake state, R1044
 ANP infusion, heart failure, H533
 ANP-sensitive guanylate cyclase, medullary collecting duct cells, F766
 atrial peptides, renal function and, awake state, R284
 endothelin effects, renal, F1051
 modulation, sympathetic nerves and angiotensin II, awake state, F485
 release of obstruction, atrial peptide effects following, F583
 sympathetic nerve activity and, water immersion, awake state, R299
 volume expansion and ANF, H852
 Natriuretic hormone, endogenous digitalis and, C937
 Nausea, feeding and gastric emptying, CCK and lithium chloride effects, R463
 Neonate: *see also* Infant; Newborn
 bicarbonate reabsorption, kidney function, F29
 calcium efflux from bone, during metabolic acidosis, F836
 hypoxia effects, atrioventricular node, H1337
 jejunal microvillus membrane, development of, G931
 sarcolemmal sodium-calcium exchange, ischemia effects, heart, H1615
 ventricular function, fatty acid metabolism and (piglet), H9
 Nephrectomy, dietary potassium and, principal cells in cortical collecting duct, F387
 Nephritis, Heymann, dietary protein intake and, F711
 Nephron
 distal, ultrastructure (salamander), C849
 prepro-epidermal growth factor mRNA, in situ hybridization of, F632
 proximal, membrane processing, charge effects, C304
 proximal and distal, structural studies, F814
 Nephrotic syndrome, sodium retention in, renal nerve role in, F823
 Nephrotoxicity, cyclosporine, renal hemodynamics and, F71
 Nerves: *see also* specific nerve
 capsaicin-sensitive, bile-oleate-induced hyperemia and, G476
 measurements, unitary spike trains, R997
 Neural antagonists, pulmonary vascular response to, pentobarbital modification of, H1384
 Neuraminidase, transient calcium current and, cardiac myocytes, C1267
 Neuroblastoma cells, mitochondrial respiration, oxygen diffusion and, C1207
 Neurogenic mechanisms, control of intrinsic heart rate, R231
 Neurohumoral changes, ANP role in, heart failure (ewe), H1052
 Neurohumoral factors, prostaglandins and, low cardiac output, H1079

- Neurohypophyseal hormone, direct cardiac stimulation (bullfrog), R187
- Neurohypophysis, vasopressin and oxytocin release, afferent renal nerve effects, R1240
- Neuromedin B, receptors: *see* Receptors
- Neuromodulation, intestinal transport, suckling, R481
- Neuromodulators, cardiac output and blood flow, awake state, H1651
- Neuronal activity, subcoeruleus area, arousal state vs. temperature effects, R840
- Neurons
- afferent, calcitonin gene-related peptide action (guinea pig), G546
 - angiotensin II binding sites, modulation by mineralocorticoids, C121
 - I- β , respiratory responses, R379
 - peripheral activity, gastric motility, G275
 - posterior hypothalamic, muscular contractions and, R348
 - reticulospinal vasomotor, mediation of somatosympathetic reflexes, R1084
 - rostral ventrolateral medulla, somatic pressor reflex and, R448
 - submucosal, opioid and β_2 -adrenergic receptors in, G957
 - sympathetic
 - abdominal viscera (guinea pig), G581
 - trigeminal depressor response and, R1111
 - sympathoexcitatory, central respiratory modulation of, R739
 - thalamic, skin cooling and hypothalamic temperature response, R1293
 - thoracolumbar spinal, responses to renal artery occlusion, H1515
- Neuropathy, diabetic, correction of impaired sodium-potassium-ATPase, E264
- Neuropeptides
- bile-oleate-induced hyperemia, capsaicin-sensitive nerves and, G476
 - binding sites for endothelin, autoradiographic distribution in tissues, R858
 - enzyme-dissociated myenteric ganglia (guinea pig), G233
 - gastric acid secretion and, CRF-induced inhibition, G214
 - inhibitory, galanin and VIP, gastrointestinal tract, G884
 - release, during pancreatic nerve stimulation, islet function and, E191
 - responses, pylorus and gastric muscle, G862
- Neuropeptide Y
- action, renal (monkey), F524
 - adrenergic contractions and, lower esophageal sphincter, G589
 - cross-linking to receptor, brain membranes, G637
 - inhibition of vasopressin, cortical collecting tubule, F408
- Neuroretina, retinyl esters (frog), R255
- Neurotensin
- central effects, gastric mucosal integrity, G226
 - mechanics, pylorus and gastric muscles, G862
 - renal tubular handling of, micropuncture and HPLC technique, F100
- Neurotransmitter
- cholinergic, autoregulation, parietal cells, G356
 - enzyme-dissociated myenteric ganglia (guinea pig), G233
 - multiple systems and interactions (guinea pig), G540
- Neutrophils
- depletion, myocardial function after ischemia and, H341
 - infiltration, postischemic skeletal muscle, H789
 - mediation, postischemic renal injury, F794
 - Mol-deficient, lung injury induced by, H751
- Newborn: *see also* Infant; neonate
- blood flow and oxygen consumption and, postprandial gastrointestinal, during cold stress (piglet), G364
 - cerebral arteriole dilation, lipoxin effects (pig), H468
 - glucose utilization, cerebral, during status epilepticus (monkey), C1160
 - hypoglycemia, cerebral blood flow and glucose use during, H1659
 - intrauterine growth retardation, fasting glucose and fat metabolism alterations, E380
 - isoproterenol-stimulated renin secretion, renal cortex (sheep), R1258
 - low birth weight, glucose production, medium-chain fatty acid effects, E692
 - PAF-acether effects, circulation (piglet), H205
 - response to hypotension, sinoaortic denervation effects (lamb), H434
 - working heart, palmitate oxidation (pig), E315
- Nifedipine, relaxation, vascular smooth muscle (swine), C282
- NIH-373 cells, bladder, expressing *Ras* oncogene, sodium-hydrogen exchange regulation in, C756
- Nitrendipine, calcium channels and, glucose-responsive insulinoma, E488
- Nitric oxide
- coronary arteries, atherosclerosis, C591
 - EDRF release and, coronary artery, H828
 - release, aortic endothelial cells, H1030
- 7-Nitrobenz-2-oxa-1,3-diazol-4-yl, transfer from liposomes to cells, collision dependence, C522
- Nitro blue tetrazolium, kinetic model of superoxide production, pulmonary alveolar macrophages, C405
- Nitrogen, balance, concurrent cachectin and insulin administration, E725
- Nitroglycerin
- endothelium-dependent dilatation of cerebral arterioles, diabetes mellitus effects, H621
 - vasomotor activity, coronary collateral circulation, H890
- Nitroprusside
- arterial pressure changes, carotid baroreflex resetting, R549
 - control of secretion, vasopressin and angiotensin II, R339
- NMR: *see* Nuclear magnetic resonance
- Nocturnal cycle, macronutrient intake, free feeding and food deprivation, R541
- Nodulus-uvula pressor response, cerebellar, H1601
- Nonuniformity, left ventricular relaxation and, H222
- Norepinephrine
- acetylcholine effects and, sodium activity in Purkinje fibers (sheep), H1407
 - acute hypoxemia, fetal response (sheep), H613
 - adrenal and sympathetic, exercise and, R155
 - arginine vasopressin secretion and, developmental changes (sheep), E406
 - cephalic phase insulin response and, E236
 - chloride ion transport and, intestine (flounder), G166
 - control, intrarenal arteries, H607
 - control of glycemia, after stress, E231
 - exercise-induced changes, R169
 - myometrial, pregnancy (guinea pig), E215
 - neurohumoral changes, onset and offset of heart failure (ewe), H1052
 - obesity, obesity resistance and, R766
 - overfeeding-induced thermogenesis, R653
 - pertussis toxin and, perivascular nerve terminals, H455
 - placental blood flow and, fetus (sheep), R1056
 - pressor response to, systemic vascular autoregulation, R98
 - renin control and, dietary sodium deprivation, E863
 - secretagogue interaction, epithelial responses of ileum and, G919
 - stenotic amplification, vasoconstriction responses, H1044
 - sympathectomy, myocardial ischemia and, H1322
 - sympathectomy and, muscle, E284
 - tracer, handling by liver, G107
 - transient calcium current and, atrium, H1500
 - vascular sensitivity to, diabetes mellitus, H1134
 - vasoconstriction and endothelial damage, stenotic arteries, H881
 - vasomotor responses and, arterioles (hamster), H832
- Normoglycemia, phlorizin-induced, glucoregulation in diabetes and, E277
- Nuclear magnetic resonance
- brain pH responses, sodium bicarbonate and Carbicarb during systemic acidosis, H1316
- ³¹P-
- ATP precursor effects, postischemic heart, H560
 - energy metabolism (fish), R922
 - enterocyte metabolites (chicken), G423
 - fructose loading by, liver, G949
 - hyponatremia effects, brain pH, F113
 - magnesium and reperfusion of ischemic heart, H195
 - water diffusion measurement, erythrocytes, C1097
- Nucleoside, concentration, myocardial (guinea pig), H772
- 5'-Nucleotidase, ischemic injury and, renal, F298

- Nucleotides
adenine
catabolism in coronary circulation, H1565
ischemic injury and, renal, F298
cyclic, ANF mediated by, intestinal ion transport (flounder), C142
guanosine, activation of epithelial sodium channel (toad), F965
sequence, A6 kidney cells (frog), F1034
Nucleus ambiguus, TRH analogue stimulation, gastric contractility, G1011
Nucleus circularis, hexokinase activity, during dehydration and rehydration, R1050
Nucleus tractus solitarius, response to ANF microinjection, R577
Nutrients
bombesin and, CCK response to, G989
CCK release and, hypothalamus, R248
exchange, maternal-fetal, continuous feeding and, E852
uptake, intestinal, diet and radiation effects, G178
Nutrition, fetal, alanine transport systems, placenta, C630
Nystatin
net sodium flux measurement, cell suspensions, C1105
sodium absorption and, colon, C584
- O**
- Obesity
body fat mass effects, thermogenesis and metabolic rate, E573
carbohydrate overfeeding, energy expenditure during, E357
dietary, weight cycling and, R1209
disproportional, glucose transport and transporters, E179
genetic
response to cortisone and MSH, R494
sleep patterns in, R281
stress immobilization consequences, 435
gold thioglucose-induced, brown fat, circadian control and, E773
insulin hypersecretion, central nervous system effects, E439
obesity resistance and, initiation and perpetuation, R766
ovarian steroids and, insulin secretion and removal (sheep), E116
oxygen consumption and, adipose tissue, E467
reduced, HDL subfractions and adipose tissue metabolism in, E740
respiratory quotient in, ambient temperature effects, R236
uneven blunting in, chronotropic baroreflexes, H417
VMH lesion and, CRF intraventricular infusion effects, R751
Octanol, current flow across membranes and, myocytes (guinea pig), C273
OK cells, parental, clonal subpopulations of, F672
Olfaction, breathing, upper airway carbon dioxide and (snake), R91
Oliguria, ANP and renal failure, acute pancreatitis, F211
Omeprazole, pentagastrin versus, gastric chamber, G390
Opiates, gastric acid secretion, CRF-induced inhibition of, G214
Opioids
endogenous
cardiovascular responses to asphyxia and, fetus (sheep), R1063
effect on cardiac output and blood flow, awake state, H1651
glucoregulation and, awake state, E322
pro-opiomelanocortin products, post-translational processing (piglet), R429
receptors: *see* Receptors
Organic acid, stereospecific feeding by, R366
Ornithine decarboxylase
activity, CCK and gastrin effects, pancreatic cell line, G846
calmodulin-regulated induction, polyamine-dependent growth and, G342
mucosal, small intestine, G624
Oscillations, low-frequency, arterial pressure and heart rate, models, H1573
Osmolality, aldosterone secretion induced by, calcium dependence of, E760
Osmolytes
organic, dehydration and ADH effects, inner medulla, F916
organic concentrations, regulation, inner medullary tubules, F128
renal tubule segments, aldose reductase activities, F563
Osmoregulation
age-sensitive, neural correlates and (mollusc), R989
aldose reductase activities, renal tubule segments, F563
blood glucose concentration effects, diabetes mellitus, R597
brain, during acute hyponatremia, F1059
high external sodium chloride and, renal medullary cells, C614
sodium-potassium-ATPase activity, stimulation by cortisol, gill (salmon), R707
vasopressin secretion, estrous cycle (pig), R270
Osmosis
molecular mechanisms, R801
thermodynamics of, C694, C699
Osmotic threshold, vasopressin release, R892
Osteoblast-like cells, sodium-dependent inorganic phosphate transport, regulation by PTH, E93
Osteoclasts, inwardly rectifying potassium current, C1277
Ouabain
binding
adaptation in diluting segments and (salamander), F229
stimulation by cortisol, gill (salmon), R707
binding site
endogenous digitalis and, C937
sodium pump sites, vascular smooth muscle cells, C786
cell sorting, kidney cells, F742
chronic treatment, synthesis and degradation of sodium-potassium-ATPase, C75
effects on myocardial function, during hypoxia, H681
excitation-contraction coupling, sarco-plasmic reticulum participation in, ventricle (frog), H1432
glucose production and, proximal tubules, F120
high external sodium chloride and, renal medullary cells, C614
hydrogen-potassium exchange mechanism sensitive to, apical membrane, colon (guinea pig), G979
net sodium flux measurement, cell suspensions, C1105
potassium secretion and, cortical collecting tubules, F306
potassium transport pathways, inner medullary collecting duct, C823
sodium-chloride cotransport and, tracheal epithelial cells, C658
spermidine uptake and, enterocytes, G905
treatment, cardiac cells, sodium-calcium exchange activity and, C1273
Ovary, progesterone, absence of, prolactin stimulation of food intake, R701
Ovarian steroids, obesity and, insulin secretion and removal (sheep), E116
Ovariectomy, insulin dynamics and, hepatocytes, E780
Ovulation, hormonally induced, increase in ovarian leukotrienes and, E753
Oxytocin, release, CCK-induced (sheep), R1355
Oxidants
calcium uptake and, myocytes, C598
myocardial, erythrocytes and, H584
Oxidases, muscle, reciprocal changes from iron deficiency, E401
Oxidation, dicarboxylates, liver, G680
Oxidative capacity, muscle, endurance training effects, H1110
2-Oxo acid dehydrogenase, branched-chain, exercise and, E186
Oxygen
consumption
adipose tissue, age, fat cell weight, and obesity effects, E467
ambient temperature effects, lean and obese rats, R236
basal, heart, H846
body fat mass and percent fat effects, E573
brain, maturational changes, R78
cell composition and, R63
cerebral, hypoglycemia effects, H697
fatty acid metabolism and, myocardial, neonate (piglet), H9
gastric optimal hematocrit, H472
glucose and insulin effects (sheep), E704
hemodilution effects, H171
massive sympathetic nervous system discharge, E345
minor preload dependence, heart, H1289
monitoring net sodium flux, cell suspensions, C1105
muscle (lizard), R982
myocardial, right coronary flow reserve, H1176
obesity and obesity resistance, R766
phosphate metabolite relations, heart, H265
postprandial, during cold stress (piglet), G364

Oxygen (*continued*)

- regulation, red muscle, R898
- smooth muscle metabolism and contraction, C719
- stress ulcer formation, R403
- transcendental meditation and, R632
- delivery, glutathione efflux and, liver, G482
- diffusion
 - mitochondrial respiration and, neuroblastoma cells, C1207
 - thermal acclimation and, skeletal muscle (fish), R1
- exchange
 - functional surface area for, myocardium, H375
 - microcirculation, retractor muscle (hamster), H247
- intracardiac shunt relations (turtle), R240
- loss, rate, from arterioles, H921
- low, inhibition of aldosterone secretion, adrenocortical cells (cow), E640
- partial pressure
 - EDRF release and, H1595
 - intraretinal and preretinal, response to intraocular pressure, H1627
- regional cerebral rate for, during fasting, PET, E805
- supply-to-consumption ratio, myocardium (guinea pig), H772
- tension, intraocular, sensor measurement, diabetes and, H1127
- transplacental diffusion, umbilical blood flow effects (sheep), H813
- transport
 - hemoglobin concentration effects (lamb), H527
 - iron deficiency and, E401
- uptake
 - α_1 -adrenergic control, heart, H334
 - maximum, physical training and aging, E352
 - stimulation by glucagon, liver, G369
- Oxygenation
 - cerebral, immature fetus (sheep), R1264
 - gastric, optimal hematocrit for, H472
 - gastric and intestinal, hemodilution effects, H171
 - improved, rocking and, LLC-PK₁ cells (pig), C1064
- Oxygen metabolites
 - defense mechanisms, postischemic skeletal muscle, H789
 - prostaglandin E₂ production and, gastric mucosal cells, G925
 - reactive, reperfusion-induced injury, skeletal muscle, H1472
- Oxygen radicals
 - leukocyte adherence and, chemoattractant-induced, H594
 - myocardial, erythrocytes and, H584
 - polyethylene glycol-conjugated, ischemic brain injury and, H589
 - protein kinase inhibitor, pulmonary edema and (guinea pig), H1012
 - reperfusion-induced injury, skeletal muscle, H1472
- Oxyntic gland, SAT activity, pentagastrin induction of, G16
- Oxytocin
 - central, cardiovascular responses to stress, H1369
 - infusion, sleep-waking cycle and, R674

- plasma, afferent renal nerve effects, awake state, R1240
- response, bradycardia and, paraventricular stimulation and, R112
- secretion, CCK and lithium chloride effects, R463
- vascular responsiveness, adrenal insufficiency effects, H1274

P

- Pacemaker, electrical, inhibitory junctional potentials in proximal colon, C466
- Pacing
 - arrhythmias, ischemia-induced and reperfusion-induced, H21
 - ventricular, ANP role in, heart failure (ewe), H1052
- PAF: see Platelet-activating factor
- PAH: see *p*-Aminohippuric acid
- Palmitate, oxidation, working fetal and newborn hearts (pig), E315
- Palmitoyl-coenzyme A synthetase, fatty acid metabolism, endotoxin and, liver, E31
- Pancreas
 - amylase secretion, islet hormone effects, G897
 - exocrine
 - heterogeneity of, G817
 - peptide YY and polypeptides, G698
 - potassium-stimulated insulin release, galanin effects, E619
 - secretion
 - CCK antagonists and, G150
 - feedback regulation of, CCK and, G430
 - inhibition by CGRP, G715
 - in response to dietary fat, G1016
- Pancreatic acini
 - bombesin receptors, regulation by CCK, G291
 - neuromedin B receptor, esophagus, G747
 - VIP and secretin, interaction of peptides (guinea pig), G283
 - VIP internalization, ultrastructural analysis, G689
- Pancreatic-adrenal-pituitary clamp, glucose counterregulation and, E835
- Pancreatic cells
 - β -
 - calcium channels, insulinoma, E488
 - α -glycerophosphate shuttle, E173
 - VIP internalization in, G689
 - ornithine decarboxylase activity, CCK and gastrin stimulation of, G846
- Pancreatic digestive enzymes, gene expression, CCK and SBTI effects, G733
- Pancreatic hormones, thyroid hormones and, glucoregulatory function, E101
- Pancreatic intrinsic factor, identification and characterization, G517
- Pancreatic islets
 - insulin secretion, interleukin 1 stimulation of, E19
 - pancreatic nerve stimulation, galanin release during, E191
 - PPS, pyridine nucleotides, and glucokinase, CCK-8 effects, E68
- Pancreatic nerve, stimulation, galanin release during, islet function and, E191
- Pancreatitis, hypovolemic acute, response to ANP and, F211

- Papillary muscle: see Muscle, heart
- Parabrachial nucleus, lesions, area postrema overingestion and, R306
- Paralysis, intrathecal vasopressin and, asleep and awake state, R193
- Parasympathetic nervous system, vagus nerve stimulation, heart rate and ventricular contractility (chicken), H1295
- Parathyroid hormone
 - cAMP production induced by, lectin-tunicamycin effects, E80
 - cell sorting, kidney cells, F742
 - clonal subpopulations, OK cells, F672
 - human, extraction, calcium concentration effects, liver, E87
 - magnesium transport and, thick ascending limb, F197
 - phospholipid content and, brain synaptosomes, F705
 - regulation of sodium-dependent phosphate transport, osteoblast-like cells, E93
 - urinary acidification, acid-base balance and, F973
- Paraventricular nucleus
 - acute stress effects, central oxytocin system mediation of, H1369
 - hexokinase activity, during dehydration and rehydration, R1050
 - renal nerve denervation, forebrain hexokinase activity, R930
- stimulation
 - bradycardia and hormone responses, R112
 - sympathetic outflow and, R1325
- stimulation with glutamate, bradycardia and pituitary responses, R112
- Parietal cells
 - apical membrane, 80-kDa phosphoprotein, G1082
 - gastric, carbonic anhydrase II gene expression, G631
 - gastric mucosa, carbon dioxide partial pressure effects on pH (frog), G206
 - mass, gastric acid secretion and, G975
 - muscarinic gastrin receptors, autoregulation, G356
 - secretagogue-responsive, gastric mucosa, G254
 - secretory activity, protein kinase C, G129
 - secretory membrane, chloride conductance in, G299
 - stimulation, 80-kDa phosphoprotein, G1070
 - stimulus-secretion coupling, intracellular calcium and, C241
- Parturition, electrical propagation and, myometrium, C130
- Patch clamp
 - perfusion apparatus, microscope, C214
 - sarcolemmal spheres, stretched skeletal muscle fibers, C434
- PDGF: see Platelet-derived growth factor
- Pelvic nerve, efferent, activity, bladder, R1269
- Penicillamine, copper metabolism and, hepatocytes, G667
- Pentagastrin
 - acid secretion, somatostatin linkage, stomach, G418
 - gastric acid secretion, CRF and, G412

- induction of spermine/spermidine SAT activity, G16
- omeprazole and cimetidine versus, gastric chamber, G390
- serotonin release and, gastric lumen, G377
- Pentobarbital, modification, pulmonary vascular response to neural antagonists, H1384
- Pentobarbital sodium, renal sympathetic nerve activity and, awake state, R371
- Pentose, cycle, testing assumptions in futile cycling, E668
- Pentose phosphate shunt, CCK-8 effects, pancreatic islets, E68
- Pepsin, stomach acid resistance to, G31
- Pepsinogen
 - desensitization of secretion, CCK-induced, chief cells (guinea pig), G837
 - secretion, ethanol injury and, stomach (guinea pig), G704
- Peptidases, putative tripeptidyl, renal brush border, F970
- Peptide histamine isoleucine, inhibitory functions, pylorus, G789
- Peptide histidine isoleucine, noradrenergic influences, ileum, G919
- Peptide hormones, urinary acidification, acid-base balance and, F973

 - transport
 - control, proximal tubule (fish), R850
 - parathyroid hormone and, clonal subpopulations of OK cells, F672

SUBJECT INDEX TO VOLUME 256

- Phosphate metabolites, relation to oxygen consumption, heart, H265
- Phosphatidic acid, transfer from liposomes to cells, collision dependence, C522
- Phosphatidylcholine
distribution of absorbed lipids and, enterocytes, G349
hypoxia-induced injury and, proximal tubule cells, F688
- Phosphatidylinositol, degradation, PDGF independent in, vascular smooth muscle cells, C886
- Phosphocreatine, oxygen consumption, regulation in red muscle, R898
- Phosphofructokinase, glucose uptake through, wounded skeletal muscle, E788
- Phosphoinositides
adenosine-sensitive turnover, renal cell line, F1067
correction of diabetic nerve, E264
hydrolysis, interleukin 1 stimulation of, E19
lipid turnover, trachealis smooth muscle, C375
signal transduction and, mesangial cells, F375
- Phospholipase, sodium-hydrogen antiport, prostaglandin release, C831
- Phospholipase C
GTP-binding protein and PGE₂ synthesis relations, glomerular mesangial cells, F171
phorbol ester effects, granulosa cells, E368
- Phospholipids
biliary, sulfated cholic acid infusion and, G62
content, brain synaptosomes, chronic renal failure and PTH effects, F705
endothermy, cell composition and, R63
hypoxia-induced injury and, proximal tubule cells, F688
metabolism, gentamicin effects, proximal tubular cells, C204
signal transduction and, mesangial cells, F375
- Phosphoprotein
80-kDa
apical membrane of parietal cells, G1082
parietal cell stimulation, G1070
- Phosphorus
diet, 1,25-dihydroxyvitamin D₃ biosynthesis and, E309
metabolism, physical activity effects, E1
restriction, 1,25(OH)₂D₃ response, elevated calcium ions and, F285
- Phosphorylation, oxidative, neuroblastoma cells, C1207
- Photoperiod, changes induced by, brown fat, prolactin effects (hamster), R174
- Photoradiation, contractile properties after, vascular smooth muscle, H655
- Phrenic nerve, activity, respiratory I- β neurons, R379
- Physical activity: *see* Exercise
- Physical training: *see* Exercise
- Physiology education
advances in, S1
cardiovascular teaching, ventricular demonstration of cardiac function (frog), S9
computer software, S21
medical physiology, lectures, teaching effectiveness analysis plan, S3
research on teaching, S14
technology vs. live preparations in student labs, S18
- Physostigmine, parasympathetic denervation, infarction, left ventricle, H859
- Pial arterioles, blood flow, laser-Doppler assessment, H1247, H1255
- Pigment epithelium, neuroretina, retinyl esters in (frog), R255
- Pituitary
anterior, epoxyeicosatrienoic acid effects, E221
cytosolic free calcium, forskolin and phorbol effects, E375
responses, paraventricular stimulation of, R112
- Pituitary cells
fast feedback on ACTH, E145
GH secretion from, lithium substitution for extracellular sodium, C712
- Pituitary hormones
anterior, carotid sinus baroreflex control of release, R408
anterior and posterior release, CCK-induced (sheep), R1355
- Placenta: *see also* Fetus; Lactation;
Pregnancy
basal plasma membrane of, alanine transport systems, C630
soluble purine nucleoside 5'-phosphomonoesterases, E386
thromboxane A₂-prostaglandin H₂ receptors, functional, E256
- Plasma, adenosine turnover in, C799
- Plasminogen
activation, regulation of, perfused kidney, F787
tissue-type activator, epinephrine and, hindlegs, H404
- Platelet-activating factor
-acether, circulatory effects, newborn (piglet), H205
endotoxin and, gastric motility changes, G275
extra- and intracellular metabolism, mesangial cells, F735
glomerular responses to, thromboxane A₂ and, F35
release, ischemic-reperfused heart, H1236
smooth muscle cell line and, airway, C329
- Platelet-derived growth factor, phosphatidylinositol degradation and, vascular smooth muscle cells, C886
- Platelets
 α_2 -adrenergic receptors, low-sodium diet effects, E339
aequorin-loaded, response to activators of protein kinase C, C35
- Plethysmography, venous occlusion, adipose tissue blood flow and mental stress, E12
- Plexus
deep muscular, distribution of opioid receptors, G966
submucosal, opioid and β_2 -adrenergic receptors in, G957
- Pneumocytes
type II
density-independent isolation, after partial pneumonectomy, C515
matrix-derived soluble components, C621
- Pneumonectomy, partial, density-independent isolation of type II pneumocytes after, C515
- Polarity
cell, colonic epithelial cell line T₈₄, C197
epithelial, following ischemia, F430
- Polyamines
metabolism, pulmonary, after partial pneumonectomy, C515
microfloral-derived, obstruction-induced colonic mucosal hypertrophy, G1049
ornithine decarboxylase and, small intestine, G624
uptake
enterocytes, G905
type II pulmonary epithelial cells, C160
- Polyanions, glomerular, convection-binding mechanism, F882
- Polycythemia
exhypoxic, erythropoietin production, C925
optimal hematocrit, gastric, H472
- Polymyxin B, glucose transport and, skeletal muscle, E662
- Polyols, dehydration and ADH effects, inner medulla, F916
- Polypeptides: *see also* Peptides
pancreatic, inhibitory regulation of exocrine pancreas, G698
vasoactive intestinal
colon carcinoma cells, G808
noradrenergic influences, ileum, G919
- Positron emission tomography, glucose metabolism, during fasting, brain, E805
- Postprandial activity, modulation by sleep, G851
- Posture, chronic tilt, saphenous vein and, H1185
- Potassium
activity, cortical collecting duct principal cells, F136
adaptation, renal cortical collecting tubules, F279
aldosterone biosynthesis induced by, zona glomerulosa cells, E475
aldosterone secretion induced by, calcium dependence of, E760
balance, chronic CEI and, R531
chloride-dependent flux, cortical collecting tubule, F697
clearance, vasopressin and, awake state, R291
conductance
electrophysiology of, intestinal villus cells (fish), C1022
somatostatin inhibitory effects, brain stem, C155
contractures, muscle, polymyxin B effects, E662
depolarized arrest, basal metabolism, heart, H846
dietary, principal cells in cortical collecting duct, F387
electrolyte transport, chronic metabolic acidosis effects, colon, G1036
excretion, diurnal cyclic, amiloride effects, R510
flux, chloride-dependent, activation by cAMP, erythrocytes (pig), C772
hyperkalemia, monophasic action potential recordings, H956

- insulin release stimulated by, galanin effects, E619
- loss, cellular, myocardial ischemia, H1165
- net sodium flux measurement, cell suspensions, C1105
- permeability, pH effects, gallbladder epithelium (mudpuppy), C1184
- regulatory fluxes, hypertonic stress effects, G563
- relaxation of arteries induced by, hypertension, H707
- secretion
- chloride transport effects, cortical collecting tubule, F306
 - colonic, mechanisms in renal failure, F490
 - flow dependence of, cortical distal tubules, F932
- transport
- cellular pathway, renal inner medullary collecting duct, C823
 - chloride-dependent, erythrocytes, C858
 - chloride effects, red blood cells, C994
 - choroid plexus, infant, R786
 - inner medullary collecting duct, F862
 - volume-sensitive, chloride-dependent, erythrocyte ghosts, C81
 - volume-sensitive, erythrocytes, C1214
- Potassium-ATPase, apical membrane, colon (guinea pig), G979
- Potassium channels
- activation, by extracellular ATP, MDCK cells, C1016
 - block, internal tetraethylammonium ions and, C683
 - inward-rectifying, hepatocytes, G1028
 - low-conductance, apical membrane, cortical collecting tubule, F143
 - sarcolemmal spheres, skeletal muscle, C434
 - stilbene derivatives, regulatory volume decrease (opossum), C252
- Potassium channel currents, basolateral membrane, distal convoluted tubule, F246
- Potassium-chloride cotransport
- stimulation, dapsone-induced anemia, erythrocytes, C265
 - volume-sensitive, erythrocyte ghosts, C81
- Potassium current
- inwardly rectifying, osteoclasts, C1277
 - normal and hypertrophied ventricular myocytes, H1450

 - obesity, initiation and perpetuation, R766
 - peripheral
 - AV block, awake state, H361
 - during hypoxia and hyperoxia, awake state, H1023

sympathetic blockade effects (monkey), R778
 pulmonary vascular
 ANTU-injured lungs, H1711
 arginine vasopressin and, infant (lamb), H641
 hematocrit effects, H766
 PAF-acether effects, newborn (piglet), H205
 renal vascular, hyperchloremia and thromboxane, F152
 tissue, alveolar epithelial cells, C688
 vascular
 ANF and (fish), R10
 cerebral blood flow, laser-Doppler flowmetry, H1255
 coronary capillarity and, leukocyte effects, H982
 embryo (chick), H240
 fetoplacental, E256
 hypoxic reperfusion, postischemic injury, H315
 norepinephrine, diabetes mellitus, H1134
 placental, fetus (sheep), R1056
 vasopressin and, fetus (sheep), R1011
 Respiration
 breathing movements, thoracic duct lymph flow (sheep), H16
 cytochrome *b*, spectrophotometry of, brain, C840
 DL-homocysteic acid effects, caudal ventrolateral medulla, H688
 mitochondrial
 chronic glucagon-treated hyperthermia (duckling), R1192
 oxygen diffusion and, neuroblastoma, C1207
 upper airway carbon dioxide and (snake), R91
 Respiratory exchange ratio, transcendental meditation and, R632
 Respiratory generator, central, sympathoexcitatory neurons, R739
 Respiratory quotient, ambient temperature effects, lean and obese rats, R236
 Respiratory regulation, I- β neuron responses, R379
 Respiratory sinus, arrhythmia, transfer function analysis, H153
 Respiratory state, intracardiac shunt relations (turtle), R240
 Reticulocyte lysate, deprivation, protein synthesis and, hepatocytes, C18
 Retina
 oxygen partial pressure, response to raised intraocular pressure, H1627
 oxygen tension, fiber-optic sensor measurement of, H1127
 Retinyl esters, neuroretina (frog), R255
 Rhythms
 activity, SCN lesions and, R1027
 circadian
 bright morning light effects, R106
 sleep patterns in genetic obesity, R281
 thermal sensitivity of (reptile), R1160
 triazolam effects (hamster), R639
 vasopressin infusion effects, R674
 circannual, adipose tissue dynamics during (squirrel), R1286
 daily, nocturnal hyperthermia and food deprivation (pigeon), R733
 diurnal, abnormal, vasopressin, in enuretics, F664

membrane potential and, methylene blue effects, proximal colon, G779
 sympathetic, two-phase change, cerebral ischemia, R120
 Ribonucleic acid
 cell subpopulations, differentiating compartments of epidermis, C977
 gel blot and dot blot, secondary hyperparathyroidism and, E765
 messenger
 inflammation and, liver, C413
 physiological regulation, C457
 proinsulin, glucocorticoid regulation of, E303
 synthesis, enzyme activity and, brown fat, E645
 rapid isolation of, skeletal muscle, C1092
 Ribosome, formation, higher aortic pressure effects, heart, C1257
 Rostral ventrolateral medulla
 neurons
 central respiratory modulation of, R739
 somatic pressor reflex and, R448
 reticulospinal vasomotor neurons in, mediation of somatosympathetic reflexes, R1084
 sympathetic nerve discharge, glutamate antagonist and, R722
 tonic influences, sympathetic nerves and, R323
 Rotenone, potassium transport pathways, inner medullary collecting duct, C823
 RU 486, role of, dexamethasone-induced hypertension, E682
 Rubidium
 myocardial kinetics, model for blood flow estimation, H1156
 potassium channels and, apical membrane of cortical collecting tubule, F143
 Rubidium-86, uptake, vascular smooth muscle cells, C786
 Ryanodine
 caffeine relations, heart ventricles, H1100
 excitation-contraction coupling, sarcoplasmic reticulum participation in, ventricle (frog), H1432

S

Saccharides, activation of cation-selective pathway, lingual epithelium, R394
 Saline, hypertonic, vasopressin release, osmotic thresholds, R892
 Saliva
 flow rate
 rumen, dehydration and (cattle), R809
 rumen, rehydration and (cattle), R816
 Salivary gland, acinar cells, acetylcholine-induced acidosis, C288
 Salt
 balance, pregnancy with renal hypertension, F728
 deprivation, blood pressure and, H1426
 homeostasis, nonciliated bronchiolar epithelial cells, C893
 loading, hexokinase activity and, brain, R1050
 secretion, ion transport, salt gland (duck), R1184
 Salt gland, ion transport mechanism, cell culture (duck), R1184

SA node: see Sinoatrial node
 Saphenous vein
 electrical and mechanical responses, short-term pressure load, H47
 long-term tilt effects, H1185
 Saralasin
 aldosterone axis, sodium intake and, H1311
 control of secretion, vasopressin and angiotensin II, R339
 Sarcoidosis, T lymphocyte adherence and, lung fibroblasts, C336
 Sarcolemma, cardiac, sodium-calcium exchange, C638
 Sarcolemmal spheres, patch clamp of, stretched skeletal muscle fibers, C434
 Sarcoplasmic reticulum
 calcium loading, cardiac muscle preparations (rabbit, guinea pig, frog), C109
 cardiac myocytes, X-ray microanalysis, H574
 excitation-contraction coupling and, ventricle (frog), H1432
 function, muscle fibers, hypertrophied ventricle, H1006
 malignant hyperthermia-susceptible, calcium-induced calcium release (pig), C358
 myocytes
 ANP secretion, determinants of, C608
 oxidant effects on calcium uptake, C598
 non-insulin-dependent diabetes and, E25
 single calcium release channel, caffeine effects, H328
 Satiety
 after food intake, plasma CCK levels and, R1148
 bombesin effects, R181
 bombesin injections and, brain stem, R590
 CCK-induced, serotonergic function and, R1138
 CCK-8-induced, gastric mediation of, R56
 gastric emptying and feeding, intraventricular CCK inhibition (baboon), R1313
 stomach loading, hypothalamic CCK and, R248
 SAT: see *N*¹-Acetyltransferase
 Saxitoxin, ³H-labeled, small intestine, G966
 SBTI: see Soybean trypsin inhibitor
 Sch 23390, dopamine-stimulated cAMP production and, renal arterioles, H626
 Sciatic nerve
 mediation of somatosympathetic reflexes, R1084
 rostral ventrolateral medulla, somatic pressor reflex and, R448
 SCN: see Suprachiasmatic nucleus
 Secretagogues
 acid secretion stimulated by, parietal cell mass, G975
 calcium-dependent actions, gastric mucous secretion, mucosal explants, G739
 currents induced by, peritoneal mast cells, C560
 epithelial responses to, ileum, G919
 parietal cell response, gastric mucosa, G254

- Secretagogues (*continued*)
 protein phosphorylation induced by,
 Caco-2 cells, G808
- Secretin
 CCK antagonists and, pancreatic secretion, G150
 CCK-8-induced satiety and, R56
 plasma, in response to dietary fat, G1016

 absorption
 colonic, membrane site of action of carbon dioxide, C584
 secretory cell line, G335
 active transport, alveolar epithelial cells, C688
 balance, chronic CEI and, R531
 bicarbonate absorption independent of, proximal tubules, F577
 bicarbonate transport, hepatocytes, G491
 brain, regulation during acute hypernatremia, F1059
 8-bromoadenosine monophosphate, cyclic effects, bladder and skin (salamander), C1145
 chloride-dependent potassium flux, cortical collecting tubule, F697
 clearance, vasopressin and, awake state, R291
 concentration, intracellular, ventricular cells (chick), C351
 conservation, cyclosporine nephrotoxicity and, F71
- depletion
 adaptation in diluting segments and (salamander), F229
 modification of glycosylation of renin in, E798
- deprivation
 blood pressure and, H1426
 dietary, adrenergic control of renin, awake state, E863
- distal convoluted tubule cells and, F814
- electrolyte transport, chronic metabolic acidosis effects, colon, G1036
- excretion
 aldosterone secretion and ANP, R1155
 ANF and, during pacing tachycardia, R1245
 ANP effects, during acute hypertension, awake state, R1044
 atrial peptide effects, vasopressin potentiation of, H925
 diurnal cyclic, amiloride effects, R510
 elevation of renal venous pressure and, F776
 interleukin 1 and, micropuncture localization of, kidney, F810
 interstitial pressure and pressure diuresis, F63
 renal nerve role in, chronic congestive heart failure and, F1084
- extracellular, lithium substitution for, pituitary cells, C712
- extracellular electrode, monitoring net sodium flux in cell suspensions, C1105
- fractional secretion, renal perfusion pressure effects, F165
- glutamine cotransport mechanism, intestinal brush-border membrane vesicles, G240
- glutamine uptake and, renal, F1027
- inorganic phosphate uptake dependent on, cell adaptation to inorganic phosphate deprivation, C322
- intake
 dietary, changes in, hormonal responses to, R1171
 renin-angiotensin-aldosterone axis and, rate of activation, H1311
- intracellular activity, acetylcholine effects, cardiac Purkinje fibers (sheep), H1407
- intracellular regulation, sodium pump sites, vascular smooth muscle cells, C786
- luminal, sodium channels and, A6 cells, F1094
- magnesium transport and, thick ascending limb, F197
- permeation, cooling effects on hibernator cells (guinea pig, squirrel), R49
- reabsorption, proximal tubule in aldosterone escape, R86
- regulation of angiotensinogen mRNA, renal, spontaneous hypertension and, F469
- response to dehydration (cattle), R809
- retention, nephrotic syndrome, renal nerve role in, F823
- transepithelial, inhibition of *N*-glycosylation and, C958
- transport
 colonic, inhibition by amiloride analogues, C67
 EGF effects, cortical collecting tubule, F803

- inner medullary collecting duct, F862
nonciliated bronchiolar epithelial cells, C893
ouabain treatment and, cardiac cells, C1273
potassium secretion and, cortical collecting tubules, F306
TPA and insulin interactions, skin (frog), C569
zinc absorption and, small intestine, G87
- Sodium-ascorbate, electrogenic cotransport, pigmented ciliary epithelial cells, C44
- Sodium bicarbonate
Carbicarb and, brain pH responses, during systemic acidosis, H1316
transport, chronic respiratory acidosis and alkalosis, F414
- Sodium-calcium exchange
cytosolic free calcium relations, aortic muscle cells, C147
erythrocytes (ferret), C390
exercise and, cardiac sarcolemma, C638
ion-selective microelectrode assessment, ventricles, C813
ouabain treatment effects, heart cells, C1273
oxidant effects, myocytes, C598
sarcolemmal, ischemia effects, heart, neonate, H1615
- Sodium channel
amiloride-blockable, guanosine nucleotide-dependent activation of (toad), F965
apical, epithelial cells, lung (frog), C764
immunocytochemical localization, kidney medulla, F366
luminal sodium effects, A6 cells, F1094
sarcolemmal spheres, skeletal muscle, C434
- Sodium chloride
absorption, ANF effects, cortical collecting duct, F179
cotransport, potassium-independent, tracheal epithelial cells, C658
early exposure, blood pressure levels and, R70
intracisternal hypertonic, activation of renal sympathetic outflow, H411
intraventricular infusion, subpressor angiotensins and, synergism, H1
- Sodium-glucose cotransport, secretory cell line, G335
- Sodium-hydrogen antiporter
axial heterogeneity, proximal acidification, F335
bicarbonate handling and, kidney (alligator), F239
- Sodium-hydrogen exchange
activity, hepatocytes, G44
agonist-specific role, prostaglandin release, microvessel endothelium, C831
ammonia entry, during metabolic acidosis, proximal tubules, F1104
bicarbonate absorption independent of, proximal tubules, F577
cellular pathways, inner medullary collecting duct, C823
luminal perfusion effects on glucose production, proximal tubule, F120
pH and buffering, brain, F113
pH regulation and, red blood cells (trout), C728
- recovery from acidosis, myocardium, H256
regulation, NIH-3T3 cells, bladder, C756
- Sodium-inorganic phosphate symport, transport, across renal brush-border membrane, F852
- Sodium nitroprusside, cGMP production dependent on, leukotriene D₄ effects, glomerulus, F95
- Sodium-phosphate cotransport, intestinal, G645
- Sodium-potassium-ATPase
activity
furosemide inhibition, thick ascending limb, F549
indomethacin effects, cortical collecting tubules, F570
inner medulla, F218
stimulation by cortisol, gill (salmon), R707
adaptive response, diluting segments (salamander), F229
artery relaxation, hypertension, H707
cellular pathways, inner medullary collecting duct, C823
chloride-dependent potassium flux, cortical collecting tubule, F697
cholera toxin and, developing intestine, G220
endogenous digitalis and, C937
epithelial polarity, following ischemia, F430
hyponatremia, increased morbidity in females, R880
impaired, correction in diabetic nerve, E264
intestinal, dietary hormone modification (fish), E610
net sodium flux measurement, cell suspensions, C1105
oxidant effects, myocytes, C598
primary sequence of, A6 kidney cells (frog), F1034
regulation
protein kinase C and, proximal tubular cells, F370
renal proximal tubules, F57
rhythms and membrane potential, proximal colon, G779
sarcolemmal, ischemia effects, heart, neonate, H1615
synthesis and degradation, chronic ouabain treatment, C75
transport
choroid plexus, infant, R786
inhibition of *N*-glycosylation and, C958
- Sodium-potassium-chloride cotransport
intestinal, ANF and VIP effects (flounder), C142
regulatory volume and, pure population of erythrocytes, C858
- Sodium-potassium-chloride ion, cotransport, intestine (flounder), G166
- Sodium-potassium cotransport, volume-sensitive, erythrocyte ghosts, C81
- Sodium-sulfate, transport, glucocorticoid inhibition of, renal brush-border membranes (chick), R1176
- Soleus muscle
capillary tortuosity in, endurance training effects, H1110
fiber type, capillary and size interrelationships, C50
- Solutes
clearance, inert, biliary obstruction, G312
extraction, increased, retrograde liver perfusion, G1041
organic, high-performance liquid chromatography, F954
transport
intestinal basolateral membrane (fish), G509
intestinal brush-border membrane vesicles (fish), G501
- Somatic afferents: *see* Afferents
- Somatomotor activity, alerting stimuli, cardiovascular and behavioral responses to, R1121
- Somatostatin
acid secretion and, stomach, G418
amylase secretion and, pancreas, G897
CGRP inhibition, gastric and pancreatic secretion, G715
cytosolic free calcium and, somatotropes, E375
inhibitory effects, vagal motoneurons, brain stem, C155
sleep disturbances and, genetic obesity, R281
- Somatotrophs
cytosolic free calcium in, E375
growth hormone release from, epoxyeicosatrienoic acid effects, E221
- Sorbinil, glomerular hyperperfusion and, diabetes, F1000
- Sorbitol
activity, renal tubule segments, F563
dehydration and ADH effects, inner medulla, F916
high external sodium chloride and, renal medullary cells, C614
HPLC, renal medulla, F954
pathway, sodium-potassium-ATPase in diabetic nerve, E264
regulation, inner medullary tubules, F128
- Soybean trypsin inhibitor, CCK and, pancreatic digestive enzyme gene expression, G733
- Species differences
calcium and sodium, ion-selective microelectrode assessment, ventricles, C813
inositol transport, intestinal, carnivorous and herbivorous (fish), G501, G509
mammal and human, isolation of RNA from skeletal muscle, C1092
- Spectrometry
mass, ammonia formation, acute acidosis, F321
secondary ion mass, calvariae, E152
- Spectrophotometry, *b*-type cytochromes, brain, C840
- Spectroscopy
near-infrared, hemoglobin saturation, noninvasive determination, H1493
- NMR
ischemic renal injury, F298
quantitation of enterocyte metabolites (chicken), G423
nuclear magnetic resonance, diabetic skeletal muscle, E129
- Spermidine
modulation, obstruction-induced colonic mucosal hypertrophy, G1049
uptake
enterocytes, G905

SUBJECT INDEX TO VOLUME 256

- Spermidine (*continued*)
 type II pulmonary epithelial cells, C160
- Spermine/spermidine, SAT activity, pentagastrin induction of, G16
- Spike, unitary trains, whole nerve measurements, R997
- Spinal cord, injury, intrathecal vasopressin and, R193
- Splanchnic nerve, mediation of somato-sympathetic reflexes, R1084
- Splanchnic veins, diameter, reflex control of, H1066
- Splenic nerves, activity, spinal transection, cardiovascular regulation, awake state, R666
- SR: see Sarcoplasmic reticulum
- Starvation: see Fasting
- Status epilepticus, cerebral glucose utilization during, newborn (monkey), C1160
- Stenotic hemodynamics, vasoconstriction responses, H1044
- Stereoisomer, feeding, endogenous organic acid, R366
- Stereology, arterioles, brain stem and cerebrum, H493
- Stomach: see also Gastric
 acid secretion, somatostatin linkage, G418
 chemical stimulation, coronary vascular responses, H735
 endothelin effects, G661
 ethanol injury, prostaglandin effects (guinea pig), G704
 hydrogen permeability, gastrointestinal membrane vesicles, G553
 intrinsic reflexes (opossum), G198
 loading, hypothalamic CCK and, R248
 omeprazole and cimetidine, versus pentagastrin, G390
 oxygenation
 hemodilution effects, H171
 optimal hematocrit for, H472
 pancreatic intrinsic factor, identification, G517
 secretion, inhibition by CGRP, G715
- Streptozotocin
 diabetes
 cardiovascular, fluid, and electrolyte status, R1279
 glomerular hyperperfusion, sorbinil effects, F1000
 postreceptor defect in insulin action, E624
 glucose transport, insulin modulation of, intestine, G911
- Stress
 arterial wall, during volume loading, awake state, H713
 cardiovascular responses to, central oxytocin systems and, H1369
 cold, blood flow and oxygen consumption during, gastrointestinal (piglet), G364
 dependence, cross-bridge phosphorylation, vascular smooth muscle (swine), C96
 emotional
 cardiovascular and behavioral responses to, R1121
 sympathoadrenal function in exercise, R169
 glycemia after, hypothalamic control, E231
- hypertension, ACTH-induced, R1308
 hypertonic, liver cell volume, bile flow, and volume regulatory potassium fluxes, G563
 immobilization, peripheral and central consequences, genetic obesity, R435
 mechanical, short-term pressure load, saphenous vein, H47
 mental, adipose tissue blood flow and, E12
 renin response and, reduced renal perfusion pressure, R554
 ulcer formation, energy expenditure, R403
- Stress-strain relations, smooth muscle stiffness, during isotonic contraction, C341
- Strontium, calcium sources and, gallbladder muscle, G785
- Strophanthidin, acetylcholine effects and, sodium activity in Purkinje fibers (sheep), H1407
- Subcoeruleus area, neuronal activity in, arousal state vs. temperature effects, R840
- Subcutaneous tissue, intercellular adenosine concentration, microdialysis of, E250
- Subfornical organ, spontaneous hypertension, enalapril effects on angiotensin II receptors, H1609
- Substance P
 contraction induced by, gut smooth muscle, neutral endopeptidase inhibitors and (ferret), G39
 involvement, noncholinergic excitation, colonic muscle, G246
 mechanics, pylorus and gastric muscles, G862
 motor activity and, colonic, G997
 smooth muscle cell line and, airway, C329
- Substrate, hypoxia and, smooth muscle metabolism and contraction, C719
- Substrates
 leucine metabolism and, aging humans, E288
 regional fluxes, after exercise, E167
- Suckling
 digestive epithelial cell proliferation, bombesin ingestion and, G328
 GI tract, fate of milk calcium in, G1063
 thyroxine and cortisone effects, jejunal sucrase expression, G604
- Sucrase-isomaltase
 jejunal expression, thyroxine and cortisone effects, sucklings, G604
 stimulation, villus site of fasted jejunum, G158
- Sucrose
 hypertonic stress and, liver, G563
 small molecule reflection coefficient, H282
- Sugar, transport, diltiazem effects, skeletal muscle, R716
- Sulfate
 regulation, glucocorticoids and, renal brush-border membrane (chick), R1176
 transport, lung fibroblasts, C486
- Sulfhydryl groups, potassium-chloride cotransport, dapsone-induced anemia, C265
- Sulprostone, prostaglandin binding and, cAMP metabolism, Henle's loop, C652
- Superoxide
 acetylcholine and, dilation of cerebral arterioles, H665
 production, alveolar macrophages, kinetic model, C405
- Superoxide anion radical, depression of calcium ion pump, heart sarcolemma, H368
- Superoxide dismutase
 defense mechanisms, postischemic skeletal muscle, H789
 dose-related protection, reperfusion arrhythmias, H1344
 polyethylene glycol-conjugated, ischemic brain injury and, H589
 postischemic response to, diabetes effects, H1353
 prostaglandin E₂ production and, gastric mucosal cells, G925
- Superoxide radical, protection of calcium pump from, coronary artery (pig), C666
- Suprachiasmatic nucleus, lesions, activity rhythms and, R1027
- Supraoptic nucleus, hexokinase activity, during dehydration and rehydration, R1050
- Swallowing, reflex, water and taste solutions and, R822
- Sweat gland, eccrine, dye-coupling compartments in, C478
- Swelling, potassium transport activated by, erythrocytes, C1214
- Sympathectomy
 cervical, hypoxia and, H460
 chronic whole-body, protection of ischemic heart and, H1322
 DOPA and, muscle, E284
- Sympathetic activity, resting muscles, during muscle ischemia, H105
- Sympathetic nerves
 activity
 changes induced by 2-deoxy-D-glucose infusion, E714
 midline medulla, trigeminal depressor response, R1111
 phasic baroreceptor discharge and, H1735
 presence of glutamate antagonist, R722
 renal, anesthetic effects in awake state, R371
 severe hypoxia, H162
 sodium-angiotensin synergism, H1
 spinal transection, cardiovascular regulation, awake state, R666
 age-related baroreceptor impairment, female, H1399
 discharge, cerebral ischemia, R120
 glucose, FFA, and insulin levels, exercise and, R161
 heart rate dependence, acetylcholine, model, H520
 modulation of natriuresis, awake state, F485
 renal
 activity, angiotensin II and, R694
 paraventricular nucleus stimulation and, R1325
 activity and natriuresis, water immersion and, awake state, R299
 renin inhibition by left atrial pressure and, R413
 stimulation, transfer function analysis of atrial response, H142

SUBJECT INDEX TO VOLUME 256

tonic influences of rostral medulla and, R323
 Sympathetic nervous system
 adrenergic contractions, neuropeptide Y and, G589
 althesin and urethan-chloralose effects, neurohumoral cardiovascular regulation, R757
 blockade, variation of hemodynamics and (monkey), R778
 control of glycemia, after stress, E231
 CRF infusion effects, VMH-lesioned obesity, R751
 interleukin β 1, pyrogenic and thermogenic effects, E7
 massive discharge, oxygen consumption after, E345
 obesity, obesity resistance and, R766
 pancreatic nerve stimulation, galanin release during, E191
 physiological responses to norepinephrine, underfeeding effects, lean women, R583
 renal sympathetic outflow, activation by intracisternal hypertonic sodium chloride, H411
 sodium excretion, renal nerves and, chronic congestive heart failure, F1084
 weight cycling, dietary obesity and, R1209
 Sympathoadrenal activity, hemodynamics in hypovolemia, awake state, R1076
 Synaptosomes, brain, phospholipid content, chronic renal failure and PTH effects, F705

T

Tachycardia
 intrinsic heart rate, neurogenic mechanism control of, R231
 pacing, ANF-induced natriuresis during, R1245
 Tachykinin
 gut smooth muscle contraction, neutral endopeptidase inhibitors and (ferret), G39
 noncholinergic excitation, colonic muscle, G246
 Taste: see Gustatory response
 Taurine, transport, anion dependence of, renal brush-border membrane vesicles, F646
 Taurocholate
 secretion dependent on, hepatocyte couples, G826
 uptake, biliary obstruction and, G312
 Taurodeoxycholate, chloride secretory responses and, T₈₄ cells, C1224
 T₈₄ cells
 chloride secretory responses, calcium-mediated effector mechanism effects, C1224
 colonic, volume-sensitive chloride conductance, C1111
 Teaching program, effectiveness analysis plan, lectures in medical physiology, S3
 TEA: see Tetraethylammonium
 Temperature
 ambient, respiratory quotient, lean and obese rats, R236
 ionic strength and, stability constants for EGTA, C1250

sodium permeation and, red cells (guinea pig, ground squirrel), R49
 water, selection, ethanol and anoxia effects (goldfish), R133
 Temperature, body
 hypothalamic, thalamic neuron response to, R1293
 prostaglandin E₂ infusion, comparison of methods, awake state (sheep), R685
 regulation, normotension and hypertension, R560
 spinal, nocturnal hypothermia and food deprivation (pigeon), R733
 vs. arousal state, neuronal activity in subcoeruleus area, R840
 Tenuissimus muscle, leukocyte shunting in, H85
 Testosterone, modification, intestinal function (fish), E610
 12-O-Tetradecanoylphorbol 13-acetate, interaction with insulin, sodium transport and, skin (frog), C569
 TPA: see 12-O-Tetradecanoylphorbol 13-acetate
 Tetraethylammonium
 brush-border transport, proximal tubules, F290
 transport, renal brush-border membrane vesicles, F462
 Tetraethylammonium ions, potassium channel block and, C683
 Tetrodotoxin
 mesenteric venous capacitance, reflex control of, H1066
 PAF-acether and, gastric motility changes, G275
 polarized arrest, basal metabolism, heart, H846
 Theophylline
 acetylcholine and epinephrine interactions, repetitive activity in atrial fibers, H74
 chloride ion transport and, intestine (flounder), G166
 spontaneous activity and, R1274
 Thermal acclimation, subcellular structure and, skeletal muscle (fish), R1
 Thermal injury, tissue pressures in, H940
 Thermodynamics, irreversible, C694, C699
 Thermogenesis
 brown fat, hibernation and arousal (ground squirrel), R42
 cold-induced
 aging, exercise and, effects on regional blood flow, R1069
 respiratory quotient, lean and obese rats, R236
 diet-induced, regulation of lipoprotein-lipase, brown fat, E645
 during arousal from hibernation, rare fatty acids in brown fat and (hamster), R146
 early postexercise recovery, E167
 energy balance, exercise-rest cycles and, R886
 gold thioglucose-induced obesity, brown fat, E773
 insulin secretion, after training and de-training, E588
 interleukin β 1, corticotropin-releasing factor and, E111
 interleukin β 1 and, E7
 metabolic rate and, body fat mass effects, E573
 nonshivering, chronic glucagon-treated hyperthermia (duckling), R1192

obesity, obesity resistance and, R766
 overfeeding-induced, chronic β -adrenergic blockade inhibition of, R653
 physiological responses to norepinephrine, underfeeding effects, lean women, R583
 thyroid status effects, brown adipocytes, E74
 Thermoregulation
 blood flow and oxygen consumption and, postprandial gastrointestinal (piglet), G364
 fever and acute-phase response, induced by IL-1 and TNF, R35
 gold thioglucose-induced obesity, brown fat, E773
 sensitivity, melatonin rhythms (reptile), R1160
 temperature vs. arousal state effects, neuronal activity in subcoeruleus area, R840
 thalamic neurons, skin cooling and, R1293
 water temperature selection, ethanol and anoxia effects (goldfish), R133
 Thermosensitivity
 neuronal, normotension and hypertension, R560
 nocturnal hypothermia, food deprivation and (pigeon), R733
 Thiazide diuretic, receptors: see Receptors
 Thirst: see Drinking
 Thoracic duct, lymph flow, measurement, fetus (sheep), H16
 Thrombin, sodium-hydrogen antiport, prostaglandin release, C831
 γ -Thrombin, nonthrombogenic, increased transvascular protein transport induced by (sheep), H1690
 Thrombosis, arterial, thromboxane antagonism (monkey), H726
 Thromboxane
 antagonism, antithrombotic activity and (monkey), H726
 biosynthesis, renal endothelial cells, F266
 cerebrovascular responses and, during seizures (piglet), H120
 dietary protein intake, glomerular eicosanoid production and, F711
 endothelium-dependent dilatation of cerebral arterioles, diabetes mellitus effects, H621
 intrarenal vasoconstriction and, during hyperchloremia, F152
 mediation, postischemic renal injury, F794
 PAF-acether and, circulation, newborn (piglet), H205
 pulmonary edema and (guinea pig), H1012
 receptors: see Receptors
 Thromboxane A₂
 receptors: see Receptors
 role in glomerular responses, platelet-activating factor, F35
 Thymidine, uptake, gentamicin effects, proximal tubular cells, C204
 Thyroid
 status
 effect on ANP release, atria, E64
 thyroxine 5'-deiodinase in brown adipocytes, E74
 Thyroidectomy, gastric acid secretion and, parietal cell mass, G975

SUBJECT INDEX TO VOLUME 256

Thyroid hormones
 distal convoluted tubule cells and, F814
 gastric acid secretion and, parietal cell mass, G975
 glucoregulatory function, role of pancreatic hormones, E101
 membrane adaptation, renal brush border, F852
 ontogeny and, nuclear receptors (sheep), E543
 receptors: *see* Receptors
 semistarvation, carbohydrate effects on cardiac myosin isoenzyme, R976
 Thyrotropin-releasing hormone
 intracisternal injection, gastric luminal serotonin release and, G377
 medullary sites for, gastric contractility, G1011
 Thyroxine
 differential effects, jejunal sucrose expression, sucklings, G604
 gastric acid secretion and, parietal cell mass, G975
 modification, intestinal function (fish), E610
 overfeeding-induced thermogenesis, R653
 Thyroxine 5'-deiodinase, thyroid status effects, brown adipocytes, E74
 Tissue: *see* specific type
 T lymphocytes, adherence to lung fibroblasts, immune mediators and, C336
 TNF: *see* Tumor necrosis factor
 α -Tocopherol, myocardial ischemic injury and, H1192
 Toxin, bacterial, intestinal smooth muscle, G759, G767
 Trace elements, metabolism, chelator effects, hepatocytes, G667
 Tracer methodology, glucose and insulin effects, fetal oxygen consumption (sheep), E704
 Trachea
 smooth muscle
 ANP and cGMP in, C495
 muscle length and load effects on calcium, C807
 smooth muscle cell line, physiological responsiveness, C329
 smooth muscle stiffness, during isotonic contraction, C341
 Tracheal epithelium, volume and ion transport, submersion culture, F397
 Tracheal gland cells, β -adrenergic receptors in, C310
 Transcendental meditation, hypoventilation and, R632
 Transcobalamin II, secretion, umbilical vein endothelial cells, C296
 Transcytosis, membrane processing, charge effects, C304
 Transferrin
 absorption, peritoneal cavity, E447
 uptake and distribution, iron-deficient liver, G1022
 Transforming growth factor- β , myogenic differentiation and, C701
 Transmural nerve, stimulation, adrenergic control of intrarenal arteries, H607
 Transplantation, multiple, aging effects, C1262
 Transversus abdominis muscle, metabolic fiber types (snake), C1176
 TRH: *see* Thyrotropin-releasing hormone
 Triamcinolone acetate, receptor activation, isolated heart, C219

Triazolam, circadian rhythms and (hamster), R639
 Trichinosis, colonic ion transport, immunologic regulation, G396
 Trifluoperazine, vasopressin release, calmodulin and, E516
 Trigeminal depressor response, midline medulla role in, R1111
 Triglycerides
 catabolism, fructose feeding and, E559
 infusion, impairment of glucose disposal, E747
 medium-chain, glucose production and, low birth weight newborns, E692
 Trigrinin, inhibition, platelet hemostatic plug formation, H1038
 Triiodothyronine
 brown fat, gold thioglucose-induced obesity, E773
 distal convoluted tubule cells and, F814
 overfeeding-induced thermogenesis, R653
 thyroid status effects, brown adipocytes, E74
 3,5,3'-Triiodothyronine, atenolol and, food intake, body and heart composition, E459
 Trimethylamines, inner medullary, choline dehydrogenase activity and, F107
 Triphenyl tetrazolium chloride technique, collateral blood flow change, after coronary occlusion, awake state, H478
 Tryptophan, stress immobilization, genetic obesity, R435
 T₃: *see* 3,5,3'-Triiodothyronine
 t tube, asymmetric, arterial system simulated by, impedance, H1087
 Tumor necrosis factor
 anti-EDRF effect of, carotid arteries, H1509
 concurrent cachectin and insulin administration, E725
 fever, interleukin 1 β and, E111
 interleukin 1 and, fever and acute-phase response induced by, R35
 T lymphocyte adherence and, lung fibroblasts, C336
 Tunicamycin, PTH-induced cAMP production and, E80
 Twitch-tetanus response, striated muscle, external anal sphincter, G773
 Tyrosine kinase, insulin receptor, skeletal muscle, E39

U

U 46619, mesenteric vasoconstriction induced by, thromboxane antagonist (monkey), H726
 Ulcer
 duodenal, pathogenesis, G1058
 stress, energy expenditure in formation, R403
 Ulceration, endothelin and, stomach, G661
 Ulcerogenics, vasoconstrictors and, stomach, G661
 Ultrafiltration coefficient, regulation of glomerular filtration and, F505
 Ultrastructure
 heart, Z-bands, H552
 skeletal muscle, thermal acclimation and adaptive changes (fish), R1
 Umbilical artery, circulation: *see* Circulation
 Umbilical cord, blood flow: *see* Blood flow

Umbilical vein, endothelial cells from, transcobalamin II secretion, C296
 Urea
 transport, active, hydrogen gradients and, skin (toad), F830
 water transport and, inner medullary collecting duct, F610
 Ureagenesis, G proteins and, hepatocytes, C384
 Uremia, chronic renal failure and PTH effects, brain synaptosomes, F705
 Ureter
 bradykinin receptors, localization by autoradiography, F909
 peristaltic patterns, flow rate relations, R29
 transport, morphological dynamics, R19
 Urethan, renal sympathetic nerve activity and, awake state, R371
 Urethan-chloralose, althesin and, neurohumoral cardiovascular regulation, R757
 Urinary bladder
 acidification, acetazolamide effects (turtle), F923
 ADH-induced water channels in, mercurial reagents and (toad), 948
 ADH stimulation, cellular responsiveness to (toad), F590
 aldosterone-induced protein (toad), C865
 bradykinin receptors, localization by autoradiography, F909
 ganglionic filtering, efferent pelvic nerve activity and, R1269
 mitochondria-rich cells, bicarbonate secretion, hydrogen-ATPase and, F869
 permeability: *see* Permeability
 Urinary concentrating mechanism
 independence of urea and water transport, inner medullary collecting duct, F610
 kidney structure and (bird), R501
 Urinary excretion, vasopressin, awake state, R291
 Urinary output, abnormal diurnal rhythm, patients with enuresis, F664
 Urinary tract, obstruction, release of, atrial peptide effects, F583
 Urine
 acidification, hydrogen secretion, collecting duct, F79
 concentration
 dehydration and ADH effects, inner medulla, F916
 desensitization to ADH and, kidney, F656
 dilution and, interstitial pressure and pressure diuresis, F63
 flow rate, peristaltic patterns, R29
 fractions, shape and volume of, R19
 Urodynamics
 constituent urine fractions, shape and volume of, R19
 urine flow rate, peristaltic patterns in, R29
 Urography
 constituent urine fractions, shape and volume of, R19
 peristaltic patterns, urine flow rate, R29
 Urokinase
 plasminogen activation and, perfused kidney, F787
 tissue-type activator, epinephrine and, hindlegs, H404
 Ursodeoxycholic acid
 formation from 7-ketolithocholic acid, liver enzyme preparations, G67

permeability, biliary tree, G653
 Uterine artery, vascular responsiveness, pregnancy and (sheep), H1282
 Uterus
 blood flow: *see* Blood flow
 sympathetic innervation, pregnancy (guinea pig), E215
 vasodilation, local and systemic estradiol-17 β (sheep), E536
 V
 Vagal afferents: *see* Afferents
 Vagotomy, dynorphin and vasopressin effects, fetus (lamb), R1318
 Vagus nerve
 activity, brain neuropeptide infusion and, awake state, R792
 cardiac activity, CRF modulation of, H949
 dorsal motor nucleus, somatostatin inhibitory effects, C155
 heart rate
 acetylcholine, model, H520
 ventricular contractility and (chicken), H1295
 insulin hypersecretion and, obesity, E439
 muscarinic autoreceptors, acetylcholine release and, heart, H1073
 pulmonary afferent input patterns, respiratory I- β neurons, R379
 stimulation
 exocrine pancreas, peptide YY and, G698
 left ventricular relaxation and, H428
 subendocardial infarction, left ventricle, H859
 transfer function analysis of atrial response, H142
 TRH analogue stimulation, gastric contractility, G1011
 Valinomycin, chloride conductance and, parietal cells, G299
 Vasa recta, ascending, blood flow and acute renal failure, F456
 Vascular bed, hindquarter, regional response to endothelin, H598
 Vascular cells, subtype switching, ANP receptors, H311
 Vascular function, vitamin E effects, H1539
 Vascular sensitivity, norepinephrine, diabetes mellitus, H1134
 Vascular tone, resting and agonist-induced, intracellular alkalization, H867
 Vasoactive agents
 blood-borne, hemodynamics and, renal, F516
 tissue-type activator, epinephrine and, hindlegs, H404
 Vasoactive mechanism, myogenic, single diastole, awake state, H1645
 Vasoconstriction
 α -adrenergic coronary, abdominal visceral organs, H735
 angiotensin II-induced, calcium antagonists and, F1015
 coronary
 collateral circulation, H890
 exercise effects, H1148
 medullary reticular formation, H1218
 endothelial damage and, stenotic arteries, H881
 intrarenal, during hyperchloremia, F152
 mesenteric, thromboxane antagonism (monkey), H726

propagated, arterioles (hamster), H832, H838
 pulmonary, ANF release and, awake state (lamb), H990
 responses, stenotic amplification of, H1044
 single arterioles, length-tension relations in (hamster), H630
 skeletal muscle, coarctation hypertension and, H213
 uterine, pregnancy (guinea pig), E215
 Vasoconstrictors
 arterial pressure and, after chronic spinal transection, awake state, R666
 binding sites for endothelin, autoradiographic distribution in tissues, R858
 pressor response to, systemic vascular autoregulation, R98
 ulcerogenics and, stomach, G661
 Vasodilation
 adenosine-induced, pial arterioles, inosine effects, H603
 adenosine receptors, pulmonary arteries, H41
 glomerular, pregnancy with renal hypertension, F728
 perfusate flow during, heart (guinea pig), H297
 peripheral, vasopressin analogue effects, H1621
 propagated, arterioles (hamster), H832, H838
 Vasodilators
 arterial, volume load and, H876
 endothelium-associated, microcirculation and, skeletal muscle, H720
 regional response to, hindquarter vascular bed, H598
 Vasomotor responses
 cell-to-cell communication, arterioles (hamster), H838
 propagation of, arterioles (hamster), H832
 Vasopressin: *see also* Antidiuretic hormone
 abnormal diurnal rhythm, patients with enuresis, F664
 acute hypoxemia, fetal response (sheep), H613
 alterations in cytosolic calcium, LLC-PK₁ cells, C967
 althesin and urethan-chloralose effects, neurohumoral cardiovascular regulation, R757
 angiotensin II and, control of ACTH secretion, R339
 arterial pressure and, after chronic spinal transection, awake state, R666
 atrial peptides and, H925
 blood pressure regulation and, dehydration (baboon), H486
 blood volume restitution and, after hemorrhage (swine), R207
 bradykinin receptors and, kidney, ureter, and bladder, F909
 calcium regulation, vascular smooth muscle cells, C234
 cAMP metabolism and, Henle's loop, C652
 cardiovascular effects
 fetus (lamb), R1318
 infant (lamb), H641
 cardiovascular reflexes and, awake state (baboon), H1546

cardiovascular response to hypoxemia and, fetus (sheep), R1011
 cell sorting, kidney cells, F742
 chloride-dependent potassium flux, cortical collecting tubule, F697
 diabetes and, cardiovascular, fluid, and electrolyte status, R1279
 fluid absorption, ANF effects, cortical collecting duct, F179
 gastric acid secretion and, CRF-induced inhibition, G214
 glucocorticoid production and, adrenal, E566
 hemodynamics in hypovolemia, awake state, R1076
 heterogeneous actions of, cortical collecting duct, F556
 hyponatremia, increased morbidity in females, R880
 infusion, sleep-waking cycle and, R674
 intrathecal, cardiovascular responses, asleep and awake, R193
 membrane recycling, epithelial cell function and, F1
 microvascular effects of, renal, F274
 modulation of elevated venous pressure, kidney, F776
 neurohumoral changes, onset and offset of heart failure (ewe), H1052
 neuropeptide Y inhibition of, cortical collecting tubule, F408
 phorbol esters and, vascular smooth muscle cell activation, F875
 plasma, afferent renal nerve effects, awake state, R1240
 plasma atriopeptin and, during exercise, R1098
 pressor actions, age-dependent DOCA-salt hypertension, R138
 pressoregulatory mechanisms, after bleeding, H291
 pressor responses to, with DOCA hypertension (pig, sheep), H101
 pressor response to, systemic vascular autoregulation, R98
 prostaglandin E₂ infusions and, comparison, awake state (sheep), R685
 prostaglandin E₂ synthesis and, cortical collecting tubules, F1044
 release
 CCK-induced (sheep), R1355
 osmotic, by enkephalins, E270
 osmotic and angiotensin II-induced, anti-calmodulin agents and, E516
 osmotic thresholds, R892
 renin control and, dietary sodium deprivation, E863
 secretion
 adrenergic regulation of, developmental changes, fetus (sheep), E406
 osmoregulation of, estrous cycle and (pig), R270
 urinary excretion of, awake state, R291
 vascular responsiveness, adrenal insufficiency effects, H1274
 vasomotor activity, coronary collateral circulation, H890
 Vasopressin analogue, peripheral vasodilation induced by, H1621
 Vasoospasm, arterial, stenotic amplification of, H1044
 Vasotocin, arginine, direct cardiac stimulation by (bullfrog), R187
 Vena cava, occlusion, diastolic interaction gain, H567
 Venous capacity, saphenous vein, chronic tilt effects, H1185

Venous outflow, regional, severe hypoxia, H162

Ventilation
hypoxia, regional adrenal blood flow during, H94
intracardiac shunt relations (turtle), R240

Ventral septum, indomethacin-induced fever, V₁ receptor effects, R1164

Ventricles: *see* Cerebral ventricles; Heart ventricles

Ventricular cells: *see also* Cardiomyocytes; Heart cells; Muscle cells; Myocytes
calcium channel activity in, cytosolic magnesium modulation of, C452
lanthanum influx, detection by indo-1 fluorescence (chick), C351

Ventrolateral medulla, lesions, fastigial cardiovascular response and, H1200

Ventromedial hypothalamus, lesion, obesity and, CRF intraventricular infusion effects, R751

Ventromedial nucleus, increased γ -aminobutyric shunt activity, hyperphagic models, R1225

Verapamil
angiotensin II-induced vasoconstriction and, F1015
influence on subcellular defects, diabetic cardiomyopathy, E453

Vertebrae, lumbar, changes during rapid growth, R259

Vertebral nerve, fast sympathetic rhythms, cerebral ischemia, R120

Video imaging, digital, calcium concentration, myocytes, C1120

Videomicroscopy, tubular pressure, oscillations of, F1007

Villus cells, intestinal, basolateral impalement of (fish), C1022

VIP: *see* Peptides, vasoactive intestinal

Visceral organs, abdomen, chemical stimulation, coronary vascular responses, H735

Vitamin C, redox potential, renal metabolism, F52

Vitamin D
1,25-dihydroxy-, chronic administration effects, E686
deficiency, secondary hyperparathyroidism and, E765
kinetics, 1,25-dihydroxyvitamin D administration and, E636
metabolism, physical activity effects, E1

Vitamin D₃
1,25-dihydroxy-
biosynthesis, hypercalcemia-producing tumor effects, E309
enterocyte basolateral membrane calcium transport and, G613
fertility and, females, E483
response to elevated calcium, during phosphorous restriction, F285

Vitamin E
deficiency, vascular function and, H1539
myocardial ischemic injury and, H1192

VMH: *see* Ventromedial hypothalamus

Voltage, dependence, colonic potassium secretion in renal failure, F490

Voltage clamp, X-ray microanalysis, cardiac myocytes, H574

Volume: *see also* Blood volume
cell
potassium transport, chloride effects on, C994

potassium transport and, erythrocyte ghosts, C81
serosal anions and epithelial transport, bladder, F1125
sodium-calcium exchange, erythrocytes (ferret), C390

end-diastolic, oxygen consumption and, heart, H1289

expansion
ANF and, H852
atrioventricular release, pericardial pressure effects, H648
during hypoxia and hyperoxia, awake state, H1023
early stage experimental cirrhosis, F497

load
arterial vasodilators and, H876
arterial wall stress during, awake state, H713
electrophysiological effect, heart, H1697

overload hypertrophy, left ventricular function in, H974

plasma, restoration after slow hemorrhage, fetus (sheep), R1040

regulation
brain, during acute hypernatremia, F1059
chloride-bicarbonate exchange and sodium-hydrogen antiport, C428
hypertonic stress effects, liver, G563
proximal tubules in hypertonic medium, F622
tracheal epithelial cells, C658
volume-sensitive chloride conductance, C1111

regulatory
decrease, cultured renal cells (opossum), C252
pure population of erythrocytes, C858
sinusoidal, solute extraction and, retrograde liver perfusion, G1041
thoracic duct lymph and (sheep), R867
transport, tracheal and alveolar epithelium in submersion culture, F397
vascular, filtration coefficient in hindlimb, H186

Vomerolateral system, role in breathing, upper airway carbon dioxide and (snake), R91

Vomiting, gastrointestinal motor correlates in, pharmacology of, G92

von Willebrand factor, endothelial cell, cryosupernatant and, H1635

W

Water
ADH-induced channels, mercurial reagent inhibition of, bladder (toad), 948
brain, regulation during acute hypernatremia, F1059
consumption, nephrogenic diabetes insipidus and (chicken), F639

deprivation
hexokinase activity and, brain, R1050
vasopressin regulation of blood pressure (baboon), H486
diffusion measurements, erythrocytes, NMR, C1097
distribution, blood, glucose levels and (seal), R1220

doubly labeled method, single-sample, validation, R572

excretion, ANF effects, cortical collecting duct, F179

free, clearance, osmotic thresholds for vasopressin release, R892

homeostasis, nonciliated bronchiolar epithelial cells, C893

interstitial flux, lymphatic elimination in sepsis (sheep), H1524

movement, thermodynamics of, C694, C699

pulmonary edema in response to, protein kinase inhibitor effects (guinea pig), H1012

response to dehydration (cattle), R809

temperature, selection, ethanol and anoxia effects (goldfish), R133

transport
autoregulation of, cortical collecting duct, F556
8-BrcAMP effects, bladder and skin (salamander), C1145
unstirred layer, absorption and villous structure, intestine, G188
urea transport and, inner medullary collecting duct, F610
zinc absorption and, small intestine, G87

Weanling, energy expenditure, stress ulcer formation, R403

Weighing, underwater, body fat from body density, E829

Weight
body
cyclic gain and loss, adipose tissue dynamics during (squirrel), R1286
cycling, dietary obesity and, R1209
following area postrema ablation, R939
gain, adrenalectomy in genetic obesity, R494
loss, CRF intraventricular infusion effects, R751
uncoupling protein in brown fat (squirrel), R42
molecular, lymphatic elimination in sepsis (sheep), H1524

Wilson's disease, chelator effects, hepatocytes, G667

Work: *see* Exercise

X

Xanthine oxidase
mitochondrial calcium metabolism, during reperfusion injury, C1196
postischemic microvascular injury and, skeletal muscle, H1472
prostaglandin E₂ production and, gastric mucosal cells, G925

Y

Yersinia enterocolitica, mucin secretion and, intestinal, G319

Z

Zinc
absorption, small intestine, G87
metabolism, dibutyl cAMP effects, E420

Zona glomerulosa cells, aldosterone biosynthesis, potassium-induced, E475
